

DAIRY PRODUCTS BUILD SUPERIOR PEOPLE

"A MOTHER'S VISION OF THE OPPORTUNITIES FOR HER SONS MADE POSSIBLE BY WISE NUTRITION AND RESULTING GOOD HEALTH."

The farmer typifies energy; the athlete, endurance; the industrial worker, strength; the architect, inspiration; the executive, leadership; the scientist vision.

Contributions of science to an improved dairy industry through breeding, bacteriology, mechanics and invention.

The respective panels present: The introduction of mechanical milking and the improvement in cattle breeding: The introduction of laboratory tests; Modern milk bottling and handling machinery supplant the old can and dipper: Introduction of milk concentration by evaporation and the superseding of farm home cheese making by factory methods: The old home churn of time immemorial replaced by factory power butter making equipment: The hand freezer and natural ice replaced by mechanical refrigeration; and finally, modern methods of dairy products distribution.

DAIRY PRODUCTS BUILD SUPERIOR PEOPLE

FOREWORD

The Dairy Industry has presented at A Century of Progress Exposition the story of how "Dairy Products Build Superior People."

The following pages are actual photographs of the exhibits which tell that story.

The Organization Committee of the Century Dairy Exhibit deemed it advantageous to the Industry to confine the Exhibit to a presentation of the vital importance, to the consumer, of an adequate consumption of milk, butter, cheese and ice cream.

The Industry is indebted to the nearly 1800 firms, Associations and individuals whose interest and support has made the Exhibit possible, and also to the group of individuals whose generous contribution of their thought and time to the management and development of the plans embodied in the completed exhibit. Also, acknowledgment is due the Press for its generous publicizing of the Exhibit.

The Dairy Industry is one of the few industries which buried its competitive jealousies and succeeded in presenting at the Century of Progress Exposition collectively supported industry Exhibit. The only food industry which has a specially designed and exclusive building.

Respectfully submitted on behalf of the Directors, Executive and Plans Committees.

HElaw Morman President

A Century of Progress September 15, 1933

> Century Dairy Exhibit, Inc. 111 N. Canal Street Chicago, Illinois

DAIRY PRODUCTS ARE AN ESSENTIAL PART OF AN ADEQUATE DIET FOR ALL AGES

Louis Pasteur 1822-1895

The Dairy Industry acknowledges its debt of gratitude to the French scientist on whose discoveries are based the modern practices of pasteurization. S. M. Babcock 1843-1931

To this American scientist the Dairy Industry is indebted for the perfection of a simple test for determining the richness of milk

The feminine beauty of litheness of body, smoothness of skin, strength and whiteness of teeth, beauty of eyes, keenness of spirit, inevitably reflects a successful choice of foods.

The athlete personifies the physical perfection which can result only from the wise choice of foods. During the International Olympic Games the actual consumption of dairy products was from one and a half to twenty times as much as the average U. S. citizen uses—a good argument for their generous use.

PHYSICAL PERFECTION

THE LIBERAL USE OF DAIRY PRODUCTS
CONTRIBUTE TO PERSONAL CHARM AND BEAUTY.

FAMILY OF FIVE FOR ONE WEEK

LIBERAL DIET		LOW COST DIET
24½ qts.	Milk	14 qts.
3 tall cans	Evaporated Milk	7 tall cans
- 1	Dry Skim Milk	1 lb.
1 pt.	Cream (single)	- / - / - / - / - / - / - / - / - / - /
$1\frac{3}{4}$ 1b.	Butter	1 lb.
½ lb.	Cheese	1 lb.
2 qts.	Ice Cream	-

The Low Cost Diet and the Liberal Diet each furnish the essential requirements for a family of five for one week. As the fund available for food is reduced the proportion of that fund spent for dairy products should be increased because they furnish more of the essentials in proportion to cost than other sources of these essentials. Exhibit Contributed by U.S. Department of Agriculture.

Each dot represents the production of a billion and a half gallons of milk. The lantern slides present each state's utilization for butter, cheese, ice cream, evaporated milk or fluid milk. Courtesy U.S. Department of Agriculture.

The U.S. leads the world in sanitary quality of milk supplied its people. Secured through education, self-inspection by the industry, and supervision by regulatory officials.

