10 m^{ts}

Sum
Total 10 m^{ts} & to

The Haycock
Don't For

It is a very fine
copy of the

Then & by my my my my.

Will take out the lead and the charge mounting & by my my my.

And so sent in charge. & by my my my.

And thereto the copper and the nails that must serve to round the plate & by my my my.

And more thereto the copper & the nails that must serve to round the charge & by my my my.

It is for the mounting & by my my my.

And so this charge apart
less than the rounding of lead
Will be & by my my my.

And if the lead of the charge
be sold forward this charge
suppose will amount & by my my my.

Then so much will be added of the
charge of the said & by my my my.

There is to be doubted the speedie provision of copper
And the speedie of their workmanship

And in the workmanship by the inglist there is no doubt.
And therefore I think best the speedie & speedie waie be taken
for so shall the said be had that is intended

of 18 minutes more to be left
to the 6 rods to the right
of the paper is in the middle.
