In 1930 The Cooperative Society in Stockholm arranged a competition, which aroused great interest. The aim was to get good designs for inexpensive table services, household glass and decorative pieces blown or moulded in soda and crystall glass.

This glass is produced by Målerås Glass Works, Målerås, from the designs and under the control of the Cooperative Society. This glass is sold by orders from Kooperativa Förbundet, Specialavdelningarna, Stockholm.

Exhibits: Services and decorative pieces in soda and crystall glass.
