PREFATORY NOTE

This index undertakes to deal only with the printed reports of administrative officers, legislative committees, and special commissions of the states and with governors' messages for the period since 1789. It does not refer to constitutions, laws, legislative proceedings or court decisions, except in so far as they happen to be found in the class of documents above mentioned. It attempts, on the other hand, to furnish a list, as complete as possible, of all the documents and messages which fall within its scope, in whatever form they have been published, whether separately, in collected documents, legislative journals or volumes of laws, and to indicate the volume in which they may be found. In addition to furnishing a list of reports and messages, the index undertakes to supply a reference by volume and page to all material of economic importance which they contain, with the exception of that contained in the reports of bureaus of labor before 1902. The reason for this exception is that these reports have already been indexed by the late Carroll D. Wright, when United States Commissioner of Labor,[1] in a volume published by his department in 1902.

Although the index is confined to matter of economic bearing, the term " economic " has been given a broad interpretation. In view of this liberal interpretation it is believed that the index will constitute a useful addition to the resources of students of almost any aspect of American history.

It will be seen that the present index differs both in scope and character from R. R. Bowker's " State Publications," the valuable pioneer work in this field. It is narrower in scope than " State Publications," which aims to present a list not only of reports and governors' messages but of all state documents; but in the field which the present work covers it contains not only a more complete list of documents than has hitherto been published but also an index of their contents in so far as these have an economic bearing.

The arrangement is alphabetical by topics. The references under each topic are divided into two groups, viz., " serial " and " non-serial." Within each of these divisions the arrangement is chronological. Numerous cross-references will, it is hoped, make it possible to discover with little difficulty all the material bearing on a topic. A division of serial reports into more than one series occurs whenever there is a change in title, in the authority making the report or in frequency of issue. It will be seen that this division is not an arbitrary one. It is made in the belief that it will contribute to a clearer understanding of the facts than would a narrative explanation.

Uniform entry words for subjects recurring in different states will be retained throughout the series. It will thus be possible to make a study not only of the histori-

[1] Index of all reports issued by bureaus of labor statistics in the U. S. prior to Mch. 1, 1902. Wash., 1902. 287 pp. 8°.

cal development of an economic subject as reflected in the documents of an individual state but also to make a comparative study of that development as it has taken place in the country at large. To accomplish this purpose it has been necessary to make the selection of entry words without reference to the peculiarities of local usage, such peculiarities being recognized in the case of each state by cross-references. The abbreviations employed are believed to be sufficiently obvious to make a table of them unnecessary. Unless otherwise stated the size of the books is octavo.

A feature introduced in the New York part of this index, and not employed in the preceding parts (i. e., Maine, New Hampshire, and Vermont), is the system of references to localities. This feature has been made a part of the succeeding issues. Another change of importance was made in the volume for Ohio which preceded the present volume. This change consisted of the introduction of the names of legislators or administrators who, in one way or another influenced the development of the economic life of the state. While this introduction of the names of persons into the body of the index was admittedly an innovation, it is believed that the light which it throws on the causes of important economic movements will be distinctly helpful to the student. The present volume continues the form of its predecessor.

In order to make the record as complete as possible, the Senate and Assembly journals were read for orders to print, and entries have been made for all items which were found to have been ordered printed, although no copy of the document may have been found. The " not found " note attached to these items in the index does not signify that there may not be copies in some of the libraries examined. Although every facility was most generously extended the compiler by the New Jersey libraries, there is in every library uncatalogued material, in particular pamphlets, and variations in shelf arrangement, etc., which preclude a definite statement in any event. A second difficulty is the existence to an unknown extent of German editions of many executive reports. The third, and greatest, difficulty encountered in the case of New Jersey is the unusual number of editions printed of the various reports. Every effort has been made to secure a record of them in this index, but, without doubt, some have escaped the vigilance of the compilers.

