W. A. Harper L. L. D.

My Dear Sir

I am greatly interested in your letter from bro G Hopkins and I am sure that we are all much in sympathy with his views. I saw President Holmes last evening and saw him out a little. As I had already been

most importance to medical education
& though it is humanity that I
wish to occupy your leisure until
we can derive a plan which is
for the best.

Yours Truly

~~Wm. Allen~~
Wm. Allen

P.S. What Dr. Hays has says about Germany is
strictly true as to original investigation in
Physiology, Pathology & Bacteriology. It does not
apply to practice or diagnosis. I hope that
eventually it may even be said again in English.

Wish to inform you on my
belief he is hardly in
favor of your advanced
ideas. I will report
to you early next
week & will take you
out to see the Hopkins
& Collign a week from
next Wednesday.
I do not wish to
interrupt the work
of your time but this
subject is of such

to go wrong as on the
science of medicine.

I have full confidence
that things can all
be fixed

Sincerely Yours
E. Fletcher Rogers

70 State Street,
Chicago.

Mar 25-92

Prof. W. R. Harper

My Dear Sir

Prof. Harius this
morning urged some very
good reasons against vesting
the appointing power of a
medical faculty in the trustees
of an institution apart from
nominations by the faculty.

I call your attention to
them in order that you may
consider the matter from
all sides. He cited two
instances in which this
principle has worked badly

within our own observation.
One outside of a University
president was that of Prince
Bismark who appointed a
charlatan whom he happened
to fancy to a prominent
position. Another was
that of the University
of Pa in which there is
said to be the greatest
dissatisfaction and even
scandals at present
because of the arbitrary
will of the Provost.

You can understand
that in future some

president of peculiar
ideas might appoint
as dean such a man
as Poutt which would
be a lasting disgrace and
a most bitter disappointment.

While you live it
would be all right but
even presidents of universities
are not infallible and
it seems as though there
is nothing within the
whole range of human
thought upon which
the faculty are so liable

until April 5th I think it
will be as well to defer
a meeting of this committee
with you + Dr Goodspeed
until afterward; but as
soon as possible thereafter
I would like to bring you
all together at 5^{or 6} P.M. some
day, and I think it would
be better to meet at my
house for supper. Kindly
arrange a date for this
meeting and in the mean
time let me have any
suggestions that occur to you.

Yours sincerely
E Fletcher Ingals

CHICAGO,

off
March 26 1892

Prof. Wm R Harper

My Dear Sir

I sent you
the paper today but had
not time to state that
the matter was gone over
quite thoroughly at our
faculty meeting. So many
strong reasons were urged
for the general plan
suggested in the #
"Control" of the paper I
sent you, that I feel
very much in hopes that

you will also bring yourself to this way of thinking. You know if a union could be effected we would be as much interested in the University as you would in us in a word we would be one. During the course of what I had to say to the faculty on the subject I said to them. "We must build for the future, to us as individuals it is of

no consequence for we will soon be off the boards". I was greatly gratified at the cordial acceptance of this sentiment and I believe all that was said regarding Control was actuated by this feeling only.

A committee was appointed to investigate and if possible to arrange the whole subject. As the Lake Forest University does not have its meeting

P.S. It occurs to me
that the members of the
Executive Committee appointed
by you annually from the
faculty would be much
more influential in this
subordinate position than
as dean.

My dear Sir

I have the honor to receive

of your letter of the 11th

inst. and am glad to hear

that you are well and hope

to hear from you again

very soon. I am, Sir, your

obedient servant

Thursday & Friday evenings of this
week I shall be engaged. If I can
aid your throat let me know

W. R. Harper Esq

My dear Sir

On returning
to the city this evening I
find yours of 19th inst.

I am sorry the committee
feels as it does and hope
they may think better of
it. The comparison
of Rush with the

It is also untrue so far as requirements
are concerned unless the requirements
have been changed very recently. I am
free to state that my own statements to
you regarding the two colleges would
appear partisan on their face, but
they were absolutely true.

I hope that you may be able
to see me Wednesday or some other time
very soon. Will you if possible arrange
a time by return mail.

