

Examination by
Morton M. Chaffin.

2 Were you ever an employee
of the prison and in what
capacity?
2 I was employed here as
hospital steward.
2 Up to what time, or how
long?
2 Well, from the first day
of August 1870. I was
the physician and two months
2 You had charge of the
hospital under the direction
of the physician?
2 Yes sir.
2 Who was the physician of
the prison from May 1872
up to this time, if you
know?
2 I think Dr. Davis took charge
at that time. I cannot be
exact about that time, but
it was somewhere about
that time.

2 Has he been in charge ever since?

yes Sir, to the time I left.

2 Do you remember whether Mr. J. V. Park was night keeper of the hospital during any portion of your service as hospital steward?

A I think he was. I couldn't say positively but I know he has been on duty in the hospital, but I couldn't say whether he was appointed there night guard there or not.

2 You have heard the testimony of Mr. Park. I will ask you to state what you know about the matter concerning which he testifies.

A Well, his memory is a great deal better than mine in regard to the man John Crozier, at the time he was in the hospital. I remember the time he was in there

the time he was in there
in the hospital. I remember
Casper, at the time he was
regarding the moon from
that better than mine in
a hole, his memory is right
concerning which he testified.
I know about the matter as
you to state what you
of Mr. Park. I will ask
you have heard the testimony
there or not.

points there night guard
any whether he was off
the hospital, but I cannot
he has been on duty in
any positively but I know
I think he was. I cannot
remember a hospital there
any any portion of your
keeper of the hospital the
Mr. Park was right
also you remember whether
yes Sir, at the time of left
ever since?

I think he been in charge

and I think the man was insane, at least he proved to be after that.

He was very noisy and he went from bed to bed, just as has been stated, and the patients were disturbed. I think there was quite a number of sick, I don't remember how many in the hospital at the time. I think that I put the handcuffs on each side of the bed just to keep them in bed.

Q You handcuffed him to the iron bedstead?

A Yes Sir, I handcuffed him to the iron bedstead to hold him in, but further than that I don't think that he had any punishment at all, if you might call that punishment.

Q Did you ever order Park to strike a man with a slipper, or strap, or whip?

A I couldn't order Mr. Park

and I think the woman
was wrong, at least he
proves her of it that.

The woman was very much
in the wrong but I don't want to say that
the patient was dishonest.
I think there was quite a
number of such, about
remember how many in
the hospital at the time.
I think that about the
hardships on each side
of the last steps
there in her.

2 You hardships in the
time between?
Yes Sir, hardships in
the time between to her
him in, but further than
that I don't think that he
has any punishment at all
if you might call that
punishment.

2 This you even order Park
to strike a woman with a
whip, or whip, or whip?
I don't know what Mr. Park

to do anything of the kind, because I had no right to give any such order?

Commissioner A. M. Jones - Well, did you?

a No Sir.

2 Was it done in your presence?

a No Sir, I didn't see any such thing as that.

Pranger M. Claughey - Did Dr. Herie by your knowledge ever give any such orders?

a No Sir, he never gave any such orders to me.

2 Did Dr. Herie ever give orders to any hospital keeper to spank or strike with a slipper any convict?

a No Sir.

2 Under any circumstances?

a No Sir. This thing about strapping has been talked over many times in the hospital about doing men

Is anything of the
kind, because there's
right to give any order
order?

Commissioner A. M. Jones - Well, his

you?
A. M. Jones
I don't have in your
power?

A. M. Jones, I don't see any
such thing as that.

Order the hospital - this is the
by the knowledge even give
any order order?

A. M. Jones, he never gave any
such order before.

Is it so. There's even give order
to any hospital before to
spoke or spoke with a
alright any answer?

A. M. Jones.
Under any circumstances?
A. M. Jones. This thing about

stopping has been talked
over many times in the
hospital about doing even

good to whip them, and I think there is a good many men here it would do them good to whip them, but it is against the law, and of course we can't do it, and it is the same remark that the deputy warden and Dr. Stensie and warden McLaughery have made that it could not be permitted.

J. H. McBride,
being recalled, testified as follows:

Examination by
Commissioner A. M. Jones.

2 Do you wish to be understood by the Board of Commissioners that this particular gang which you described in your testimony this morning was made before or after

good to keep them, and
I think there is a good
many men here it would
be their good to keep
them, but it is against
the law, and of course
we can't do it, and it
is the same reason that
the Deputy Marshal and the
Marshal and the other
blacks have made that
it can't be kept.

W. H. Miller
being really, but this is a

Commissioner of
Prison

Also you will be under-
stand by the Board of Com-
missioners that this particular
report which you described
in your testimony the morning
was made before or after

death? State fully your opinion as to the time it was made?

A Well, Gentlemen, as I said in my after statement, I did not make as thorough an ~~investigation~~ examination as Dr. Dongall, for I left that matter with him. The labor was divided. I left that especially to him, but it was my opinion then, and it is my opinion still that that mark was made by that shap. I did not have that opinion until after I saw the shap. As soon as I saw the shap that explained that mark to me, in my own mind, as to its being a post mortem mark, I didn't think of it as a post mortem mark.

Q What is your opinion now?

402 A The shap so nearly corres=

death? state fully your
 opinion as to the time
 it was made?

A. Well, gentlemen, as I said
 in my other statement, I
 did not make a thorough
 an investigation examination
 as Mr. Aschaff, for I left
 that matter with him.
 The labor was divided, I
 left that especially being
 but it was my opinion
 then, and it is my opin-
 ion still that that work
 was made by that shop.
 I did not have that
 opinion until after I saw
 the shop. As soon as I
 saw the shop that explains
 that work here, in my
 own mind, as to being
 a part of the work, I did
 think of it as a part
 of the work.

What is your opinion now?
 A. The shop is nearly covered

=pounds to the width of the mark that it occurred to my mind at once, as soon as the strap was produced, as soon as I saw the strap, that that accounted for that mark, I don't change my opinion still, though I am sorry that I did not take hold of the man and examine that particular mark, since the question has been asked me so point blank; but it is my opinion still that that mark was made with that strap.

2 Before the Convict's death?
 Yes Sir, I saw nothing about the Coffin in which he lay that would produce it - that he was lying in, and I saw him lying in the hospital before he was put in his Coffin, and I saw nothing there

points to the west of the
mouth that it occurred
long since at sea, or
soon as the ship was
proceeding, as soon as I
saw the ship, that the
accounts for that matter.
I don't change my opinion
still, though I am sorry
that this was not taken
of the man and examine
that particular mark, since
the question has been asked
we so far as it is, but
it is my opinion still
that that mark was made
with that ship.

Therefore the Councils that?
yes sir, I am nothing
about the coffin in which
he lay that would preserve
it - that he was lying
in, and I am then lying
in the hospital before he
was put in the coffin.
and I am nothing there

that would produce the mark.
 Q As a physician can you imagine any position that that man could be placed in, or in which he could lie, unless it was done purposely, to make that sort of a mark?

A No Sir, I can't see how it could have extended around the thigh as it did. It seems to me like that mark have been made by that strap.

Q ^{say you} Did not make as full an investigation as Dr. Donagall?

A No Sir, I did not.

Q Did you make what you consider a thorough investigation?

A I looked over the body pretty carefully, but I should have looked over it more carefully, if I had not left it more to him. I called
