**CONSTRUCT THIS TRAILER**

THE trailer you have just seen, a real "home on wheels," was constructed in a home workshop. It is a real job, requiring only the experience which the average homecraftsman possesses.

Plans for this trailer may be found in the March-April, 1934 issue of **POPULAR HOMECRAFT** Magazine in the **Home Workshop** just across the aisle. Blue prints and directions for making the trailer are also available.

Construct a trailer next winter; become one of the many homecraftsmen who "hit the trails" in a trailer built in a home workshop.

## FOLLOW A HOBBY

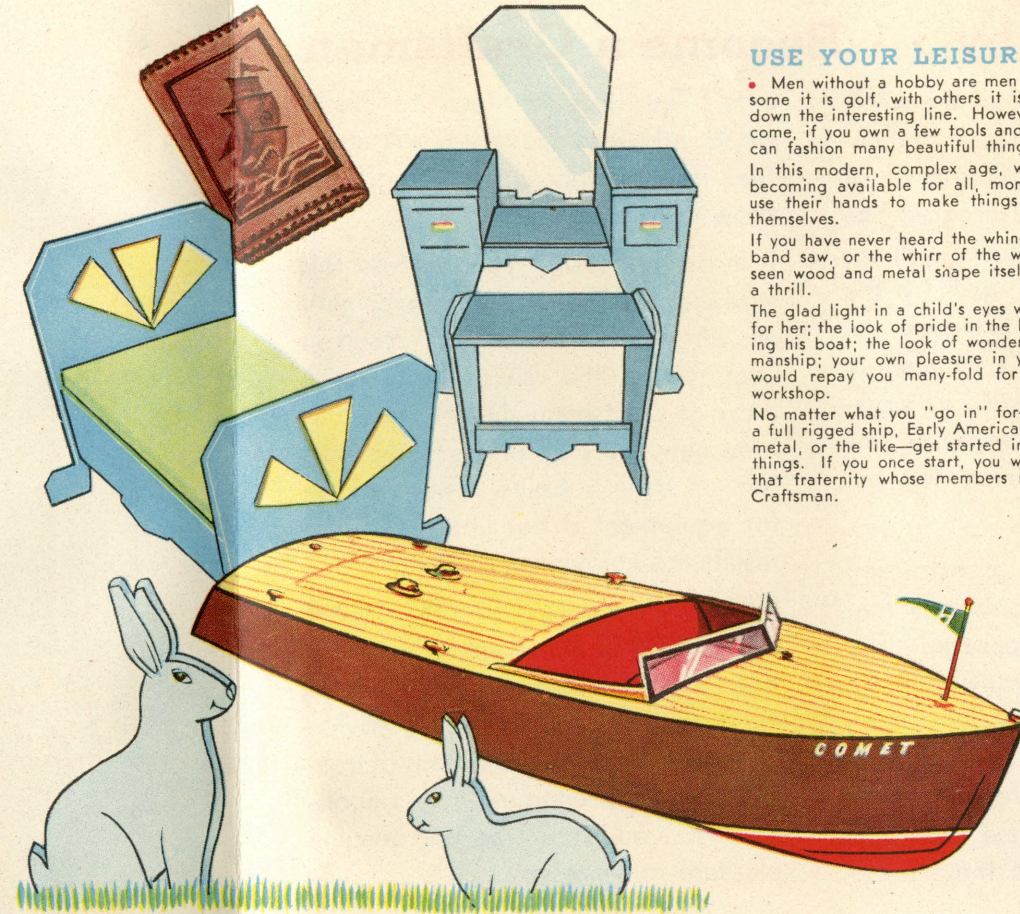

• The fashioning of things by hand dates back to prehistoric times. Primitive man fashioned things of use and beauty to serve his own needs and duties. Crude as they may have been, they found favor with him.

There is something intangible about the making of an article yourself, which, perforce, enhances its value. No matter whether that object is a simple thing or a creation of complexity and beauty, it has a far greater value to the maker than an identical one purchased from store or manufacturer.