College of Physicians +
Surgeons I can not
understand excepting that
the gentleman making it
had been so instructed by
one of the members of
the P+S, for I never
heard such a statement
before and know it is
absolutely untrue so
far as the standing
of the two in the
North West is concerned.

CHICAGO,

Apr 23 1892

Prof Wm R Harper

My dear Sir

I have been
asked by some of the
faculty if you would
be willing to consolidate
Rush with the University
on the same basis as
that adopted by the
Columbia University in
taking in the College

of great interest on hand involving over
a million which I have some hopes of
swinging into the University. I will
know more about it after a
few days.

Yours Sincerely

~~E. Fletcher Drake,~~
P.S. Mr. Fours estate is so tied up that I think
we are completely shut out there.

of Physicians & Surgeons
of W. We understand
that great care was
used in making that
union & it may afford
some practical points.

I do not know the
nature of their arrangement
but have an impression
that the nomination of
faculty does not quite
accord with your views.
I have a matter

Made to remove all
dangers about Hospital
providing it was properly
managed.

E. Fletcher Ingals

DR. E. FLETCHER INGALS,
70 STATE STREET, S. W. CORNER RANDOLPH.
HOURS, 10 A. M. TO 2 P. M.

CHICAGO, Apr 8 1892

Dr. Wm R. Harper
My Dear Sir
I saw today
the president of the
Chicago Dental College of
which I spoke last night.
It is the largest, + probably
best equipped dental college
in the world. Over 300
students. He is very anxious
to effect a union with
the University. I told

is to keep quiet until
 after the next meeting
 of their trustees & then
 to make a strong hard
 pull all together. In
 the mean time I will
 see Dr. Lawrence & see if
 we cannot get the
 Baptists to endow a ward
 at the Presbyterian Hosp
 which would give them
 the very best hospital
 facilities at a small
 cost and could be

him that to do so two
 things must be accepted
 in the beginning viz
 high grade & University
 control. I pointed out
 to him some of the things
 they would have to do
 and found him in favor
 of it if it should be practically
 I have asked him to do
 nothing just now because
 it is not well to goad
 our friends. I believe
 the best plan for us

507 West Adams Street.

April 5th 1892

Rev. Wm. R. Harper

My dear Sir

The Lake Forest
people held a meeting today
at which they unfortunately
did not say "Go & God
bless you" but they seemed
to appreciate our position
fully. They are extremely
anxious to retain the college
which this year adds

over 600 to their roll of
students & they are
going to make an effort
to raise a couple of
million. I wish they
would raise it & give it
to the Chicago University.

We will have our
conference Thursday evening
and can I hope come to
an understanding as to
what may be done.

You can give us your

views and find out
what manner of men we are,
and then if necessary we
can wait a little while.

Yours Truly
E. Fletcher Ingalls.

RUSH MEDICAL COLLEGE,
MEDICAL DEPARTMENT OF LAKE FOREST UNIVERSITY.

Please address reply to my
residence 507 W. Adams St.

CHICAGO, May 11 1892

Chicago
Prof Wm R Harper
University of Chicago
Dear Sir

On behalf of the committee appointed by the faculty, to inquire into the policy of the University of Chicago regarding a medical department, I wish to ask you to kindly inform me when and on what basis the medical department will be established.

As you are aware Rush Medical College was the medical department of the old University of Chicago, but after the abandonment of that institution Rush entered into, and still holds, a similar relation to the Lake Forest University, a union, however, from which either party may withdraw on giving proper notice.

We feel that our allegiance is due the Lake Forest University, providing it is able to place the medical department in the first rank of medical schools, a position to which it is entitled by name.

Please address reply to
Overseer 807 W. Belmont St.

Chicago
May 11 1895

Dear Sir
University of Chicago
Chicago, Ill.

On behalf of the
committee appointed by the faculty, to
organize into the faculty of the University of
Chicago regarding a medical department
I wish to ask you to kindly inform me
when and on what basis the medical
department will be established.

As you are an eminent Rush Medical
College and the medical department of the
University of Chicago, but after the
of that institution has entered into, and
with a similar relation to the Lake Forest
University, a more, however, from which
party may contribute or giving paper
letter.

