

L

Regina Ass<sup>n</sup> h. W. T. Canada;  
29<sup>th</sup> December 1902.

Dear Sir,

While in Chicago I took the liberty to forward to you some Diagrams, and a mass of figures, what I termed "The Sphere in Proper Form" for your information or observation, and your Secretary Mr Davis was good enough to acknowledge receipt of the same on 19<sup>th</sup> Sept<sup>r</sup> last;

Having heard nothing more of the matter, I suppose these papers could not be properly understood in their present form; Unfortunately I was <sup>not</sup> then able to give a proper account in writing, but I feel able to do so now, or have tried at least to gather together thoughts available for publication, and thoughts translatable for education.

Three considerations have drawn me to communicate with you again; Viz:

1. That I had already sent these diagrams to attract some attention in the first place.
2. That if the papers sent can be proved to contain truths as stated in a figure or metaphor, then, their importance is self evident, and means practically a social revolution in the world of thought (secret and silent) new Views of life, which you and others holding like positions in the Civil service of the world, should be made ~~made~~ acquainted with in the first place, and would do well to enquire into for obvious reasons.
3. I have no means to publish anything, suppose it was true; and no influence in the wide world of letters. You have both; Besides, if the papers are of any importance from an educational point of view surely they are worth examination and a little study on the part of men in authority. -  
Y<sup>rs</sup>.

"The Paper sent herewith deals with" "The Being of Power in Season" the simplest part of the subject; the more difficult is the one to follow in a week or ten days I hope: "The Power for doing in reason, the object and aim illustrated in a figure, dealing with the mutability of the Sphere in strife and Compass of Right in life; for exercise of the functions in season, and exhibition of the faculties in reason.

I do not wish the papers returned - rather that these should remain with you, or cast aside, as you think right; It is only evidence of my desire to sow a grain of seed, good or bad; or it is more the endeavor of one crying "See" to the World at large - The Beast in a figure; I know I should close this letter here, but am tempted to give you, "let fly" as it were something off my mind, more kind or skin of the fruit - The fashion of Man and kin to the brute, mere play of the mind, without showing the least disrespect for the "Higher Criticism" or being unkind - The "two edged sword of the Spirit" disarms the pen of the critic: Get a double edge on all dialectics. It is said words are worth much and cost little - not so - words are part and portion of the lives of men, the wealth of nations, and treasures of time;

A currency for all the strife; The might and Right of Creeds, Stamped token, sign and seal of life - The Right and Love in deeds - Words, language, feature of life in a figure in space and time, requires to be studied, examined to their foundation, plan of letters and design in proportion, the structure for use; Their root, scheme from above, devise in love for utility, coin of vantage in health, or coin of wealth in the realm of sense, thought and imagination nurture in life, cultivation for utility; To know and apprehend the distinction between good and evil - Good words of might are upright as right in today; And discern, comprehend the difference between right and wrong - True Words of Right - strong to smite - as Love in the way; The structure and foundation of the Tree of Knowledge in a fashion - To know that words are made for reception of

of the tree of knowledge in a fashion - to know that words are made for reception  
of light - strong to unite - as love is the way. The structure and foundation  
and discern, comprehend the difference between right and wrong - true words  
between good and evil - good words of right are upright as right in today;  
structure in life, cultivation for utility: to know and apprehend the distinction  
of courage in health, or coin of wealth in the realm of sense, thought and imagination  
structure for use; their root, as some from above, device in love for utility, origin  
studied, examined to their foundation, plan of letters and design in proportion, the  
Words, language, feature of life in a figure in space and time, requires to be  
stamped upon, sign and seal of life - The right and love in deeds -  
A currency for all the stuffs; the right and right of deeds,  
line of love, the wealth of nature, and treasure of time;  
are worth much and cost little - but so - words are part and portion of the  
pen of the critic: yet a double edge on all dialectics. It is said words  
criticism or being written - the two edged sword of the spirit discerns the  
mere play of the mind, without showing the least disrespect for the higher  
my mind, more behind or skin of the fruit - the fashion of man and him to the world,  
letter love, but am tempted to give you, let fly as it were something off  
the world at large - the heart in a figure: I know I should close this  
a grain of seed, good or bad; or it is more the excrement of one crying "yes" to  
you, or cast aside, as you think right; it is only evidence of my desire to save  
I do not wish the paper returned - rather that there should remain with  
for exercise of the function in sense, and exhibition of the function in reason.  
dealing with the instability of the sphere in stuff and compass of right in life;  
I hope the power for doing in reason, the object and aim illustrated in a figure;  
part of the subject; the more difficult is the one to follow in a week or two days  
the paper sent herewith deals with "the being of power in sense" the simplest

of light - "Thought that is bread of heaven" descending (condensing) Spirit of light. Symbol the Dove - Sign of desire; Structure of the leaf ~~for herb~~ The lobe of the ear; cells or herb in season; Green leaf in emotion, resting in strife - } for use in space, time of strife; "To know that words are living facts, for Conception in love; "Thought that is bread of heaven ascending (evaporating) Spirit of light. Emblem of Love; Beal to aspire } The globe in the ear; cells nurture of sheaf or garb in reason; Yellow sheaf in devotion, attesting the life. - } for utility in life. -

"Two things are not on the market, and cannot be purchased with all the gold in this world: These are, Sound, healthy sleep; To rest like the green leaf on the tree,

Sound, common sense, to test by industry, like the bee;

"Knowest thou the land where the citron apples bloom, and golden oranges in leafy gloom", where hidden wealth, the golden apples of Hesperides are to be found?

