

HALL OF SCIENCE

SEE
THE EXHIBITS OF
**UNION CARBIDE AND
CARBON CORPORATION**

*Hall of Science, A Century of Progress
Chicago-1934*

UCC

AGAIN this year Union Carbide and Carbon Corporation will be represented at A Century of Progress in Chicago, May 26 to November 1. We take this opportunity to extend to you a most cordial invitation to inspect our exhibits when you visit A Century of Progress.

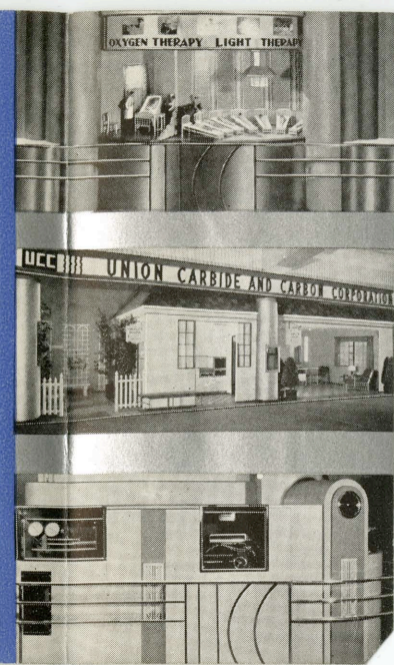

This display of Union Carbide and Carbon Corporation products and processes, which entertained and instructed over twelve million visitors last year, will be even more attractive and informative this year.

As a user of products made by a unit of Union Carbide

and Carbon Corporation, you will find many things of special interest to you in our exhibit. There you will see: spectacular demonstrations of oxy-acetylene welding and cutting; miracles wrought by the use of alloy steels; special alloys that resist wear, heat and corrosion; an astounding variety of synthetic chemical products; the latest developments in Eveready flashlights, batteries, anti-freeze solutions, carbon arc applications, and fascinating experiments with liquid air.

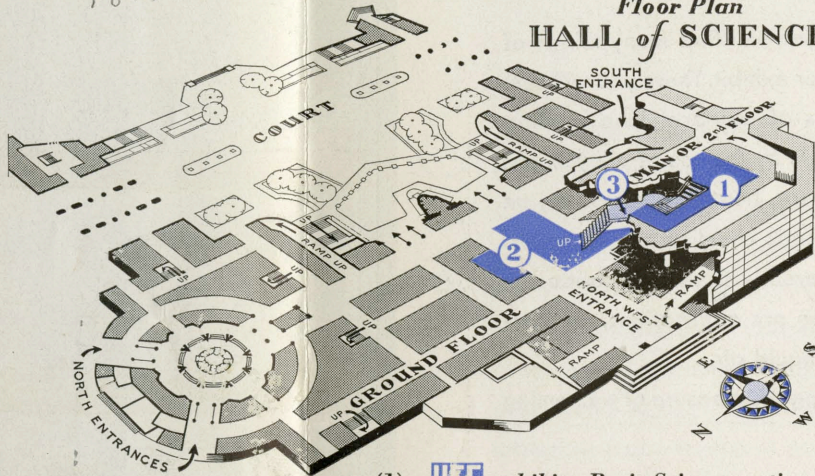

We look forward to having the pleasure of welcoming you at Chicago.