The fact that our college is
the Lake Forest University, providing it is
able to place the medical department in
the first rank of medical schools, a
factor to which it is entitled by reason

CHICAGO, 189

of age and prolonged faithful medical education.

I have heard from several sources that the Trustees of Lake Forest University are liable to abandon their present university organization and advance the institution to a college of very high order.

If this is done we shall be free to seek new alliances. If the Trustees of Lake Forest University still wish to maintain a University organization I believe they will raise a sufficient endowment to place the Medical department on a proper footing, or failing in this will willingly release us from our present relations in the interest of higher medical education.

In view of this it seems to me that as the University of Chicago has regained new life it would be eminently proper that the Medical department of the old University, which has steadily maintained its usefulness and good character, should be adopted by the new & vigorous University.

Yours Respectfully,
E. Fletcher Regis, Registrar.

Chicago, 1890

of age and pathology faithful
laboratory
I have had from several sources that
the history of the first university
to establish their present university
and discover the institution to a college
of very high order
of this is done (or shall be for the
out been otherwise, of the history of the
first university with which to concentrate
university organization of which they will
have a sufficient instrument to have the
medical department or a proper footing
further in this will multiply which in
from our present status in the interest of
highly medical education
The case of this it seems to me that
as the University of Chicago has organized
from life it would be a very proper thing
the Medical Department of the University
which has already maintained its reputation
good character, which is applied by the University

56 Washington Street.

Chicago July 16-92

My dear doctor Harper

I believe that with
your aid we will before
long have one of the very
best medical schools in Chicago.

I think we will get financial
aid. Dr Earle who has seen
you a few times with reference
to the P.S. has accepted the
Chair of Obstetrics & diseases
of children in Rush. He was
the one really valuable man
^{for us} they had. They have two other
very good teachers but circumstances
prevent our taking them.

We have just bought
125 ft front on which to
erect a laboratory.

Yours Sincerely
E. Fletcher Ingals.

Chicago Oct 15 - 92

My dear doctor Harper

Yours of 13th recd,
Unfortunately I have to
go out of town this
evening & will be
absent until next
Thursday morning.

At your early convenience
thereafter I will meet
you, at 1212 Chamber of
Commerce, or will come
down to your residence

the Unanimity. I think we can lay
out some plan whereby the best thing
may eventually be accomplished.

Yours Sincerely
A. H. Weston
Bryn Mawr, Pa.

P.S. Select your time & I will meet you.

if you. I have to
lecture at 8 AM Monday
and Tuesday and at 2
PM Wednesday every
week, and would much
prefer not to interfere
with these hours, though
I could have them filled
if necessary. I have
pondered and prayed
over this matter until
I individually am
prepared for anything
that is best for medical
education in general and

but little below it now.

Harvard will require
^{beginning this} next year 4 yrs of study which
should include four terms years
of 36 weeks each in the college.

We have already announced
for next year a requirement
of four years of study (this
is already demanded) to include
three years of eight months
each in the college. Our
facilities in ^{some} ~~many~~ respects
are better than those of Harvard
and will I think next year
be equal in all respects.

507 West Adams Street.

Ingle
1904

Oct 11 - 92

My Dear Doctor Harper.

I have just received
your letter and feel encouraged
to work in a course upon which
my heart is set. I want
your advice about seeing
Mr Ryerson. He like you
is in favor of a high standard,
and we are all with you
in this respect, though our
opinions differ as to how
high it should be at first.

and how long should be
given to reach the
plane you desire.

You have adopted ^{Harvard}
as a standard for the
University; but its standard
for commencement of a
Medical education does
not reach yours, indeed
it is very little beyond that
we already require. Would
it not be best for a
few years to be content

with as high a grade
as Harvards? I believe

We could all unite on
this. Harvards grade at
present for admission is
a trifle higher than that
of any other medical school
in this country unless it
be Yale - that I do not
know about, but presume it
is no higher than Harvards.

We could easily reach Harvards
grade for graduation in
medicine, indeed we are

507 West Adams Street.

Knowing what you do, would you think it best for me to go over the water with Mr Ryerson or is it better for me to see you first.

