Faculty of the Colleges of Arts, Literature, and Science
Thursday, May 10, 1923, at 4:00 P.M. Harper Assembly Room

SPECIAL ORDER

Reconsideration, on request of the University Senate, of the following actions of the Faculty of the Colleges of Arts, Literature, and Science, taken February 8, 1923:

VOTED to amend Faculty regulations as published in sections 10, 33, and 44 of the Undergraduate Coursebook, edition of July, 1922, as follows:

Section 10, The requirements for the Bachelor's degree include
1. The completion of 36 majors, exclusive of Physical Culture, with an average grade of C in all courses taken in the University. (No change in the remainder of the section. The amendment consists of substituting the underlined portion for the following phrase: "with the required grade").

Section 33, Discipline and Probation -
4. An undergraduate is regularly placed on probation:
   a) When so admitted by the Examiner.
   b) When at the close of any quarter his entire record in the University falls below the normal minimum of two grade points per major taken.
   c) When such action is necessary in the judgment of the Dean, for disciplinary effect.

The amendment consists of substituting b) above for the following:
   b) When in either his first or his second quarter of residence he fails to obtain a minimum of two majors and four grade points, exclusive of credit in Physical Culture.
   c) When at the close of any subsequent quarter his entire record, exclusive of credit in Physical Culture, is more than four grade points below the normal minimum of two per major taken.

5. A student placed on probation because of deficiency in grade points is expected immediately to reduce the deficiency, and will not be removed from probation until the average grade in all courses taken in the University is restored to the normal minimum of two grade points per major taken. A student who has been on probation three quarters without making satisfactory reduction of his deficiency in grade points is subject to dismissal by action of the proper Faculty or Board, even though the deficiency does not amount to ten. (The underlined portion added to the first sentence of 5 constitutes the amendment).

ineligible

Section 44, 4, Secret Societies,
B. Additional regulations adopted by the Faculty:
   1) An undergraduate student must have credit for 3-1/2 majors of residence work and seven grade points, including 1/2 major and one grade point in Physical Culture, in order to be eligible to initiation into any secret organization. (The amendment consists in substituting "7" for "6".)

UNIVERSITY RECORDER

Dean J. H. Tufts

I

CONFIDENTIAL REPORT.

June 2, 1923.

To the Members of the Faculty of the
Colleges of Arts, Literature and Science,

Dear Sirs:

At the meeting of the Faculty of the Colleges of Arts, Literature and Science held May 10, 1923, the following resolution was adopted:

"Resolved: That the Dean be instructed to distribute among the instructors who gave undergraduate courses in the Winter Quarter, 1923, a report showing the distribution of grades given in the various courses, and that the report be prefaced with a statement of the marking system."

In compliance with the instructions, I furnish you, therefore, with the following report.

During the discussion of the foregoing motion, it was made clear that members of the Faculties ought to be provided with the information indicated, but that they should be warned regarding the unwisdom of making deductions on the report of the grades for a single quarter. On so small a number of cases it is unsafe to make any generalization regarding distribution curves. The purpose of the report is chiefly to raise the question regarding the present system of grading. Each instructor ought to be able to justify his own assignment of grades.

The objective of each course being in the mind of the instructor, he ought certainly be able to see if a given student falls into one of three large groups:

a. Those who have not attained the objective of the course.
b. Those who have attained the objective of the course.
c. Those who attained that objective in a distinguished fashion.

The grading system affords even greater flexibility of classification of students. Our present system of marking is as follows:

Significance	Grade	Percentage	Credit	Grade Points
Excellent	A	100-96	1 mj.	6
	A-	95-91	1	5
Good	B	90-86	1	4
	B-	85-81	1	3
Fair	C	80-76	1	2
	C-	75-71	1	1
Barely Passed	D	70-61	1	0
Conditioned	E	60-51	0	-1
Failure	F	50 and below	0	-2

Very truly yours,

DAVID A ROBERTSON

Dean.

CONFIDENTIAL REPORT.

June 2, 1923.

To the Members of the Faculty of the
College of Arts, Literature and Science.

Dear Sirs:

At the meeting of the Faculty of the College of Arts, Literature and Science held May 10, 1923, the following resolution was adopted:

"Resolved: That the Dean be instructed to distribute among the instructors who gave undergraduate courses in the Winter Quarter, 1923, a report showing the distribution of grades given in the various courses, and that the report be prefaced with a statement of the marking system."

In compliance with the instructions, I herewith, therefore, with the following report.

During the discussion of the foregoing motion, it was made clear that members of the Faculties ought to be provided with the information indicated, but that they should be warned regarding the unwisdom of making deductions on the report of the grades for a single quarter. On so small a number of cases it is unsafe to make any generalizations regarding distribution curves. The purpose of the report is chiefly to raise the question regarding the present system of grading. Each instructor ought to be able to justify his own assignment of grades.

The objective of each course being in the mind of the instructor, he ought certainly be able to see if a given student falls into one of three large groups:

a. Those who have not attained the objective of the course.
b. Those who have attained the objective in the course.
c. Those who attained that objective in a distinguished fashion.

The grading system allows even greater flexibility of classification of students. Our present system of marking is as follows:

Designation	Grade	Percentage	Credit	Grade Points
Excellent	A	100-96	1 hr.	6
	A-	95-91	1	5
Good	B	90-86	1	4
	B-	85-81	1	3
Fair	C	80-76	1	2
	C-	75-71	1	1
Barely Passed	D	70-61	1	0
Conditioned	E	60-31	0	-1
Failure	F	30 and below	0	-2

Very truly yours,

DAVID A. ROBERTSON