Students will find, in various libraries, a set of volumes containing the departmental and other reports of New Jersey for the years from about 1848 to 1860. These volumes usually have the simple binder's title: State Papers. Both students and collectors are cautioned against accepting these volumes as an official collection. Hardly any two sets contain the same reports or the same reports in the same order. The assumption is that sets were collected and bound for legislators under a common understanding. Under the circumstances the sets, as sets, of these early " State Papers " have been disregarded, although each report found in all the sets examined has been noted in its proper individual place.

The present volume has been preceded by eleven similar volumes, devoted to the states of Maine, New Hampshire, Vermont, New York, Rhode Island, Massachusetts, California, Illinois, Kentucky, Delaware, and Ohio, respectively. It will be followed by others, each devoted to a single state. The work when completed will, therefore, fur-

nish an index to the economic material in the reports and governors' messages of all the states of the Union.

In the preparation of this volume the collection of the New York Public Library has been used as a basis, and, unless otherwise shown, the material indexed is in that library. The collections of the Library of Congress, the New Jersey State Library, Trenton, the New Jersey Historical Society, Newark, the Free Public Library, Newark, the Princeton University Library, Rutgers College Library, Columbia University Library and the Free Public Library of Jersey City have also been examined. Acknowledgment is made for courtesies extended by each of these institutions in the course of the compilation of the present volume.

AGRICULTURAL SOCIETIES: INDIVIDUAL (COUNTY AND LOCAL)

Under sec. 6 of act of April 4, 1872, the state bd. of agric. was directed to "prescribe forms for and regulate returns of the agricultural societies of the state, in correspondence with them, and shall furnish said societies with proper blanks, so as to secure uniform and reliable statistics." Sec. 8 provided for publication of such returns as the secy. of the bd. might deem useful.

The returns from the several local and county societies are entered below, under the County in which they existed. This arrangement is made to preserve uniformity in presentation of the material throughout the series, the acts of March 18, 1882 and April 2, 1884 having constituted members of agricultural and horticultural associations, members of County Boards. From 1884 the returns are made chiefly by the County Boards. A "county society" as defined by act of March 18, 1882, includes only those holding an annual fair or exhibition; no more than one society in any country is represented in the state board.

See Agriculture. New Jersey, the serial group, for circulars sent county societies, respecting statistics, etc.

Crop Bulletins

serial

See Climate, the serial group.

The following stmt. concerning the weekly and monthly crop bulletins was made by E. W. McGann in an address on the State Weather Service, in Jan., 1889; "In the first place the chief signal officer furnishes all the materials, stationery and franked postal notes for the crop bulletin, so that this expense is borne by the national govt. The expense necessary in printing the monthly bull. is in part made up from one or two advertisements, but the space is limited, so that the revenue derived from that source does not equal the expense of the service. So far during the year no funds have been recd., excepting those mentioned above . . . ."

New Jersey

Interest in the cranberry crop was manifested by N. J. as early as 1789 when an act was passed for the preservation of cranberries; act of Feb. 16, 1832 repealed that of Nov. 10, 1789 and fixed a penalty for gathering cranberries on unlocated lands within the state or any property not owned by the gatherer, betw. June 1 and Oct. 1.

1884. Amt. expended for bounty on sugar in three years: amt. that will be required for next two years. (Govs. mess. (Ludlow) Jan. 8, 1884.)

1885. Amt. paid by state for sorghum industry in Cape May Co. (*Same* (Abbett) Jan. 13, 1885: 39.)

1886. Amt. paid for sorghum industry in Cape May Co.; total amt. expended for bounty since 1881; pounds of sugar made and tons of sorghum grown. (*Same* (Abbett) Jan. 12, 1886: 34.)

INSPECTION

PLEURO-PNEUMONIA

1879-1895. Disbursements; inspection of cattle. (A.R. comptroller 1878/9 (pp. 48-49)—*same* 1894/5.)
From 1885 to 1890 the stmt. is given under State Board of Health; the expenditures were chiefly for the suppression of pleuro-pneumonia; the heading is pleuro-pneumonia in 1894 and 1895.