I know you are overwhelmed with work just now, and I do not wish to waste a minute of your time, but it will be necessary to keep track of a few men.

who should be seen,
and I think much quiet
work ought to be done
before Christmas.

You will be interested
to know that we have already
enrolled over 600 men this
winter and a finer class
of men cannot be found
in any medical college,
through the preliminary
education of some of

them is deficient.

I congratulate you
on the great success of
your and our University
and I hope for it and you
the greatest degree of
usefulness

Yours sincerely
E. Fletcher Ingalls

would not be a good person to crowd among them; and certainly the majority of any faculty that the present board would appoint could be trusted to endorse the wise action of any subsequent board and not to obstruct for petty reasons.

Physicians know much better about the qualifications of medical men, social, moral and scientific which are fitted to make them proper instructors than do the laity. This same argument might apply to other educators, but to few, if to any, with the same force as to medical teachers.

We must all look to the future in this matter. Dr. Harper's ambition is to make this equal to the Universities of Europe. To do this in the medical department will require the aid and advice of thoroughly honorable and unselfish medical men; with such I

Venetian Building,
36 Washington Street.

Chicago. Nov 14th 1892

My Dear Doctor Woodruff.

Our recent conference was so hurried that I was unable to present my case fully or to obtain your views on all points.

During the conversation Dr. Harper suggested that if there was sufficient amount of money in it, the trustees might make some conditions.

It seems to me that ~~for~~ clinical facilities that must be had, and which could not be duplicated for more than a quarter of a million; and ^{for} the long line of alumni whose influence would be secured, ~~then are~~ sufficient considerations for two conditions.

Conditions which it seems to me are due the trustees of the medical school & without which

Ingle

Wells

I think the latter would be morally and probably legally unable to act.

1st The medical school should be forever maintained as a high grade school and the University diplomas should be issued to no other students of medicine.

2nd The trustees of the University should appoint no one to the faculty who was objectionable to a majority of that body.

The first seems necessary to maintain the integrity of our contract with the hospital, and to prevent the institution, under certain conditions, from becoming the flag end of a lot of others which by future changes in the board

of trustees might be enabled. What would be for the interest of the Medical school in this respect, it seems to me would be certainly for the interest of the University as a whole, and I cannot see how a body of fairminded men could object to it excepting as stated farther on.

The second condition seems necessary to the fulfillment of our moral obligations to the hospital, as well as to our alumni; and it appears also, at least an implied obligation, which our trustees owe to the state.

In this also the interests of the medical school are clearly those of the University. The faculty would be appointed according to your present view; the check would only be needed to prevent some such ^{future} calamity as suggested in the hypothetical case I brought up at our last interview.

Certainly a person who for any reason was objectionable to more than half of any faculty

If the University is not yet ready
to take up the medical department,
could not some preliminary arrangement
be entered into early in '93 which
would secure a perfect union
after 2, 3, 4 or 5 years when the
necessary funds are secured,
or by which time the college
might already be on the high
plane desired, with possibly
even larger classes than now.

The aid I hope for and the favorable
action of our trustees seem to me
largely contingent on action within
a few months.

Please consider these suggestions
carefully with Dr Harper, and
give me your combined, best judgment
on each and all of them.

Yours Sincerely
E Fletcher Ingalls

Venetian Building,
36 Washington Street.

Chicago _____

and sure you would be dealing
in the present case. I do
not deem it selfish to work
for the immortalization of an
old and honored institution
even to the exclusion of others.

The University of Chicago will
honorably work for its own
interests against all others;
and thus would we work
for it and its medical school
but none of us for personal
interest.

The only objection I can
discover to the 1st condition is
that it would prevent the
formation of schools organized
to teach so called homoeopathy

hydropathy, eclectic or botanic
medicine, Christian science, etc. etc.

