

HARVARD COLLEGE,

..... *July* 1881

The regulations of the Faculty provide that certain admission conditions shall be removed if a student, in his Freshman year, passes in the same subjects, or does good work in kindred subjects.

The admission conditions of *ref*
Freshman, ~~X~~

are therefore removed.

~~Any remaining admission conditions must be made up at the autumn examination for admission, or at such special examinations as the Faculty may appoint.~~

..... *C. Smith*
Registrar of the Faculty.

HARVARD COLLEGE,

1881

The regulations of the Faculty provide that certain admission conditions shall be removed if a student, in his Freshman year, passes in the same subjects or does good work

in kindred subjects.

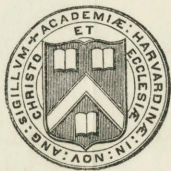

The admission conditions of

Freshman, ☒

are therefore removed.

~~Any remaining admission conditions must be made up at the entrance examination for admission, or at such special examinations as the Faculty may appoint.~~

Register of the Faculty.

HARVARD COLLEGE.

PRELIMINARY EXAMINATION.

CAMBRIDGE, *July 9,* 1879.

No. 162. *J. U. Nef* has passed a satisfactory examination in the following *9* subjects of the requisitions for admission to Harvard College.

Latin Grammar,

Greek Composition,

Arithmetic,

Mod. & Physical Geog.

German,

Physics & Chemistry.

Greek Grammar,

" Poetry,

Algebra,

Clement L. Smith

Acting Dean.

HARVARD COLLEGE

PRELIMINARY EXAMINATION

1878

CAMBRIDGE

has passed a satisfactory

examination in the following subjects of the requisitions for admission

to Harvard College.

Latin

Greek

Logic

Metaphysics

Algebra

Arithmetic

Math. & Physical Sc.

Geometry

Physics & Chemistry

Chemistry

Dean

HARVARD COLLEGE.

CERTIFICATE OF ADMISSION.

CAMBRIDGE, *July 5,* 1880.

No. 14. *J. U. Nef* is admitted to the FRESHMAN Class in Harvard College, but can become a candidate for a degree only on condition of passing a satisfactory examination in the studies named below.

Chas. F. Johnson,

Dean of the Faculty.

The examination required above will be in

*Cicero of Cicero & Virgil,
Plane Geometry,
English Composition,*

With credit in German.

A student who has received an admission condition may obtain its removal, within the year after his entrance, by excellence of College work in the special subject in which he was conditioned. Conditions not so removed can be made up only at the beginning of some subsequent academic year, at the regular examination for admission, or at such special examinations as may be authorized by the Faculty.

Regulations printed for the Information of Parents or Guardians.

ADMISSION.

1. If it should appear, on examination, that a candidate, though capable of pursuing the studies of the class for which he is offered, is yet deficient in certain branches, he may be admitted on condition of making up the deficiency.

2. Every person admitted to the University must give a bond to the President and Fellows of Harvard College, executed to the satisfaction of the Bursar, by two bondsmen, of whom one at least is a resident citizen of Massachusetts, in the sum of four hundred dollars, for the payment of all College dues according to the laws and customs of the University; or, if he prefer, he may make, in place of the bond, a deposit of money or of a United States registered bond of sufficient amount with the Bursar for the same purpose.

On the first day of the academic year, or as soon after as may be, he must exhibit to the Dean a certificate from the Bursar that a bond has been given as required, and must enter his name in the Admission Book.

No officer or student of the University will be accepted as bondsman.

TERM BILLS.

The bills containing college charges will be made out three times a year by the Bursar, and each bill will contain one-third of the annual charges. The first bill will be ready for delivery December 22, and is to be paid on or before January 12. The second bill will be ready for delivery March 15, and is to be paid on or before April 5. The third bill will be ready for delivery one week before Commencement, and is to be paid on or before October 10; but the third bill of the *Senior Year* must be paid at least one day before Commencement.