1879-1895. Disbursements; inspection of cattle. (A.R. treasurer 1878/9 (pp. 93-96)—*same* 1894/5.)
Title is Pleuro-pneumonia, 1880-1895.

1880. Expenditure by state to check spread of pleuro-pneumonia; amt. expended in Penn. (7 A.R. bd. agric. 1879: 251.)

TUBERCULOSIS COMMISSION

1894-1904. Amt. paid to the comn. to investigate tuberculosis in cattle. (A.R. comptroller 1893/4 (p. 46)—*same* 1903/4.)
In 1896 and 1904, the acct. is given with that of State Board of Agriculture; see above, Board of Agriculture, under dates 1873-1903/4, note.

RUTGERS SCIENTIFIC SCHOOL, THE STATE COLLEGE FOR THE BENEFIT OF AGRICULTURE AND MECHANIC ARTS

1865/6-1891/2. Amt. recd. from the state treasury; application to payment of salaries. (Rept. trustees Rutgers Scientific School 1865/6 (p. 8)—*same* 1892.)

1878-1895. See above, Board of Agriculture, under dates 1873-1903/4. Note.

1883. See above, Education. Rutgers Scientific School, this date.

1891-1904. U. S. apprn. to agric. college: receipts under act of Congress approved Apr. 30, 1890 and disbursements under act of N. J. Legislature, Feb. 10, 1891. (A.R. comptroller 1890/1 (pp. 16-17)—*same* 1903/4.)

——. Same. (A.R. treasurer 1890/1 (pp. 385-386)—*same* 1903/4.)

Seeds

1887. On selection of seeds. (14 A.R. bd. of agric. 1886: 87-88.)

1893. Good seed; by D. C. Voorhees. (20 *same* 1892: 100-105.)

1894. On distribution of govt. seeds. (21 *same* 1893: 24-25.)

1895. Seeds and seeding; by E. B. Voorhees. (23 *same* 1895: 394-395.)
Selection; adulteration; change; testing.

1897. Free seed distribution. (Procs. state hortic. socy. 1897: 25-29.)

Sheep; see above, Livestock

Soils

1868. Cranberry lands—soils and subsoils of east and west plains—coprolites. (Geology of N. J. 1868: 714-719.)

1869. On the soils of state, etc. (A.R. state geologist 1869: 49-51.)

1870. On soils of state, their origin, chemical and physical properties, distribution and suggestions for their most productive mngmt. (*Same* 1870: 53-54.)

1872. On soils and their productiveness. (*Same* 1872: 40-42.)

1873. Soils: nature of soils in N. J.; gneiss soil; limestone soils; slate soils; red shale and sandstone soils; marl soils; drift soils; miocene soils; alluvial soils. (*Same* 1873: 115-118.)

——. On clearing and farming drift soils of southern N. J.; by R. G. Brandriff. (1 A.R. bd. agric. 1873: 68-70.)

——. Soils of N. J.; by G. H. Cook. (1 A.R. bd. agric. [1873]: 11-31.)
Their origin and distribution; chemical composition; analyses; weight of soil compared with that taken out by crops.

1876. Remarks upon N. J. bd. of agric.; by J. B. Lawes. (4 *same* 1876: 38-40.)
Artificial manure; experiments upon Indian corn; soil analyses.

1878. Preliminary description and classification of soils of N. J. (A.R. state geologist 1878: 24-47.)

——. Map showing soils of glacial drift of northern N. J. and approximate bounds of pine and oak lands of southern N. J. Scale: 6 mi. = 1 in. (*Same* 1878.)