By modern breeding, selection and feeding methods the improved dairy cow of today produces enough milk--730 quarts--to feed her own calf six months and also supply 2807 quarts additional, sufficient to feed two families of ten persons for a year. Her early ancestor produced barely enough to feed her own calf. Courtesy U. S. Department of Agriculture.

CLAVILUX PERFORMANCE

These photos of man's dependence on his cow are taken from the Giant Murals by Thomas Wilfred; presented on the ninety foot Cyclorama by the Clavilux — color organ, with the accompaniment of music and the spoken story. Pictures and words cannot suggest the beauty and impressiveness of the symphony of color in harmony and motion as presented by the Clavilux.

MUSIC - "Mireille" by Gounod.

Five thousand years ago - History begins - Primitive Man worships the Cow as one of his protective Gods. The Night Sky is a pasture Land for Herds of friendly

Cows. Across the Sky he sees a great stream of heavenly Milk - and calls it the Milky Way.

Dawn of Civilization! Caveman becomes a Herdsman! Together Man and the Cow begin their long and friendly voyage up thru the Ages - up thru the Epoc making History of the World.

Centuries roll by! The Cow, once held sacred, now becomes THE FOSTER MOTH-ER OF MAN. Her Life sustaining Foods - MILK, BUTTER and CHEESE bring HEALTH and THANKSGIVING to PLYMOUTH COLONY. (MUSIC changes to PLYMOUTH HO by Ansell). It is the spring of sixteen-twenty-four!. The good ship CHARITY brings to PLYMOUTH a precious cargo

Three Heifers and a Bull, the first Cattle of that kind in the colony. Again Man and the Cow continue their friendly voyage together as a new and powerful Nation takes form.

WESTWARD HO! One Hundred years ago! The History of America is a History of Trail-makers. The pioneer remembers the privations of Plymouth Colony and behind

the Covered Wagon follows the faithful Milch Cow, a source of Life to the Infant - an essential part of the family food supply. Again History repeats! Man and his Cow, in friendly part-

nership, marching step by step as Civilization conquers the wild West. (MUSIC - "Deer Dance" by Skilton).

Thruout America today the path of the Cow reaches from the ATLANTIC to the PACIFIC. She is the foundation of a Great Industry, which reaches FROM THE FARM with Healthy, Clean Cows.

Healthy, Clean Workers, Sanitary Utensils and Immediate Refrigeration. - ALL FOR YOUR PROTECTION TO YOUR TABLE! MILK, BUTTER, ICE CREAM, CHEESE - Products of a Giant Industry. - Products for HEALTH - VITALITY - STRENGTH! (The MUSIC has been "Le Retour" by Bizet).

GONG - - - - A CENTURY OF PROGRESS! (Fanfare)
GONG - - - - PROGRESS IN HEALTH! (Fanfare)
GONG - - - - PROGRESS TOWARD THE GOAL OF
PHYSICAL PERFECTION (MUSIC)

Thru the Wise and Liberal use of MILK, BUTTER, ICE CREAM and CHEESE the Magic FOUNTAIN OF YOUTH BECOMES A REALITY! Children grow straighter and stronger; Men and Women find Joy in Long Life, Beauty and Vigorous Health. With all the marvels of Discovery and Invention, Science proves the Value of the AGE OLD TRUTH - DAIRY PRODUCTS BUILD SUPERIOR PEOPLE! (Music from Fanfare; SIGURD JORSALFAR by Grieg).

DAIRY PRODUCTS BUILD SUPERIOR PEOPLE -- THE HEALTH OF THE FAMILY, YOUNG AND OLD, RESTS ON A FOUNDATION OF THE WISE USE OF DAIRY PRODUCTS.

Good market milk involves much human labor, modern machinery and laboratory care in the handling and distribution.

The people who have achieved,

who have become large, strong, vigorous people,

who have reduced their infant mortality,

who have the best trades in the world,

who have an appreciation for art, literature, and music,

who are progressive in science, and in every activity of the human

Are the people who have used liberal amounts of milk and its products.

DR. E. V. McCollum, Johns Hopkins University. MILESTONES OF PROGRESS

1841 - The first milk arrives by train in

New York City.

1889 - The present type of milk bottle, using fiber cap, is patented.

1901 - The automatic bottle filler and capper

1901 - The automatic bottle filler and capper is marketed.