The University cannot afford to
adopt any narrow bias or espouse
any pathos, or new or old medical
dogmas. The regular profession
has for 2500 years adopted all that
has proven good in the healing
art, and during this time it
has persistently refused to accept
or adopt thousands of startling
and fanciful theories which
have often taken deep hold of
some of the laity. This same
course the profession will
pursue in the future. But,
you will say, there are many
who believe in homoeopathy!
So there are many who believe
with their whole souls in
Christian science or the faith
cur, but there is no need

for a college on faith cur.
As to homoeopathy there is

nothing distinctive about it
outside of therapeutics. Its
remedies are all borrowed from
regular medicine, but there
are some who with Hahneman
believe that the more minute
the dose, the greater the effect.

We do not think so; but in defence
to those who believe better effects
are obtained from small & oft
repeated doses, I think it would
not be specially objectionable
to establish one chair of
therapeutics which should teach
their peculiar views, and I
think the majority of the
faculty could be brought to
favor it if done in the proper
way frankly and honestly.

Venetian Building,
36 Washington Street.

Ingle

Chicago, Nov 24th 92

Dear Doctor Harper

For reasons which I
will explain to you or which
you may possibly hear from
Dr E. it is probable that only
some of their directors would
have to be obtained.

Please let me know at your
earliest convenience, what time
we may have a meeting at
the Union League club as
suggested last evening.

I think the financial plan
of which we talked last night
will be accepted by Dr E.

Dear Doctor Hoffman

For reasons which I
will explain to you in detail
you may possibly have found
it is also probable that you
know of their character (would
be to be retained).

Please let me know at your
earliest convenience, what time
we may have a meeting at
the Green Paper Club as
suggested last evening.
I think the financial plan
of which we talked last night
will be accepted by Dr. E.

He will try to see you
within a few days. This
man who has made himself most
obnoxious to us has also only
tried them and it seems to me
probable that he can be quietly
dropped, though possibly it might
be necessary to carry him ^{outside},
I hope not.

Please destroy this + oblige
Yours Sincerely
E. F. Alden Ryals

the same as for entrance
to the Sophomore year & the
next a thorough sophomore
education, but we are not
particular about this. With
that plan it would be higher
than any other school in this
country from the very first.

Yours sincerely
E. Hutton Ingalls

Prof. Dr Goodspeed will give
you some amendments to
the figures I gave you &
this I believe fully covers everything.

Prof Hamilton of Rush is out of
the city & cannot be seen but he
will go with the majority. Prof Brown
is in Europe & is anxious for the union. All
others are heard from.

1
no any /
Ingalls
Chicago Nov 25-92

My dear Doctor Harper
The last of the Rush
professors whom it was
necessary to see has been
seen and I have to report
that they are all in favor
of this new project of yours.

The last reports from the
Prof were equally favorable as
might be expected. Dr Goodspeed
this morning thought you wish
to see me with Van Ryerson
and even our conservative President

recommends that we have
our plans well formulated
before calling the faculty
together to meet you
so that too much time
need not be spent in
talking. If we are wise
and fortunate I have a
hope that it may be
definitely settled at that
first meeting so far as
the Wolfe & Rush are
concerned. I hope Mr
Ryerson can furnish
the financial plan.

Next Thursday evening would
be a good time to meet
at the Union League at
7.30. Let me know early
so that I can notify every
one in time. The preliminary
meeting between Mr Ryerson
you & myself could be at
any time excepting Monday
or Tuesday morning. ~~or~~ Tuesday
afternoon would be all right.
Prof Holmes suggests that
financially it would be much
better for the University to require
for entrance next fall the same
grade as for entrance to
the University. The following year

Ingals

CHICAGO, *Dec 2* 1892

now
My dear Sir

Rush college building
is 16 yrs old + will stand
for 75 years to come.

The P.S. part of it
is 10 yrs old + part 6 mos.