1879. Soils of N. J. (*Same* 1879: 103-121.)
Analyses; agric. tests.

1880. Soils: localities where different soils are found; analyses. (*Same* 1880: 153-157.)

1882. Various processes by which fertility to a soil is restored; by J. B. Lawes. (10 A.R. bd. agric. 1882: 49-56.)

1885. Clover-sick soils. (6 A.R. agric. exper. station 1885: 210.)

1888. The investigation of soils; by H. B. Patton. (9 *same* and 1 A.R. agric. college exper. station 1888: 213-221.)
Scope of soil investigation in the past and reasons for state exper. station to undertake such investigation.

1888-1890. Rept. of the chemical geologist [on soil investigation].
In Documents as follows:

1891. Farm drainage; by C. B. Crane. (19 A.R. bd. agric. 1891: 450-457.)

FERTILIZERS

1867. [Drainage and fertilizers]; by Geo. H. Cook. (Rept. N. J. state college 1867: 35-56.)
Relates chiefly to fertilizers and manures.

1868. Economic geology: fertilizers. (Geology of N. J. 1868: 378-501.)
Soils; limestone and lime; lime-burning (Peapack, Clinton, Musconetcong Valley, Pohatcong Valley and vicinity of Phillipsburg, Warren Quarries—Carpentersville, Newton); greensand marl (clay marls, analyses, use of marl, modes of application and effects, causes of fertilizing action of marl and its commercial value, statistics of marl—quantities and prices, marl digging, historical notice of greensand marl as a fertilizer); miocene marl; shell and other calcareous marls; peat; marine products (marsh mud, sea-weed, king-crabs or horsefeet, fish, mussels, oyster and clam-shells).

1870. On fertilizers found in state and means of making them more quickly and generally useful: analyses; tables for calculating value of greensand marl and for comparing it with other fertilizers; prices and values. (A.R. state geologist 1870: 8-13.)

1874. Effects of different kinds of fertilizers; experiments on meadow lands, wheat, oats, beans, peas, tares, red clover, root crops. (2 A.R. bd. agric. 1874: 15-24.)

1877. [Fertilizers]; by G. H. Cook. (Procs. state hortic. socy. 1877: 16-18.)

1879. Effects of fertilizers on different soils—some experiments and experiences with potatoes; by C. V. Mapes. (7 *same* 1879: 45-82.)

1881. Questions in fertilization; by J. B. Lawes, Rothamsted, England. (8 *same* 1880: 33-42.)
Substituting chemicals for manure, experience in Great Britain, special conditions in N. J.; artificial manures for potatoes, nitrogen—its cost and value.

——. General discussion at mtg. of state hortic. socy. rel. to fertilizers. (8 *same* 1880: 201-202.)

——. The nitrogen supply; by J. B. Lawes. (9 *same* 1881: 57-59.)
Experiment at Rothamsted, England, with seeds of corn sent from Baltimore.

1881-1888. Work of agricultural experiment station in regard to fertilizers: commercial relations, production and cost, analyses; agric. relations, field trials, etc.
In Documents as follows:

1881 in 2 A.R. agric. exper. station 1881: 14-42.

BUILDING AND LOAN ASSOCIATIONS

In 1847, New Jersey enacted the first law in the U. S. for the incorporation of building and loan associations (13 A.R. bureau of statistics of labor, etc. 1889/90: 3). This statute was supplemented by the act of Feb. 28, 1849, which remained in force until 1875. Under the act of 1875, the associations were to furnish the secy. of state, if required, an ann. stmt. There is, however, no evidence that the requirement was ever made. The first official reference to building and loan associations in N. J. documents occurs in the 1 annual rept. of the bureau of statistics of labor and industries (1878), where the bldg. and loan associations at Millville, N. J., are alluded to as a feature of co-operation. In the 13 annual rept. of the bureau of statistics of labor, etc., 1890, it is stated (p. xv) that "the first systematic effort made in this country to collate and publish statistics of the co-operative building and loan association movement was, it is believed, that of this bureau. Begun in 1880, with the incomplete and crude compilations from, possibly, not more than one-half of the then existing enterprises, the inquiry has been pursued biennially since then . . ." It is further stated in the same report that officials have generally furnished the returns even before the passage of the compulsory act of June 13, 1890. This act required mutual loan, homestead and building associations to make an ann. stmt. to the chief of the bureau of labor and industries and the chief was required to publish annually a concise report on the standing and condition of all the associations. Under the act of Feb. 10, 1891, building and loan associations of other states were placed under the care of the dept. of banking and insurance and in 1899 the supervision of all building and loan associations was transferred to the commissioner of banking and insurance.

