number of parents of Lewis as eager as we are to show appreciation of its noble and open hearted attitude toward what is best educationally.

But I know of boys in school there from nine to four o'clock who have had to be tutored outside for their Latin and it's no wonder if they detest it, "inwardly," when it takes so much time for their from the seething interest of our wonderful every day life. Then too, the modern languages which need the youthful ear for their spoken power are not taken up till the third year of the Course.

Should Richard

3736 GRAND BOULEVARD.

Dear Dr. Harper.

Since my last visit to Lewis Institute I have been thinking so earnestly about it that I just cannot help coming to you for some light as to the plans for work there for next year particularly in the preparatory classes and in the Science work for them.

As I realize more and more now the value to our other children of the real Science work done in the

University of Chicago school
& cannot miss an opportunity to
urge it for the older boys and
girls who have never yet been
quickened by it.

The work in Physiography
that Richard is doing in Lewis,
alternately with his shop work,
is so much of it remote, it seems
to me, from those individual
experiences through experiments
in the laboratory that alone
put the pupil in touch with
the great forces at work all
about him and give him that
necessary technique in the
handling of them.

I have often observed work in the Women
Normal School, Stockholm College, Nas Fork. I feel that
I cannot stay & Randy, that a Quaker
development of power is fostered there for higher
educational work and for life - really a share
in the intricate development than I had known
for.

Here he has so deeply interested in Lewis Institute
he could work full as keenly any task in it
would suit our boys and girls. For I know of a

Go over this rebellious letter he would beg me not to send it. He is so loyal to the School. Its order, dignity and healthfulness, the kind and earnest work of his teachers all hold him and help him.

He has been happy and well then all winter.

The course in Mathematics with Mr. Greason he has particularly engaged and it is no wonder.

It is the educational work, intellectually and actively, that I have felt the lack in and it is partly because of the experiance I have been giving me in the University School.

There is no doubt that our U. of C. school needs more money that it may get some of the nice things that Swinden also over into its organization.

If I could only put the money into Dr. Dewey's hands I would trust him to find some

How to do the work, needed & high spirit, with our children. Latin Should not be dropt entirely, only handled differently.

This is one thing a number of us are very sure of. Paul Hanus is just about the best man in his school. Mrs Bridges Speaks of him and I Mrs Hayden

Mr. H A Rust Crane

University of Chicago.

Dear Sir.

I enclose a check for $250.00 for the University Primary School. I am very glad I do even this much toward helping establish so important a piece of work.

Both Mr Crane and I look forward with real interest to the successful development and the right conditions

for the unfolding of the University Primary school's ideal.

With greeting for its second year

Yours truly

Cornelia T. Crane

Chas. H.

My dear Dr. Harper

Perhaps Jim and Mrs. Harper would find pleasure in some lines that may themselves out from my heart during the beautiful Autumn days here at Lake Geneva. As Emerson says:

"The earth is so full
of a number of things
I'm sure we should all
Be as happy as kings."

Gratitude.

Forest of Autumn!
Yielding rich Radiance
Almost divine,
The beauty of thy life
With the Sun again,
Teach us thy Charm;
That we may stand,
Before the "Son of Man",
Glorified in giving
Freely, as we have received
From the Sun of Heaven,
The "Father of Lights",
In whom is no Variableness
Neither Shadow of turning".
