Chicago, March 19, 1915

Dear Dr. Wells:-

hand. I should approve the investigation to which you refer, provided it is wholly scientific in character, and has no commercial implications in any way whatever. Is it likely that the manufacturers in question might use the name of the University in advertising their products?

Very truly yours,

H.P.J. - L.

Dr. H. G. Wells, The University of Chicago. Chicago, March 19, 1915

Dear Dr. Wells:-

You refer, provided it is whelly scientific in character, you refer, provided it is whelly scientific in character, and has no commercial implications in any way whatever. Is it likely that the manufacturers in question might use the name of the University in advertising their producter.

Very truly yours.

Dr. H. G. Wells, The University of Chicago. Chicago, April 3, 1915

Dear Mr. Stieglitz:-

Your favor of the 22d of March
was sent to me in the south. On the basis of your
statement I should approve of the investigation, it being
understood that it is done at the request of the United
States Government.

Very truly yours,

H.P.J. - L.

Mr. Julius Stieglitz, The University of Chicago. Chicago, April 3, 1915

Dear Mr. Stieglitz:-

Your favor of the 22d of March was sent to me in the south. On the basis of your statement I should approve of the investigation, it being understood that it is done at the request of the United States Government.

Very truly yours,

H.P.J. - L.

Mr. Julius Stieglitz, The University of Chicago. Department of Chemistry

March 22, 1915.

President Judson, Faculty Exchange.

Dear President Judson: -

for letting me see your reply to Dr. Wells in regard to the flour investigation. Dr. Wells will see that he has a statement in writing from the men involved that the name of the University will not be used in any advertising whatever. The name probably will come up in court proceedings in case the question is brought before the supreme court again by the Department of Agriculture. It would be stated then that the problem was entered into wholly as a public service work. I thought you should know this feature of the case before you make your final decision.

Yours sincerely,

10

Dear President Judson: -

now, of healide down me I

for letting me see your reply to Dr. Wells in regard to the flour investigation. Dr. Wells will see that he has a statement in writing from the men involved that the name of the University will not be used in any advertising whatever. Assumed the question is brought before the dupreme case the question is brought before the dupreme would be stated then that the problem was entered into whelly as a public service work. I thought

would be stated then that the problem as substatinto wholly as a public service work. I thought you should know this feature of the case before you make your final decision.

Yours sincerely,

physical standard

The University of Chicago

OFFICE OF THE DEAN

The Medical Courses

Chicago, March 18, 1915.

My dear President Judson: -

You may recall something of the bleached flour investigation which the Government has been undertaking for some time past. I have been asked by Dr. Carl Alsberg, Head of the Bureau of Chemistry of the Department of Agriculture, to act as a referee to investigate the possible poisonous nature of flour bleached by certain processes. This investigation is to be conducted at the expense of the manufacturers, the results being available both to them and to the Government.

I take it that this is to be looked upon as in the nature of public service work, but have declined to undertake the work until I assure myself that the University authorities approve of suck work being undertaken in our laboratories. Prof. Stieglitz has approved of the principles involved and it is proposed to have the chemical work done by one of his graduate students under my direction, while I will make or direct the investigation as to the effects of the products on animals. I may add that the work is of considerable interest from the purely scientific standpoint since it brings for the first time investigation of the properties, both chemical and physiological, of the coloring matters of the grains. It is understood that all expenses of the research, such as materials used in the laboratory, will be paid for from the fund appropriated for this purpose by the manufacturers.

Awaiting your opinion in this matter, I am,

Yours very truly,

H. Giden Wells

The University of Chicago

Chicago, March 18, 1915.

My dear President Judson:-

You may recall something of the basached flour investigation which the Government has been undertaking for some time past. I have been asked by Dr. Garl Alsberg, Head of the Bureau of Chemistry of the Department of Agriculture, to act as a refere to investigate the possible poisonous nature of flour bleached by certain processes. This investigation is to be conducted at the expense of the manufacturers, the results betag svailable both to them and to the Government.

public service work, but have declined to undertake the work until assure myself that the University authorities approve of such work being undertaken in our laboratories. Prof. Stieglitz has approved of the principles involved and it is proposed to have the chemical work done by one of his graduate students under my direction, while I will make or direct the investigation as to the effects of the products on animals. I may add that the work is of the brings for the first time investigation of the properties, both chemical and physiological, of the coloring matters of the grains.

It is understood that all expenses of the research, such as materials used in the laboratory, will be paid for from the fund appropriated for this purpose by the manufacturers.

Austring your apinton in this matter, I am.
