Dear Prof Barker.

Would

rabbinical literature,
more especially
to the Talmuds,
of the Mishnah.
Such a work is

early answer to this
inquiry would

to have the congress in '92 &
some persons have hinted that
they would be rather glad to
have the matter taken out of their
hands. There is no one in my
family in being a congress in
Sept '92 & '93. Harkitt's address
is 14 Frankfurterstrasse Wiesbaden.
I intend going to Paris on Wednesday
or Thursday but could postpone
my trip for a week if there was
a chance of meeting you there.
I think you know in there. His

What is the matter with "Beltrance"?

In July? Is it not yet?
There is also another matter in regard to it. I will
I could see you. Where will you be in Sept 30? when
I sail?

Lindau n. c.
14 Bedford Place

My dear Dr. Harkitt -

Through the
card you wrote Dr. Gosschalk,
I learn of your address &
also that you will not be in
Lindau before Oct 1st? Will
it not be possible for you, Dr. G.
Harkitt, myself to meet &
discuss the congress question.
It is of course out of the
question to do anything with
'91 but I have good reasons for
believing that if we can
procure a congress in America
in '93, the com. for '92 would
accept the proposition as a

compromise & give up the
treasury '92 congress. Hanks
too is of this opinion & judging
from those with whom I have
spoken, it would not be
difficult to get the assent
of many German & English
merchants to such an agreement.
Unfortunately Bonpland is now
in London & will not be back
for a fortnight. The real
difficulty in holding a congress
in the U. S. is the expense.
My thought is that unless we
are in a position to invite
all Professors, & Princes, & can
for mental languages at Berlin
and Berlin as well as Museum
Naturalists & private scholars of
standing to come over at our
expense, we ought not to
hold a congress in our country.
The question is, can we do this?
We need not count on more

than 100 men to the three English ones. The
high pay & reduced in the U. S. is the chief
obstacle. Dr. N. T. we could easily attract
large numbers in private families & at 2000 Londoners,
the cheap means for our means would aid
in dispersing the expenses. The question then is
we must come down. With \$5,000 the thing
can hardly be done. When we ought to be
down to 1920. If they would be willing to
yield in favor of 1930 we would not be so
1892, we will have them. At present we
can invite the University of L. & L. P. in 1930.
I am anxious to see your Museum. As I said,
the '92 matter as we seem perfectly anxious

My dear Prof. Harper -
I am

With regard to the

that I am warmly
interested in your

their admirable
results. I may
conscientiously say that

sorry that you did not

a month earlier, for it
interferes somewhat with
my arranged plans for
the Summer. One question
which I wish to ask
of you very frankly - is
whether \$100 is the
best you can afford
for the work. Three or
four hours a day

is a great deal more
practically that you will meet
I can do nothing else but
devote myself to your school.
I am in a position to do so,
I make at once say that I must
thrust my services upon you & must
confer that I do this with a
small money with regard
to an ideal object, but I am
unfortunately not in the position
of you say that you can afford to

careful before venturing to
give more exact dates.

Sargon's "3000 years" — is
still in doubt. & since the
rules of Adah precede those
of Agade, it does not affect the
great gap between Sargon &
Hammurabi. What we have
enough things to go around 3000
seems a safe date for Sargon —
So at least I believe.

Preliminary announcement of the

the U. of Chicago which
reaches me a few days ago
in the form of "the notable
enterprise of the University of
Chicago which has been engaged
for some years under Prof
Hilprecht with marvellous
success in the soil of Mesopotamia"

I earnestly hope that you will
condemn that statement which
as it stands is misleading.
The exercises at Napping
were conducted Peters &
Haynes & it seems a shame
that they should be deprived
of the credit. I have certainly
no desire to detract from
Prof H's merits but his name
has been that of both his long task
& he ought to be represented with
the glory that this has brought
him. There have been so
many "misunderstandings"
about Napping that it seems
a pity that at this late date,
so misleading a statement

as appears in your circular
should be given publicity -
I am sure that you will
take this suggestion in the
spirit in which it is
offered & I would ask
you to re-examine this letter
as amended & can be published

Dear Prof Barker.

The Congress does not go
exclusively to Phil^a. The formal opening & the
first General meeting takes place in N. Y.; then
the scientific sessions are held in Phil^a; ~~after~~ after
which a visit is to be paid to Baltimore & Washington
& finally we go to Chicago where according to the
program adopted on Saturday, the formal closing
of the Congress takes place; and Dr. Gettler was
instructed to write to you what I doubt not he will
do this week in order to ascertain what further
arrangements you want for Chicago. If in addition
to the closing meeting with addresses (according to our
program) by yourselves, the Pres. of the Congress &
the Mayor of Chicago, you want another meeting I shall
not ^{hesitate} object, though the General opinion was that we
ought to concentrate the scientific sessions in one place.