——. Unfavorable comment on practices of assns. in making advances on real estate already encumbered by mortgage to a third party, in failure to place proper safeguards around cash paid in by members, in increasing book value of real estate by charging acct. with ordinary repairs, taxes, etc., in carrying as mortgage loans items properly belonging in real estate acct., of crediting dividends apportioned to shares on pass-books of members, and of neglect to make proper provision for paying matured shares; recommended legislation restricting such practices; importance of making ann. re-valuations of real estate and of crediting committee making ann. verification of individual accts. by calling in pass-books and comparing entries with books of assns. (A.R. comr. banking and insurance rel. to bldg. and loan assns. 1900/1: 11-15.)
——. Favorable comment on ch. 160 of laws of 1899 making it obligatory to return to unadvanced members on withdrawal of the full stock dues paid by them, less fines and their proportionate share of loss, but without a deduction for operating expenses, and after one year's membership reasonable share of profits; practice of some assns. obeying the letter but not the spirit of the law condemned. (*Same* 1900/1: 10-11.)

Delaware and Raritan Canal

Companies to promote navigable communication betw. the Delaware and Raritan rivers were incorporated in 1796 and 1803 (see Amer. State Papers, Misc., v. 1: 726; 748-752). The state, however, took no active interest in the matter until 1816 when an act was passed for ascertaining the most eligible route and probable expense of a canal betw. the Delaware and Raritan. Dec. 30, 1824, the Delaware and Raritan Canal Company was incorporated, the state reserving the right to subscribe for one-fourth of the capital stock, and the further right, at the expiration of fifty years, to purchase the whole of said stock. The construction of the canal depended on the consent of Penn. to the use of the waters of the Delaware to supply the canal. This consent was not obtained, and under act of the New Jersey Legislature, Dec. 27, 1826, the surrender of the charter was authorized. A second act of incorporation was passed Feb. 4, 1830. Consolidation with the Camden and Amboy R.R. and Transportation Co. was authorized by act of Feb. 15, 1831. They were colloquially known as the "Joint Companies." The greater part of the material after the date of consolidation (1831) is entered under Railroads: Individual, United New Jersey Railroad and Canal Company.

[1822.] Letters and extracts rel. to the New Jersey Canal. h. t. p. 24 pp.
An unofficial paper, with a somewhat official significance. The first letter, dated Sept. 16, 1822, is "from John Rutherfurd to Geo. P. McCulloch, president of a meeting convened by Geo. P. McCulloch, Lewis Condict, John Doughty, Danl. Phoenix, and Mahlon Dickerson, Esquires, on the subject of a canal, and held at Morris-Town on the 21st of August, 1822." Mr. Rutherfurd declined to represent Bergen Co. in drawing a petition to the next legislature on the subject of a canal, mentioned his service on a state comn. in 1816, enclosed extracts from his correspondence since that time and expressed a wish that no application be made to the next Legislature. Following letters in the pamphlet are the "enclosed correspondence."
Two copies of this pamphlet were seen, viz.: one in the New Jersey Hist. Socy. and one in the New York Public Library.

The meteorological returns published in the early repts. of the bd. of health and in those of the state geologist, were obtained from the U. S. Signal Service Bureau, the Smithsonian Institution, and from private individuals. In 1886, a voluntary weather service was established in connection with the U. S. Signal Service [see 16 A.R. N. J. state bd. of agric. 1888: 141-149]. Under act of June 19, 1890, a state weather service was established.