There is a clean equity
of \$100,000 in Rush
& about 40,000 or 50,000
in the P.S. When you
consider the 50,000 I

for the other departments. I have
already written you this morning
& have talked with Dr Parker. I
wonder that the lady cannot see
more the benefits of medical education,
but they probably never will. So far
if possible very soon

Yours sincerely
E. W. W. W.

could bring with Rush
The good will it
will cost a new
institution many expensive
years to obtain. I
nally believe that
\$1000000, put in the
University today would
not be a cent more
valuable than the
two colleges. A medical
school is fed by
its alumni & they
would be great judges

which would never have happened but for the researches of the past ten years. Think also of the terrible diseases which still devastate our homes which may be prevented when we know a little more, of diphtheria, scarlet fever and consumption, and surely we cannot conceive of so beneficent a work as that to be accomplished by a great + thorough medical school with thorough support for original research. If you can do this the problem is solved.

Yours sincerely
E. H. Ingals.

A thousand lives a year saved to this city + the north west would be a small estimate of the good to be done by this work. ^{Vegetian Building,} ^{36 Washington Street.} ^{Chicago}
Thought I would say
My disunity was
made. Will
you show them?

Wm

Chicago Dec 2nd 92

Ingals

Dear Doctor Harper

If you + Dr Knapp with other friends of the University could place the matter before Mrs Reynolds I have not the slightest doubt she would put her \$250,000 into the medical department \$100,000 into laboratory + buildings + \$150,000 to endow the chairs of Bacteriology + Physiology.

Name the Laboratory & the
Chair for her.

The importance of this
matter has never been
appreciated. I saw a few
days ago that 30,000 had
been spent for books; I
have seen your own
precious library, but we
all know they would not
weigh a moment against
the life of one of our children.

The men trained here
today will in ten years

be our active physicians
in whose hands will be
placed the lives of those
we love best. Think of
the millions who have been
saved by Jenner's thirty
years of experimentation,
of the hundreds by

My dear Doctor Harper

In line of a
conference Dr Holmes would
like very much to talk
with you some day.

Last night he suggested
inviting you out to lunch
some day. I wish you
would kindly drop him
a note sending it to
The Chicago Opera House
Bldg stating what day

he could see you a
short time. It is not
with a view to pushing
things now but that
you may have an idea
of his views of medical
education which may
be of value in future

Yours Truly
E. Fletcher Ingalls

Dear Brother
 I have just received
 your letter of the 14th
 at last but so late that
 it will be impossible to
 answer for a number
 of days. I will be glad
 to hear from you again
 and will be glad to
 accept of a share
 about it. I am well
 and hope you are the same.
 I am ever your
 affectionate brother
 Wm. W. Phelps

again, receive a University diploma all others
to receive simply college diplomas. Let those who
receive the University diploma plan after their names
M. D. U. C. Then an probably from 30 to 50 in
each class of
the two schools now who have already the Bachelor of

Arts degree & there would be able to get the M.D.; U.C.
The number would rapidly increase every year & yet
the others would be getting instruction better than
any other place in the west & equal to any in the
East. After 1900 (now but M.D.; U.C. degrees would
be pinned. It seems to me this would be a constant
stimulus to young men without being an insurmountable
barrier to many who want to come here. The entrance requirements
of Harvard could be demanded of all within two years without
financial loss. Please reply to the early part of this letter

over & let me know what night you can be at liberty
yours sincerely
E. Helton Ingals

Ingals

My dear doctor Harper
With a view to
getting more definite ideas
and a clearer understanding
of the possibilities of a
Medical department of
the University; but more
especially to get the
matter into other papers,
Mr Kohlraat & I have been
planning a meeting
at the Union League Club

P.S. I believe there is some way whereby the school might be started without driving so many students away & yet with honor to the U & blessings to the largest number of mankind. The plan I suggested to Mr Ryerson may not be feasible, but there must be some way. Think of the following: Make a Medical department with a grade ^{equal} to that of Harvard & steadily pass onward & upward until in 1900 all students would be brought up to the high grade you desire. In the mean time let all those who have interest with ~~an~~ ^{now} an education such as you & I think should be had, to properly commence the study) & who take the longest course in course

some time (next week; say Wednesday, Thursday or Friday. I want you, Dr Goodspeed, Mr Ryerson, Dr Parker, Mr Fred Park, * Mr Hutchinson & Mr Kohlraat & about twenty physicians. My plan would be to have a supper about 6.30; a discussion afterward with reports by stenographers. Then have stenographers report carefully revised & furnished simultaneously to all the papers.

for the next few years. It occurs to me
that you individually are trying to do too much.
You cannot continue to work day & night as
you now do with safety to yourself. The brain
needs rest more imperatively than the body.

