**Compliments of
The National Cash Register Company
Dayton, Ohio**

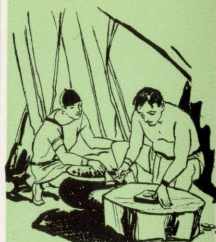

THE ORIGIN OF COINS

It is generally agreed that the first silver and gold coins were made about 900 years before the Christian Era. The credit of inventing money, which could be simply counted and not weighed, has been claimed in Europe for the inhabitants of the Island of Aegina, off the coast of Greece. In Asia, the credit is claimed for the Lydians, a people of Asia Minor.

These early coins were of crude workmanship, being little more than pieces of silver or gold of a certain weight driven by a strong punch or hammer into a mold or die so that on one side was the design and on the other the indent of the punch.

These crude coins established a more convenient medium of exchange which was to become the money of civilization.

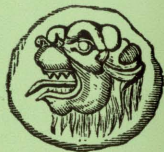

Wherever money is now handled and records kept in the civilized world, you will find National Cash Registers recording and protecting business transactions.

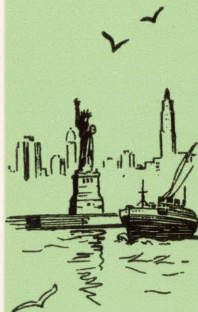

The first mint

Silver Drachm of Aegina 860 B. C.

Gold Stater of Miletus 800 B. C.

UNITED STATES

Republic. Land and water area, 3,026,789 square miles. Population, 1930, 122,775,046. Capital, Washington, with about 486,869 people.

Chief Products: Coal, oil, timber, precious metals, grain, cereals, vegetables, tobacco, rice, cotton, fruits, hay, wool, meats.

Main Industries: Agriculture, mining, manufacturing, forestry, etc.

**A few of the 500 different types of
National Cash Registers and National
Accounting Machines.**

Visitors are always welcome at the main factory and executive offices of The National Cash Register Company, in Dayton, Ohio.

Our factory occupies twenty-four modern buildings. It is devoted entirely to the building of National Cash Registers and National Accounting Machines. There are a number of unusual things to be seen. Regular trips through the factory and an illustrated lecture are provided.

Dayton itself is a city of great interest for the visitor. It is the birthplace and home of the airplane and is the location of two Government Air Fields. It is easily accessible over perfect motor roads or by rail, interurban or air service.