Laws

serial

The following series do not appear to have been printed by the state printer. Some of them, however, bear the seal of the Department of State, and this fact, together with that of their importance in summarizing the corporation laws of N. J., has seemed to warrant their being included in the Index.

1 series

The act concerning corporations approved April 7, 1875, with amdmts., together with notes and forms.

School Funds

PERMANENT SCHOOL FUND

Origin

In 1813, the state by the sale of bank stock came into possession of $40,000. Efforts were made by the friends of education to make this a nucleus for a permanent school fund. The most persistent worker was James Parker of Perth Amboy, "The father of the school fund," who, on Feb. 1, 1817, secured the appointment of a committee to inquire into the expediency of creating a fund for the support of free schools. On Feb. 12, 1817, an act was passed creating such a fund.

The foundation of the fund was laid by an act passed Feb. 9, 1816,* directing the state treasurer to invest $15,000 in 6 per cent U. S. bonds arising from the payment of the funded debt of the U. S. and from dividends on state stock in the Trenton Banking Co., etc.

Trustees

By an act passed Feb. 12, 1818, the Governor, vice-president of the Council, speaker of Assem., atty. gen. and secy. of state and their successors in office were constituted trustees of the school fund. An account of the management of the fund was required to be laid before the legislature with the annual statement of the treasurer's accounts. In 1867, the comptroller was added to the board.

Under the laws of 1894 the trustees of the state school fund were: the Governor, president of the Senate, speaker of the House of Assembly, atty. gen., secy. of state, comptroller and treasurer.

A third change was made in 1903, the trustees for the support of common schools, consisting of the Governor, atty. gen., secy. of state, state comptroller and state treasurer.

Reports of trustees

Annual reports of the trustees were published only during the period 1838-1845. No record was found of any rept. by the trustees from 1846-1866, though the act of 1846 required an ann. stmt. to be made to the legislature. From 1867-1904, the trustees of the school fund and others constitute the bd. of education. [See above, Education, the serial group.] A statement of the condition of the fund occurs in the treasurer's ann. repts. from 1818 to date.

Growth and composition

In 1817 the following items composed the school fund:

1. 6 per cent U. S. bonds authorized to be purchased by act of Feb. 9, 1816.
2. Dividend on Cumberland Bank stock.
3. Dividends on state stock in "The Newark Turnpike Co."
4. Moneys received from house and lot belonging to the City of Jersey.
5. 1/10 of state tax.

To which were added in 1818:

6. Balance due on old 6 per cent U. S. bonds, etc.
7. 3 per cent stock of the U. S. belonging to the state Feb. 12, 1817.
8. State shares in the Trenton Bank.
9. State shares in the Cumberland Bank, with dividends since Feb. 9, 1816.
10. Moneys received from the foregoing items, future apprns., etc.
11. 1/10 of state tax for 1817.

"This specific appropriation of the tax for [1817] and the apparent intent of the Legislature to enumerate all the items composing the fund, were regarded, by the Trustees, as a repeal of so much of the law of 1817 as related to the state tax, and as precluding them from claiming the tenth part of the taxes raised in succeeding years, unless subsequently granted by the Legislature." In 1824 the Legislature again appropriated the 10th part of the taxes, and it was received in 1825, 1826 and 1827 when the tax on bank stock was substituted in its place.

From 1818 to 1828 the following additions were made to the principal:

1. Sale of the house in the City of Jersey.
2. 20 shares in the Sussex Bank.
3. Donation from Wm. John Bell & Co., June 1, 1822.
4. Bonus under act to establish the People's Bank of Paterson, Dec. 11, 1824.
5. [Bonus] under act to incorporate the Mammoth Bank, passed Dec. 28, 1824.

* Though this was the foundation of the school fund, it was not made applicable to schools until the act of Feb. 12, 1817. This accounts for some authorities giving the date of origin as 1816, others as 1817.