Moreover, all the foreign delegates & I have no
doubt, most of the home members will come to
Chicago, for as I wrote you Phil^a will provide
for transportation of all our foreign delegates
& obtain ^{weekly} reduced rates for the home members.
This means a contribution of at least \$3000 -
the sum you will well estimate by us as the
cost of railroad transportation. In addition to this
we provide, board lodging & c^o for the
foreign delegates during their stay here & to be
able to extend this privilege to the home
members also. New York slides by her offer of
\$2000, Baltimore & Washington guarantee
\$1000 & I do hope that you will see the
wisdom of asking for \$1000 from Chicago, instead
of the \$3000 so originally agreed upon by you.
We need this amount to pay the difference between
\$50 & the ocean rates that we shall be obliged to
pay; and also to have some fund left for
contingents. The running expenses will initially be
covered by the fees of home members here, which
has been fixed at \$10. In asking you therefore to
reduce the amount of \$3000 originally pledged to
\$1000 I do not think that you ought to feel as though
you were contributing to a Phil^a cause. We cannot be
expected to take the whole burden though we are ready to take
the greater part; and it seems to me that once having
secured \$1000, you will find it easier & interest
the citizens of Chicago to provide for the
foreign delegates during their stay in your city.

Library of
The University of Pennsylvania
Philadelphia 189

We hope to print in a neat & so a proof of
the complete program including formal
invitation &c. I shall send you a copy from
which you will see exactly what is proposed.
Final action, such as election of officers,
affirmation of Committee is left to the
Doctors at their meeting in April next subject to
resolution by the ^{Medical} Society. You will see
that we provide in the Central Committee for
"honorary" members who are elected & contribute
to the expenses &c - for their will assist you for
a list of Gentlemen you wish to have named
as representing Chicago. We have your
name as one of the Vice-Presidents & thought of
course this is only our suggestion ^{as a committee} which I
feel certain ^{it} will be met with a hearty response,
from the entire Board. — As for the other meeting

regarding the errors in the History of Religions,
certain changes were made in the draft,
a case which resembles the "Machinery"!
Very much will I think meet your
approval. I shall send you a corrected
draft in a few days but when it will be
necessary for you to visit this I do not
know as soon as possible. I hope
you will organize a local Board under
whose auspices the lectures may be
given. I shall write to W. H. this
week - I hope I hear from you
soon. I am yours

at Chicago in time for the closing of the
congress this of course unless you (with the
consideration of a large board) meet them in
regard to the members - in this place
perhaps it is better delegates not in their
city and a minute reduced rates as tickets for
the same members - it will be useful to
carry out this part of the program. I should
be very glad to see you every one here, but

The absence of signs, is somewhat
 larger than I anticipated but I
 think it will come back again

 The tablet is very interesting & prints
 important. I am studying the whole
 subject & it contains very carefully
 selected bits of time. I am sure

Dear Prof Harker

I have a

pleasant piece of news
with regard to our projected
International Congress which
London for the present must
be kept a profound secret.

The question of transportation
for our friends from New
York to Washington & from
there to Chicago & back to
New York is settled. It
will cost us nothing. For the
American members, however, a great

reduction in rates is secured.
I mention this to you, for
reasons that I need not state.
but I would ask you not to
speak of it to anybody &
particularly to Caroline not to
say anything of the Road
which accords this privilege to
us. While our engagements are
definitely made, the Road
does not want to have a word
of this breathed you will see
the reason why. This problem
being one of the way we are to
be sure with better assurance
& I write to say that I
should like to have an opportunity
of talking the whole matter over
with you before the meeting of
the Directors of the Medical
Society which will probably
take place next Monday
evening. I may add that
it was through Mrs
Cornelius Stevenson whose
home is a student of Epiphany

Why? On Saturday is possible to you
also concerning me (Mermaid). We know you
do not know when you will be leaving with
any idea of me to go to see you
when you find it convenient to see, then,
my husband is to go with you to Paris
when he goes to the north. I regard this
as important for the success of the Congress &
ask you to fix any time on Thursday or
Wednesday before 4 o'clock when you can see
on her for an hour's talk.
This will be to you, I suppose will have
sent you the same for the meeting of the Congress but

with regard to the Phoenician

me that an electotype of the
seal for publication in the
French Corpus Inscriptionum

to be of great importance &
interest, judging from letters
I have received from Gutting,

you be willing in view of this,
to firmen the "electype" plate,
which was made for Helvetic.

My Dear Mr. Barker

Permit me

to assure you that I am in
no way offended at your
letter. I appreciate its
friendly spirit & am thankful
for its endearments which I
shall bear in mind. As
soon I hear you will not
doubt me of being
deceived by a false bride, I
decline to curtail the
tale in question. I know it

is long, - much longer than
articles usually are in
the Traveller - but this length I
feel satisfied is due not to
difference of style in this
instance but to the discussion
of a number of points which
while I admit ^{that} ~~do~~ ^{deserve} ~~it~~
less directly in the Traveller
of the book yet bear
indirectly upon its contents.
Some kinds of sufficient
importance to merit being
introduced. I worried
painfully over the article for
many months & I should
be sorry if ~~it~~ I were to
lose the result of my labors,
merely because ~~of~~ of the
fullness of my investigations.
I appreciate your ^{interest}
which prompts you to write, asking

me to curtail it because
of the expense involved in
printing, - but if such be the
case, I must ask you as
the only way out of the
difficulty to return the
Manuscript. I cannot
concent to the curtailment
of its contents. Pray, bear
in mind that I shall not
feel as the Traveller disconnected
by the return. Be good
enough to be good & leave
it for his Zephyrus & I
will use it for a number of
volumes while we prepare
issuing in the fall -