"The Hercules of this world of time has gone deaf to the Higher Commands, declared by a law in season; and blind to the lower demands, revealed by a law in reason; and for result you have patent medicines for every ill - Orders, Guilds and Leagues to cure or kill (or cure with skill) while the real remedy rests with each individual; Sound Doctrine "Alma Mater", greatest greed needs least attraction.

Pure Dogma just to match her. Smallest seed, the beast for action; There mechanical drill in school of logic and grammar; is a blind man's excuse;

Common sense, and the Will to rule in magical manner, came by, habit and use;

To me, the bleating lamb, or sucking calf;

"The bleating lamb, with mother so unkind - A student youth with raw untutored mind;

"The sucking calf, to suck no more but grind; A seeker after truth by training made perblind; And this is the way of the Beast over which you are by God's providence the Good Genius, High Priest or Pastor, to feed and oversee the flock or herd for the Master; That they do not butte each other over much, or seek to stand aloof.

"Try and live in Peace and Good Will, like the Church, put self Will to the proof; And never hook or horn, to bother, brothers, sisters dears,

But live and graze with one another - use each other's ears.

Aug

of light - thought that is seed of heaven descending (condensing) spirit of  
light. Symbol the dove - sign of divine; structure of the leaf ~~has~~ the love of the angels  
or leaf in heaven; leaf in emotion, resting in itself - } For we in space, time of things  
to know that words are living facts for conception in love; thought that is seed of heaven  
ascending (expanding) spirit of light, for vision of love, heart to expand, the globe in the air; cells  
structure of leaf or grain reason, fellow leaf in emotion, attracting the life. } For activity in life -  
two things are not on the market, and cannot be purchased with all the gold in the  
world: there are, sound, healthy sleep; to rest like the green leaf on the tree,  
sound, common sense, to rest by industry, like the bee;  
"thou art the land where the citron apple bloom, and golden oranges in leafy"  
gloom, where hidden wealth, the golden apples of the garden are to be found?  
"The Hercules of the world of time has gone deaf to the higher commands, declared  
by a law in heaven; and blind to the lower demands, revealed by a law in reason;  
for result you have potent medicines for every ill - Order, Quilts and Regimes  
to cure or kill or cure with skill, while the real remedy rests with each individual;  
Sound doctrine, "The Master", greatest grace & need a least attraction.  
Pure logic first to master. Smallest seed, the least for action;  
True mechanical skill in school of logic and grammar; in a blind man's exercise,  
Common sense, and the will to rule in practical manner, come by habit and use;  
To me, the beating lamb, or sucking calf!  
The beating lamb, with master so united - A student youth with an untutored mind;  
The sucking calf, to such no more but guide. A teacher after truth of training made possible;  
And this is the way of the least over which you are by God's Providence the  
Poor Genius. High spirit or Master, to feed and oversee the flock or herds for the Master,  
That they do not but see other over their, or seek to stand a loaf.  
They and live in peace and good will, like the church, but self will to the proof;  
And never look or learn, to better, but then, listen down.  
But live and grow with one another - use each other's ear.

And use the great horn spoon, with something more than grace;  
 Learn to putt, a straight line sure, steady for the base;  
 And never seem to greet a brother straying on the grass,  
 And neer disdain to own your Mother - and become an ass;  
 And there are other kinds of flocks - not like sheep - but with  
 beaks and claws and wings; the silly fool, or fowl, in their fashion of  
 guggle or fuddle, with wings for flying, ~~afire~~ in space;  
 And sound, exact in each case of its kind,  
 Or by figure of the race, or form ~~of~~ mind;  
 You know a duck by its waddle of care,  
 Senseless muddle in a puddle of ware;  
 When Greek meets Greek, as in the tug of war in ink,  
 The Quacks do rend the air, and then there is a stink.  
 Fool or Fowl is known by its straddling air,  
 Aimless guggle is a puzzle - beware:  
 When cheek meets cheek, as each address the bar, to drink;  
 The Crow transcends the air, and so descends the think.  
 To hold sound views, wise or profound,  
 The pen may teach, become hide bound,  
 Or men may preach one level round,  
 I love to rest on higher ground:  
 The whole round world, or something less,  
 Command, at call, or to possess;  
 There show of wealth it neer can bless,  
 I'd rather choose the wilderness.

"On Christ the solid rock I stand, All other ground is sinking sand -"  
 Craving your forgiveness for disturbing you at this time and wishing you a happy New  
 Year.  
 President Harper Chicago University. I am Yours faithfully Geo Motion

President Harper Chicago University.  
Dear your faithfully  
Giving your forgiveness for disturbing you at this time and wishing you a happy New Year.  
- On Christ the solid rock I stand, all other ground is sinking sand -

I'd rather choose the wilderness.  
There shall of wealth it here can be less,  
Command, at call, or to possess;  
The whole round world, or something less,  
I love to rest on higher ground:  
Or then may prefer one level round,  
The low way best, because wide bound,  
To hold sound views, wide or profound.

The Crane transcends the air, and so descends the think.  
When Crane meets Crane, as each address the bar, to drink;  
A Crane is a Crane - beware:  
Good or bad is known by its standing air,  
The Crane takes the air, and then there is a think.  
When Crane meets Crane, as in the top of war in ink.

Don't be in a fuddle of war;  
For there a duck by its waddle of care,  
Or by figure of the race, or form of hand;

After sound, exact in each Crane of its kind,  
Guzzle or fuddle, with wings for flying in space;  
With and clear and wing; the silly fool, or fowl, in the fashion of

And there are other kinds of flocks - not like sheep - but with  
And here Crane to our own Crane - and become an all;  
And here Crane to greet a brother staying on the grass;

Learn to Crane, a straight line runs, steady for the race;  
And use the great horn spoon, with something more than grass;
