Chicago, March 20, 1911.

My dear President Judson:-

In regard to your inquiry concerning the amount available for the lectures on the Barrows Foundation in December, 1912: there is in the fund at the present time a credit balance of \$1823.31 there will probably be reappropriated at the end of this year 191.80

making a total credit balance on July 1, 1911 2015.11

As you know the funds belonging to the Haskell and Barrows Lectureships were invested in East Hall in Morgan Park which is at the present time rented to the Morgan Park Academy for Boys together with the other buildings in Morgan Park. The rental due from the Academy for 1911-12 is \$4000. and for 1912-13 \$4500. I understand that it is the intention of the Board to credit 5% on the original fund to the Haskell and Barrows lectureships before crediting any of the other buildings with rent. If this were done and the Academy paid its rent in full there would be credited to the fund a little over \$2000. each year. From the fund of \$2000. per annum would be taken the cost of the lectures at the University of Chicago which heretofore has not exceeded \$500. per annum. Therefore, on the above basis the Barrows Lectureship Funds available would be as follows-

My dear Dr. Henderson:

May I supplement my letter of a day or two ago by a statement which I find in the President's preface to the last volume of Dr. Hall's lectures, as follows: "The cities in which the series was delivered in full were Lahore, Allahabad, Calcutta, Madras, Bombay, and Bangalore. Individual lectures of the course were given in Simla, Lucknow, Benares, Dharmar, Ahmednagar, Hyderabad, and Ernakulam. Some were given in Ceylon and Manila, and a few in Japan."

I am surprised to learn that no lectures were delivered in China. Personally, I very much hope that you can stop at Shanghai, if not also at Hong Kong, and deliver one or more lectures, as also in Tokio. I am sure that your presence even for a short time in Shanghai would be of very great benefit. The special reasons I have in mind I can state when we have an opportunity of conversation.

Let me renew my expressions of pleasure that you are to serve the University and the East by the delivery of these lectures..

Dear President Judson:

It seems best to give you some facts about my trip to India next year while they are fresh in my mind, and send them for your consideration at the earliest possible date.

I am in responsible relations with several international organizations: the International Prison Commission, the International Bureau of Public and Private Relief, the Int. Association of Labor Legislation, the Int. Committee on Unemployment, and I am the American Vice-President of the Int. Ass. on Social Insurance.

Nearly all of these bureaus and committees express the strong desire that I meet them in September, 1912. <sup>in Paris or in Zurich</sup> To do this I should have to take them on my way to India and so

begin my lectures in India as early  
as possible in November, 1912. After  
that I could visit China in January  
and Japan in <sup>February</sup> March, returning  
to Chicago for the Spring Quarter,  
1913.

I had thought of going to  
Japan first; but these other  
important conferences with which  
I have this year become more  
more closely allied than before,  
make it imperative that I come to  
Europe in September, 1912.

I hope that you will be  
able to make arrangements  
in India and Japan on the  
basis of this programme which  
would make me able to accomplish  
the work with my time.

Looking forward to meeting  
you and cooperating with you at  
the U.C. after October 1,

Yours cordially,

C. R. Henderson

I have received yours of August 11 from Nagasaki, enclosing letters from Dr. Warner and from Mr. Lee. I thank you very much for your suggestion respecting Dr. Jefferson. I believe, however, that it is practically settled that Dr. Henderson will be the next Haskell lecturer. The matter has not been officially acted upon and therefore is not ready for publication, but I believe it is understood between President Judson and Dr. Henderson.

I shall be glad to direct President Judson's attention to the matter upon his return, and should anything happen to prevent Dr. Henderson from going I am sure he would be glad to consider Dr. Jefferson.

Dear Mr. Burton:-

Herewith I am returning the material about Dr. Jefferson. It of course would be very nice if the University could give Dr. Jefferson the pleasant vacation he needs, but that is not exactly the purpose of the Barrows Foundation. So far as the lectureship is concerned I may say to you that Dr. Jefferson would be absolutely out of the question. However, it will be quite sufficient to let Dr. Hume know that the whole matter is definitely settled, and that Dr. Henderson is going.