6. Under act of Nov. 22, 1824, authorizing a sale of part of the Government lot in Trenton.
7. Under act of Dec. 28, 1824, for the augmentation of the fund.
1. 1/10 of state tax and tax on Monmouth Bank for 1826.
2. Same for 1827.
3. Same for 1828.
8. Under the act of March 5, 1828 to augment the school fund, act of Dec. 28, 1824 was repealed, and in lieu of the 1/10 state tax, gave all the tax from banking, insurance and other incorporated cos.
In 1839 monies and securities from the state lands at Paterson were added.
No other changes of importance were made in the principal until the act of April 6, 1871 [et seq. . . . . 1903], by which the proceeds of all grants and leases of lands under water are payable into the school fund. The fund is, therefore, a varying quantity. Investment of the moneys belonging to the fund was provided for in the laws of 1846, 1867 and 1903. No provision was made in 1903 for the investment of banking, insurance and other corporation taxes.
The principal sources of the income at present (1910) are:
Interest on bonds,
Rents on riparian leases,
Railroad dividends,
Trenton Banking Company,
Mortgages.

Application
Support of public schools.
Salaries of co. supts. of schools.
Premiums and accrued interest on bonds purchased by the "Trustees for the Support of the Public Schools."

INCIDENTALS

It is impossible to say just what items composed the incidental acct. up to 1865, when itemized stmts. first appeared; the acct. of that date consists of bills of sundry individuals, postage, stationery, minor services of laborers, etc.; beginning with 1866, the nature of the bill is indicated in all cases, e. g.: Jonathan F. Fish, services as appraiser at the asylum; the comptroller in 1877 states that "to this acct. are charged the expenses of the managers and trustees of the several charitable institutions . . . . , the rent of the Vice-Chancellor's Chambers, in Newark, counsel fees and expenses connected with suits at law to which the state is a party, . . care of bldgs. connected with the late Soldiers' Children's Home, and expenditures . . . . not of sufficient importance to warrant the opening of separate accts." The items vary from year to year. In 1904, we find "this acct. includes expenses for freight, expressage, transportation, traveling expenses for the Executive Dept., compilation of laws relating to the treasurer's and comptroller's office, etc."

Oysters

By act of April 4, 1893, the natural oyster beds of the state were divided into 7 districts, and a commissioner appointed for each district. The commissioners were named in sec. 2 of the act; they were to hold office for three years. In 1896 the beds were divided into 6 districts and two or three commissioners appointed for each district for 3 years. In 1898, the Governor was authorized to appoint two residents of the 6th distr. (Del. Bay and Maurice River Cove) to act with the comrs. already appointed. By act of March 21, 1899, the Governor was required to appoint comrs., the number for each district being designated by law. No statement as to requirement

1818-1822; 1845-1849; 1865-1869.

1860. Shad and other fishing and navigation at Communipaw Bay injured by deposits from slips and outlet sewers of New York; measures taken to prevent such encroachments; necessity of legislation to provide agst. such violation of riparian rights. (Govs. mess. (Newell) Jan. 11, 1860.)

1871. See above, Fish and Game. New Jersey, this date.

1873. Apprn. by N. J. legisl. for propagation of shad in Delaware River on condition of equal apprn. by Penn.; condition not fulfilled. (Govs. mess. (Parker) Jan. 14, 1873: 26.)

——. See above, Fish and Game. New Jersey, this date.

——. Rept. of fish wardens of different cos. rel. to catch of shad. (4 A.R. comrs. of fisheries 1873: 4-8.)
Burlington, Camden, Gloucester, Salem, Cumberland.

1874. Establishment of camp for purpose of hatching shad and their deposit in Delaware River. (Govs. mess. (Parker) Jan. 13, 1874.)

——. Repts. of wardens of the five counties bordering upon tidal portion of the Del. River, show that shad have been not only more numerous but of larger growth; this is legitimate result of removal of destructive weirs and fish baskets in upper part of river. (5 A.R. comrs. of fisheries 1874: 8.)