The home workshop you have seen in operation was planned and executed by those whose names appear upon the brochure. The sole purpose was to demonstrate how simple it is today to fashion almost anything from wood, metal, leather and other products utilized in the Arts and Crafts.

Today, the price range of electrically driven tools is within the monetary reach of all. You may purchase the units separately as you need them. Small hand tools, also, cost little, even for the finer grades. Why not start a shop of your own? You are bound to derive great pleasure in following a hobby—your hobby.

Do not worry about your technique; about your ability to handle tools. You'll acquire that quickly. Your next door neighbor may be a craftsman who will take pleasure and pride in helping you on any operation which seems doubtful or difficult.

### USE YOUR LEISURE TIME PROFITABLY

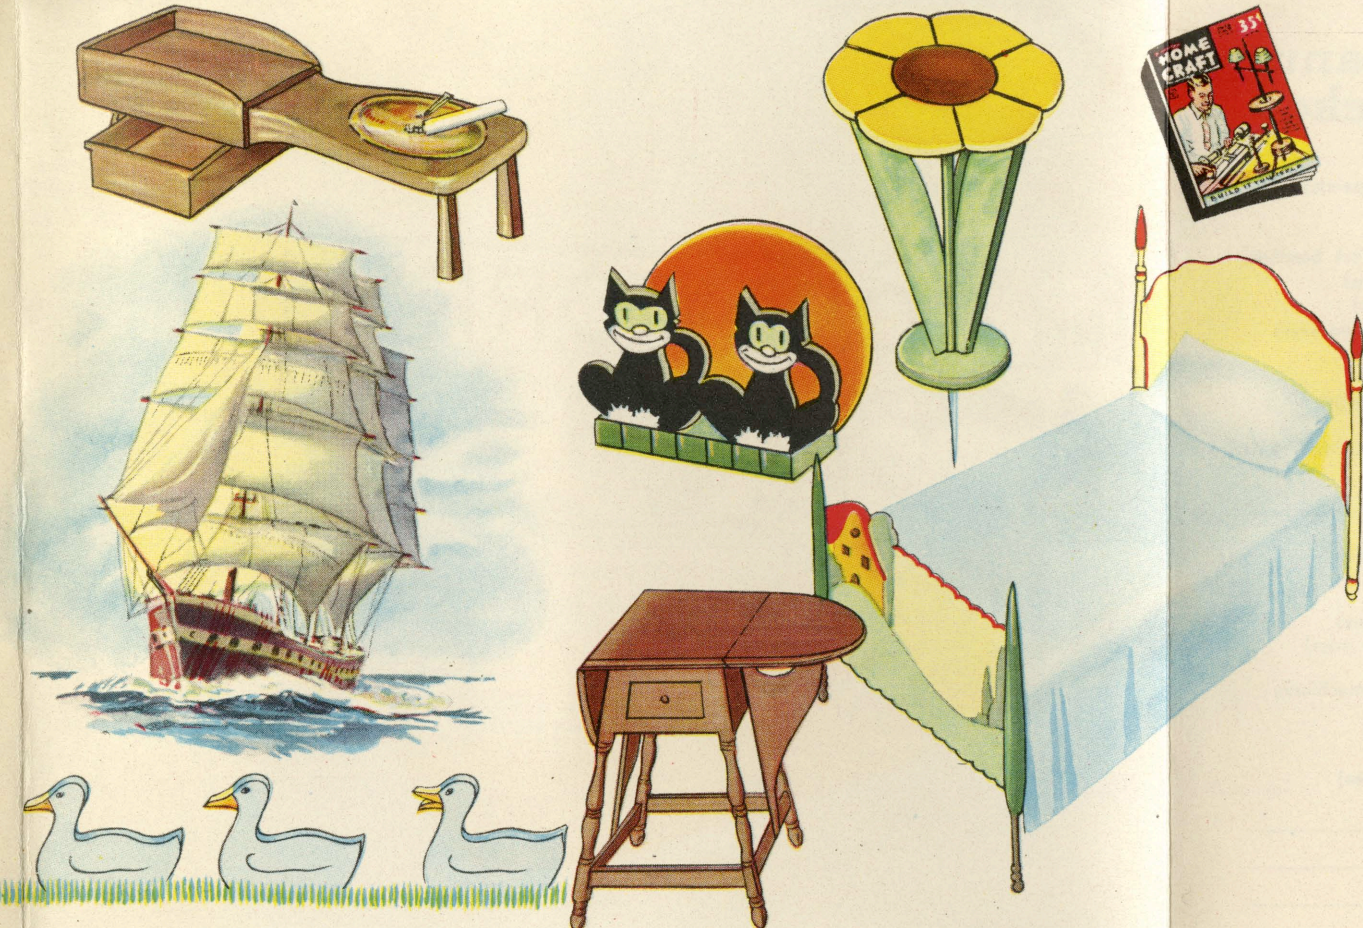

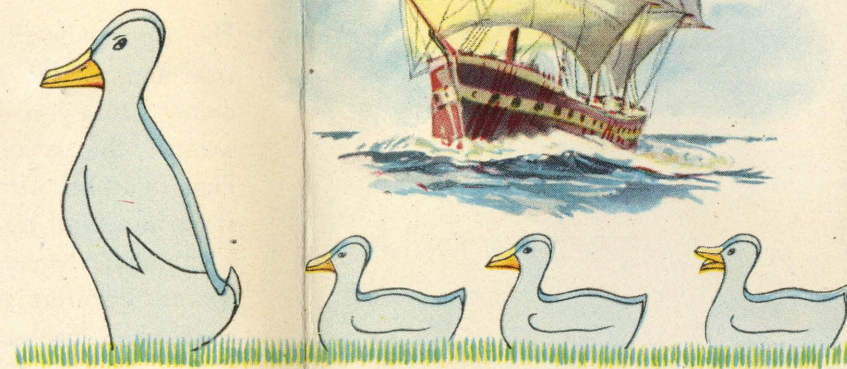

• Men without a hobby are men without adequate perspective. With some it is golf, with others it is fishing, others boating, and so on down the interesting line. However, when the long cold winter nights come, if you own a few tools and have working plans before you, you can fashion many beautiful things from craftsmen materials.

In this modern, complex age, with extending hours of leisure time becoming available for all, more and more people are learning to use their hands to make things for the home, for friends and for themselves.

If you have never heard the whine of the circular saw, the buzz of the band saw, or the whirr of the wood lathe; if you have not felt and seen wood and metal shape itself under your hands; you have missed a thrill.