My dear Mr. President,

In the matter of preparation for Dr. Henderson's lectures in India, concerning which he has consulted me, I agree with you that Dr. Hume of Ahmednagar is the person who can help us most. Would it be well for the President's office to write him stating that Dr. Henderson is to deliver the lectures in 1912-13, that, in consequence of Pres. Hall's lamented death, where no one in this country who is familiar with the steps to be taken, and, aware that he has been very helpful in previous years, we should be glad of his advice as to how to proceed in preparing for the lectures?

Similar steps will be desirable in China and Japan a little later.

In any way in which I can be of service I am your to command,

My dear Dr. Hume:-

The Barrows Lectures for 1912-13 will be given by Professor Charles R. Henderson, Ph.D., of the University of Chicago, Head of the Department of Ecclesiastical Sociology. Professor Hume is an eminent specialist in criminology, and is an expert on all matters relating to the care of defective, delinquent, and dependent classes. His special message to the people of India will be therefore the attitude of Christian civilization towards these great problems. The death of the lamented President Hall of course has made it impossible for us to avail ourselves of his experience in arranging the general plan of lectures. I suppose that Professor Henderson will reach India by early autumn of 1912. Remembering the great kindness which you have shown to our previous lecturers, I am wondering if it would trespass too much upon your time to ask you to make us any suggestions as to how these matters should be arranged. Any suggestions you may make will be highly appreciated.

With regard to the amount available for the Barrows Lectureship concerning which you telephoned yesterday, I find that at the present time there is a balance of \$2015.11 in the fund and that there is unexpended in this year's appropriation \$190.99 which will no doubt be added to the fund on June 30, making a total amount available at that time of \$2206.10. There is in next year's budget an appropriation of \$500. but no estimate has been made of the rental from East Hall, Morgan Park. If 5% of the fund were allowed from this rent it would add \$1500. to the fund next year, making a total amount available in the year 1912-13 of \$3706.10. The item of \$1500. is, of course, contingent upon the rent from Morgan Park Academy being received.

Very truly yours,

Dear Mr. Hillis:-

The University of Chicago is sending Professor Charles Johnson Henderson, Ph.D., of its faculty of Sociology to India next autumn to give the lectures on the Barrow Foundation for the University. These lectures are on comparative religion. Professor Henderson's subjects will relate to the methods of applied Buddhism as used in the west. Professor Henderson himself is an expert on Buddhism and allied subjects and President of the Eight International Prison Congress held in Washington in 1920; and was appointed by President Taft in 1919 as Commissioner for the United States on the International Prison Commission. Professor Henderson is also President of the American Society of the International Conference on Social Hygiene, a member of the International Committee on Public and Private Assistance, Secretary of the American Association of Social Hygiene, and is also President of the International Prison Commission. Dear President Judson:

In regard to the

Barrows, <sup>lectures</sup>

the

regulations say:

"During his term of office, or in the year following its expiration, the Lecturer is expected to publish his lectures, at The University of Chicago Press, etc."

1. Is this regulation still in effect?

2. Dr. Hume advised publishing the lectures in India and before I learn that country. I think Dr. Hall did this, in a cheap edition.

What is your decision on this point?

3. The expense of publication, - by whom is that to be carried? The regulation does not state.

Yours cordially,

Chas. H. Johnson

4 My impression at present is that the lectures should not be published in America until after my return in 1913, and that additional chapters should be added giving the results of my studies in the Orient of the crude beginnings of "social legislation" in India, China & Japan. This would be none, while my lectures are necessarily familiar.

Dear President Judson:

In accordance with your request, I can give the following information with reference to the Barrows Lectures given by Dr. Hall.