If any student shall have failed to pay the Bursar, on or before the appointed day for the settlement of bills, every bill due by him, except the last, he will not be permitted to continue at the University. If any student shall be absent for non-payment of a bill for more than one month after the date at which payment ought to have been made by this law, his connection with the University will cease; nor will he be readmitted, except on the usual conditions of readmission after a separation.

4. Das metallische Kupfer der Erde ist durch galvanische Zersetzung von lös-
lichen Kupfer-Salzen entstanden.
5. Das Bier ist kein Nahrungs-sondern nur ein Genussmittel.
6. Bei der Feststellung einer Isomorphie ist nicht nur das Axen-Verhältnis,
sondern auch der Habitus und die vorhandenen Flächen des Krystalles zu berücksichtigen.

Resolved:-

That the Trustees have learned from time to time of the unusual diligence and success in research of Assistant Professor Hef and take occasion, near the close of his first term of appointment to express and record their satisfaction that the University has been able to aid him by the appointment of a research assistant and by exemption from excessive teaching to opportunities that have been so fully utilized both by the rapid growth of his own scientific power and standing and by the value of his special contributions to science, both of which have brought credit to his department of the University among the chemists of the world.

A true Copy
Attest
Louis H. Wilson

that the things have been done
and suggested. Therefore to me it is
likely in regard of ability of
the state of the nation, and the
term of appointment to expect
that the University has been
able to give him the appointment of a
research assistant and his expectations from
excellent teaching to appointing that he
has been as fully satisfied with the report
growth of his own scientific power and
standing and the value of his special
contributions to science, both of which have
brought credit to his department of the
University and the benefit of the world.

This Agreement, made by and between

John U. Neff

Wife & Children, and,

of the first part, and THE CHARTER OAK LIFE INSURANCE COMPANY, a corporation organized under the laws of the State of Connecticut, and located at Hartford, Conn., of the second part, WITNESSETH:

Whereas, a portion of the assets of said Company are of uncertain value and cannot be made available as a part of the reserve of said Company under the rules of the insurance departments of the different states, and it has become necessary to reduce the liabilities of said Company.

Now, therefore, in consideration of the premises, and of the mutual agreements hereinafter made by each of said parties, it is agreed as follows, to wit:

The said part *ies* of the first part hereby agree to and with said Company, that the amount originally payable by the terms of policy No. *78463*, insuring the life of

John U. Neff be, and the same is hereby, reduced two-fifths, to wit: from the amount of *Five Hundred & Thirty* dollars

to the amount of *Three Hundred & Eighteen* dollars, and the said policy, when it matures, shall represent a claim only for said sum of

Three Hundred & Eighteen dollars, together with such additions as may be hereafter made to said policy, and the remainder of the sum originally payable in and by said policy, and all rights of the insured in relation to the portion so released, are hereby fully and absolutely released, surrendered and discharged.

And the said CHARTER OAK LIFE INSURANCE COMPANY hereby agrees with said part *ies* of the first part, that the amount of the annual premium required to be paid by the terms of said policy be and is hereby reduced as to all future annual premiums two-fifths, to wit: from the sum of

_____ dollars per annum to the sum of _____ dollars per annum, to be paid at the same times and under the same conditions as heretofore.

And said Company further Agrees with said part *ies* of the first part, that whenever said Company shall realize from said uncertain assets any divisible surplus which may properly be divided among the holders of policies so reduced, said Company will from time to time apportion to said policy, provided it shall not then have lapsed, its fair and equitable proportion of such divisible surplus, by additions to said policy, or otherwise; which dividends shall continue upon such reduced policies after they become due and are settled, as well as upon those which remain in force.

And it is further agreed that said original policy and this agreement shall be treated as one instrument, but that said original policy remains in full force in every respect, except as varied by this agreement, and said policy is to be considered and taken, in all respects, as if it had been originally issued for the sum of *Three Hundred & Eighteen* dollars.

If a Receiver shall be appointed for said Company, this agreement shall, in that event, become null and void.