The glad light in a child's eyes who received the doll house you built for her; the look of pride in the boy's face whom you assisted in making his boat; the look of wonder on your friend's face at your workmanship; your own pleasure in your own handiwork; all these thrills would repay you many-fold for the small cost of a modern home workshop.

No matter what you "go in" for—building a scale model locomotive, a full rigged ship, Early American reproductions, toys or novelties, art metal, or the like—get started in this fascinating pastime of building things. If you once start, you will become a permanent member of that fraternity whose members run into many thousands—the Home Craftsman.

## Leading Craftsman Magazine

• **POPULAR HOMECRAFT** Magazine, with the cooperation of the manufacturers whose names appear on the reverse side of this sheet, was responsible for the creation, maintenance and operation of this Home Workshop at A Century of Progress, 1934, Chicago.

**POPULAR HOMECRAFT** is published every two months and is the Bible of the Craftsmen. It is a big 100-page magazine filled from cover to cover with good, practical, usable information on what to construct and how to proceed in construction. Every issue is a craftsman's encyclopedia. Very profusely illustrated with photographs and large scale working drawings; written so you can easily follow and build any article that pleases you. It is the largest and oldest magazine devoting its entire editorial to the craftsman. It covers the use and care of both electrically driven and hand tools. We know you will be delighted with **POPULAR HOMECRAFT**.

So that you may know this practical magazine, we offer to those of you who have been through the Home Workshop a trial subscription—Six months for only One Dollar. Print your name in the space below, pin a Dollar Bill on this slip, mail it to us, and we will do the rest. Your money cheerfully refunded if the magazine does not please you. Single copy 35c—U. S. stamps or coin.