1. Both volumes were published in India, and, in so far as I know, without any definite arrangement with the University. It is possible that Dr. Hall had a private understanding with Dr. Harper, but I am sure that publication in the Orient was a serious handicap to the Press.

2. The first volume entitled, "Christian Belief Interpreted by Christian Experience" was published on funds of the Press. "Christ and the Eastern Soul" was published on an appropriation from the Subsidy Fund, the bulk of the amount having been provided, on your solicitation, from outside sources.

3. The books have been reasonably successful, but the sales were cut down very materially by publication in the cheaper form.

4. On both volumes the usual royalty was provided, but in the first instance payment was made on sales from the beginning, while in the second royalty was to begin after all costs had been met.

In closing I indorse Dr. Henderson's thought with reference to the publication of his lectures, but I should advise that the University Press be given the exclusive publishing rights. If this is done, I am certain that through the connections with the Cambridge University Press in India, and through our agency relations in Japan and China we can not only sell a large number of copies, but make the

My dear Judge Calhoun:-

My friend and colleague Professor Charles Richmond Henderson, Ph.D., with Mrs. Henderson will be in China sometime during the coming winter on their way home from a trip to India. Professor Henderson is to be the University Lecturer to India on the Barrows Foundation next autumn. I am hoping that he and Mrs. Henderson may have the pleasure of meeting you in Pekin, and I am sure that you will be able and willing to assist him in his interesting tour. I may say that Professor Henderson is one of the leading experts in this country, and in Europe too for that matter, on his special field of criminology and similar subjects.

—  
In case my family need to be reached, a letter or telegram should be  
sent to <sup>my sister</sup> Mrs. A. H. Diver, Sarina, Ontario. She will attend to  
my correspondence while I am gone, and she will have the  
addresses of my other sisters and relatives.

—  
I shall use the same cable code as that used by  
the University. A telegram sent to the University with the word  
"Diver" should be forwarded to Mrs. A. H. Diver, Sarina, who  
knows about my family and business affairs.

Dear President Johnson:

We have nearly finished our stay in Paris and on Oct. 3rd expect to sail for Genoa. Both of us are in excellent health and buoyant spirits, and looking forward to our voyage with keen interest.

My lectures are about ready for the printer — and the critics! They may at least serve to draw the fire of unseen enemies. I hope they will do good.

My new course of lectures for our University is also well advanced and notes accumulate every day. I am getting hold of literature in abundance and sifting it with care.

Several days have been devoted to the International Prison Commission; — Sep. 19-22, at Paris. We discussed many important questions for the future.

Two days I spent in Zurich to attend <sup>part</sup> international meetings on social insurance, home industries, legal protection of working people and unemployment. The execution officers of the three great associations united in giving me a document which makes me their official delegate to promote their movements in the Orient. This will give the highest authority possible from these bodies of experts and will help to secure me a wider and more attentive hearing. Two of the presidents are French ministers, — M. Poincaré and M. Lion Bourgeois, and Dr. Freund of Berlin is at the top in his line. The discussions at Zurich helped me amass ideas and material for my lectures and also for my work at the University.

This introduction, with that of Lord Curzon to the heads of Government in India, should at least open some doors; if I fail it will be my own

fault.

Mrs. Henderson joins me in a  
most cordial message.

Ever sincerely and gratefully yours,

Charles Richmond Henderson

My dear Dr. Henderson:-

*Very cordially yours,*

Your good letter of the 27th of September is just received. I rejoice to know of your pleasant and profitable stay in Paris and in Zürich, and note that you were to sail on the 3d of October from Geneva. I shall be deeply interested in the events of the trip, but do not wish you to take overmuch time at letter-writing, as I know how you will be crowded with occupations. The thing that will especially interest me, however, will be the personal health of yourself and your good wife.

You will be glad to know that the autumn quarter has opened under pleasant circumstances, and with the usual considerably increased attendance of students. Of course you are aware of our increased rigidity in requirements for admission to the Colleges, which I am sure will improve the quality, although it may not increase the number.