1906 - The glass-lined insulated metal tank on cars for milk transportation is developed.

1906 - Tubular cooler and regenerative pasteurizer, pocket holder, is invented.

1907 - The announcement that pasteurization kills practically all pathogenic germs in milk is made.

1908 - The International Association of Milk Dealers is organized.

Dealers is organized.

1911 - The first rotary milk bottle filler and capper is perfected.

1916 - Milk bottle washers of soaker type came into use.

1932 - Methods for increasing Vitamin D content of milk made practical.

Milk is pasteurized at 143° F.

Milk is boiled at 212° F.

EVOLUTION OF MILK BOTTLE

MILESTONES OF PROGRESS

1777 - The first ice cream advertisement

appears in the New York Gazette.
1811 - Dolly Madison serves ice cream at a White House party.

1851 - The wholesale production of ice cream begins in Baltimore.

1876 - The ice cream soda is introduced at the Centennial Exposition.

1892 - Pennsylvania State College establishes first course in ice cream making.

1902 - The horizontal circulating brine freezer is invented.

1904 - With the St. Louis World's Fair comes the first ice cream cone.

1906 - The International Association of Ice Cream Manufacturers is organized.

1920 - The ice cream packaging machine appears.

1925 - Solid C.O., facilitates ice cream delivery.

"The frozen dish should be regarded chiefly as another means of making milk acceptable in the dietary by a simple change in its form." DR. MARY S. Rose, Teachers College, Columbia University, Feeding the Family.

MILESTONES OF PROGRESS

1855 - The first commercial drying pro-cess is invented. 1883 - The manufacture of malted milk begins

1901 - The dough-drying process appears. 1801 - The belt-drying system is created. 1902 - Film drying on a hot drum is originated.

1903 - Film drying on a not drum in vacuum is
devaloped.

1906 - The Spray method of drying milk is introduced.

1925 - The American Dry Milk Institute is organized.

1929 - Grades for dry skim milk are established.

333 - The method developes for testing percentage of solids used.

The commonly available cheese is of more than 300 varieties. Through recent developments most of these varieties are available in small, convenient and sanitary packages.

MILESTONES OF PROGRESS

1841 - The first cheese factory in America is built

1855 - Limburger and Swiss cheese manufacture starts in the United States.

1867 - The cheddar system for making American cheese is introduced.

1873 - The manufacture of Camembert begins.

1891 - The manufacture of Liederkranz is in-

itiated. 1895 - The bacterium lactis culture of cheddar cheese making appears.

1903 - The automatic cheese pressure press is invented. 1910 - Swiss cheese manufacturers use bulgaricus

culture regularly. 1916 - The method for pasteurized blended loaf

cheese is developed.

1923 - Present type of Camembert is introduced.

Butter adds quality and flavor - supplies Vitamin A as well as needed fat - easily assimilated.

Two-thirds of the food solids of milk are in the part below the cream line. By the drying process these solids are conserved and made more widely available for human food.

MILESTONES OF PROGRESS

1810 - Nicholas Appert of France discovers a method of preserving milk by heating and sealing.

1834 - First use of vacuum pan to remove water from milk.

1884 - The sterilizer is invented, making possible unswestened evaporated milk.

1885 - Dairy farmers organize the first evaporated milk company.

1911 - Homogenization of evaporated milk begins.

1914 - 18 Evaporated milk packers meet huge, World War demand. 1920 - Economical packing and distribution per-fected.

rected. 1923 - The Evaporated Milk Association is organ-

ized. 1933 - The milk of 800,000 cows is required daily.

Concentration makes convenient and economical conservation and transportation of milk.

HEALTH EDUCATION

An exhibit of typical material available to the teaching, medical and dental professions, health workers and dairy industry leaders. It presents the rapidly accumulating wealth of scientific facts which show the necessity and importance of an adequate use of dairy products in the family diet.

Up to September 1st, 14,000 teachers and other interested leaders from every state in the union and six foreign countries have seen the exhibit and made written requests for material to use in their work.

Foreign posters indicate organized educational work in England, Austria, Germany, Sweden, Czecho-Slovakia, more or less stimulated by and patterned after American leadership in this work.

1800 COMPANIES, ASSOCIATIONS AND INDIVIDUALS, HAVE MADE THIS EXHIBIT POSSIBLE