### POPULAR HOMECRAFT

737 North Michigan Avenue • • • CHICAGO, ILL.

## Please send me literature from the manufacturers whose names I have checked

- **ADEPT TOOL CO.** (Model Makers' Lathe)
- **ADJUSTABLE CLAMP CO.**  
(Glue clamps and gluing equipment)
- **AMERICAN SCREW COMPANY** (Screws)
- **ARMSTRONG BROS. TOOL CO.**  
(Tool holders, machinists' tools)
- **ATLAS PRESS COMPANY** (Metal cutting lathe)
- **BEHR-MANNING CORPORATION**  
(Grinding wheels, sandpaper, oilstones)
- **W. R. BROWN CO.** (Paint spraying equipment)
- **BUCK BROTHERS**  
(Woodturning and carving chisels)
- **COLUMBIAN VISE & MFG. CO.** (Vises)
- **CRAFTSMAN WOOD SERVICE CO.**  
(Wood shop supplies)
- **CRESCENT TOOL CO.**  
(Pliers, wrenches, tinners' snips, small hand tools)
- **HENRY DISSTON & SONS CO.** (Saws)
- **DUMORE COMPANY**  
(Electrically driven grinders and flexible shafts)
- **A. J. FISHER** (Ship model supplies)
- **GARDINER METAL CO.** (Solder)
- **GREENFIELD TAP & DIE CORP.**  
(Taps, dies, screw plates, twist drills, reamers and screw extractors)
- **KEYSTONE GLUE COMPANY** (Glue)  
(3-in-1 oil used exclusively)
- **LOWE BROTHERS COMPANY**  
(Enamels, lacquers, varnishes and paints)
- **MINIATURE LOCOMOTIVE CO.**  
(Miniature locomotives)
- **NEW BRITAIN MACHINE CO.** (Work benches)
- **NICHOLSON FILE COMPANY** (Files)
- **PARTINGTON, INC.** (Surface planer)
- **FAYETTE R. PLUMB CO.** (Hammers and axes)
- **PORTER-CABLE MACHINE CO.**  
(Portable sanding equipment)
- **RUSSELL JENNINGS MFG. CO.** (Auger bits)
- **SAVOGRAN CO.**  
(Crack filler, remover and bleacher, heavy duty cleaner)
- **STANLEY ELECTRIC TOOL CO.**  
(Routers, shapers, drills, electrically driven tools)
- **STANLEY RULE & LEVEL PLANT**  
(Rules, levels, planes, small hand tools)
- **U. S. HAME CO.** (Pipe wrenches)
- **VOIT & GEIGER, INC.**  
(Old and new violin makers' supplies)
- **VULCAN ELECTRIC CO.** (Soldering irons)
- **WALKER-TURNER CO., INC.**  
(Electrically driven woodworking machinery and equipment)
- **WATSON MFG. CO.** (Lathe chucks)
- **H. L. WILD** (Crafts supplies)
- **WILDER & CO.** (Leathercraft supplies)

## Have a Hobby . . . Become a Craftsman

• The purpose and aim of the workshop you have just seen is to demonstrate to you and the thousands of visitors to A Century of Progress the machinery, tools, equipment and accessories that may be used by the home craftsman. You may be impressed with the artistic manner in which we have presented this working shop to you. Here are a few pertinent facts concerning the exhibit.

The entire booth was constructed with the aid of the tools and machines displayed and operated. The wood is the nationally known Shevlin Pine, finished with a special ageing stain furnished by the Colonial Stain Company. Many interesting living rooms, libraries and fine dwellings have been finished with these prod-

ucts. The floor is Masonite Presdwood, and we believe you will agree that it is artistic and pleasing. We know that it is durable.

It is our hope that your visit to this workshop, where tools and machinery are ably demonstrated, will result in your joining the ranks of the large army of craftsmen who are devoting their new hours of leisure in the pursuit of their hobbies. The expense for equipment is not large; the end results are enjoyment and profit.

We invite you to write **POPULAR HOMECRAFT** magazine for information on tools, machines and equipment. Also feel free to ask our advice on any craft where the details of construction or procedure may be obscure to you. It will be our genuine pleasure to serve you.