——. Non-tidal department; rept. of fishermen that take of shad is larger and finer than for many years. (5 *same* 1874: 11.)

——. Marked and gratifying feature of past season, was the increased average weight of shad, ascribed by intelligent fishermen to better observance of fishing law the past three seasons. (5 *same* 1874: 4.)

——. Shad fishermen of upper Delaware urge that proper close time be observed from South Jersey all way up; that laws and regulations be formed to prevent destruction of small male shad in early part of season, that laws for abolition of fish baskets and other devices which effect whole destruction of young shad, be enforced, and if possible the artificial propagation of shad be carried on as in New England Rivers. (5 *same* 1874: 12-13.)

1874. See above, Fishways this date.

1875. See above, Fish and Game, New Jersey, this date.

——. On artificial propagation of shad in Delaware River. (6 A.R. comrs. of fisheries 1875: 16-23.)

——. Apprn. of $10,000 needed to continue efforts to stock inland waters; also apprn. of $500 to enable state to continue with Penn. in work of artificial propagation of shad. (6 *same* 1875: 27.)

1877. See above, Fishways, this date.

——. Legislation asked providing agst. destruction of young shad by dams of Trenton Water Power Co. and Delaware and Raritan Canal Co. (8 A.R. comrs. of fisheries 1877: 43.)

——. Respecting shad hatching operations on the Delaware River; record of operations for year 1877, conducted by A. A. Anderson on acct. of state. (8 *same* 1877: 33-39.)

1878. Advisability of efforts to improve shad fisheries by artificial propagation; further legislation as to size of mesh used in shad fishing recommended. (9 *same* 1878: 14.)

——. Kinds of fish which have been propagated and distributed and operations of comn. in connection therewith; shad; salmon; black bass; land-locked salmon; brook trout; smelt; white fish; sturgeon; herring. (*Same* 1878: 11-30.)

——. Production of shad fisheries in Delaware River has steadily declined for years past; the increase in population and extension of r.r. facilities through which the market was enlarged has led to excessive fishing and consequent decline of fisheries. (*Same* 1878: 12-13.)

——. Violations of law; wardens report an increasing respect for protectory laws and constant decrease in their violation; in some cases a disposition has been shown to resist efforts of officers to enforce law as to close time in shad fishing. (*Same* 1878: 30-32.)

1880. See above, Fish and Game, New Jersey, this date.

1883. Extracts from repts. of wardens serving to convey idea of no. of shad taken during season. (Rept. comrs. of fisheries 1879/83: 26-28.)

——. Violations of the law; the most important violation with which comrs. have had to deal consists of practice of building rocks or "fish-baskets," which are erected to catch eels and rock fish; these rocks extend over whole width of river and destroy many young shad. (*Same* 1879/83: 18-19.)

——. Shad fisheries; much attention has been given to enforcement of law rel. to close time, as affecting shad fisheries on Delaware River below Trenton. (*Same* 1879/83: 4-8.)

1885. Shad fisheries: policing and restocking of waters of the Delaware and tributaries beneficial; extension of close period to midnight on Monday recommended; injury to shad fishing of the Passaic owing to river pollution; large catch in Newark Bay; improvement in Hackensack River fishing; do. in Raritan; shad catch in 1884 and 1885; controversy with Delaware; establishment of shad hatchery at Lower Black's Eddy on Delaware River June 1, 1885; result. 1885. See above, Salmon, this date.
——. Brook trout: distribution during 1884 and 1885 inconsiderable; satisfactory results from former distributions; constant applications for stocking of streams with this fish; question advisability of expending public money; if public streams were as well policed as private, artificial propagation would be unnecessary. (Rept. of fish comrs. 1884/5: 21.)
1895. See above, Fish and Game, New Jersey, this date.
1896. See same, this date.
——. Table: details of distribution of trout in waters of N. J. (A.R. fish and game comrs. 1896: 8-9.)