Yours truly
A. M. Williams

My dear Doctor Harper

I understand that many of the Presbyterian Ministers are opposed to a union of Lake Forest with Chicago U - because they now have the privilege of educating their children there free of tuition.

This comes to me from one of the professors at Lake Forest & probably

will see to inviting a few physicians
to discuss the medical school problem with
a few of your board. I question the wisdom
of a premature discussion but think the
report might be edited so that it would
be safe. I wish to discuss with you some
time the plan I have perfectly outlined to
Mr. Rynow; also the one I wrote to you. I
can discuss no valid objection to something
of the sort and can see how it would be
worth \$20000 to \$30000 per year to the University

has some foundation.
The enclosed slip has been
published in two of the
medical journals here,
by what authority I know not,
but I presume that the
rumor reached ^{one of} the editors
accidentally & that one
copied from the other.
Will you kindly let
me know if you have
a spare evening the coming
week. I will then see if
Mr. Kohlsaat still wants
a meeting & if he does I

Inglis

Feb 1st 1893

I have just heard
 that an effort is being made
 by some persons to get
 the P.D. to enter the
 State Bar Association
 with the Chicago Bar
 College. I do not think
 they are serious, therefore
 do not feel at all
 nervous about it. I

report it to you (merely
 to keep you posted),

Mr Medill's letter is
 certainly encouraging.

I saw Dr Goodspeed yesterday
 and from talking with him
 and others I think Mr
 Kohlrausch's suggestion about
 a meeting had not better
 be acted upon at present.

Yours sincerely
 E Fletcher Rogers

The most strict preliminary examinations for admission to any American medical college are about equal to the minimum requirement for registration as a medical student of the General Medical Council of Great Britain, and are far below the standard of the countries of Europe.

The Royal Infirmary, which has made the Medical School of Edinburgh a brilliant success, had cost, between 1869 and 1886, over half a million sterling; the University of Pennsylvania has paid over more than a million and a half dollars during the past twenty years in order to control clinical teaching for its advanced medical students.

At Columbia they have practically abolished the Senior year of the college department for medical students, permitting them to take the last year of

through it, found the gray matter thin and composed entirely of pigment cells. Down near the Island of Reil, however, I found a few brain cells proper. In one I saw, with my microscope, the Declaration of Independence, and in the others titles of Sunday School books. The Cerebellum was largely developed, as was the Medulla oblongata. Under the Medulla and living close to the magnum I found a physician's certificate to practice, but in so crumpled and discarded a condition that I came near overlooking it entirely. I could just barely make out that it had been given by the Iowa State Board of Examiners, the balance was obliterated. Since making the above examination I have inquired much about this peculiar animal and have found that they are quite common. In fact nearly every young doctor

Dr Wm R Harper

My Dear Sir

You will be
interested in the enclosed
showing the cost of
providing clinical material,
yet our facilities are much
better than those of the Uof
P in many respects if not
in all for clinical work
for example, it is reported
that very few of their
students have any opportunity

147

P.S. I received your kind invitation to
the Spring Convocation and President's
reception but fear I will be unable
to attend

E.F.D.

to obtain personal instruction
in ~~the~~ clinical gynecology
or obstetrics which every
one of our graduating class
has. They usually see
many of the former cases
and all attend (with the
obstetrician) at least one
case of obstetrics. This last
we would not boast of in
Vienna but it is here a
cause for sincere congratulation

Yours sincerely
E. Fletcher Dugale

Chicago Aug 4-93

Ingals

My Dear Doctor Harper

The following copied
from the constitution
of the Massachusetts
State Medical Society
regulating admission
of members is the
standard of the regular
profession and is
the proper basis
for a medical school

xxx "Every candidate must
by proper credentials and
examination satisfy the
censors xxx that he does
not profess to cure diseases
by, nor intend to practice,
spiritualism, homoeopathy,
allopathy, Thomsonianism,
eclecticism, or any
other irregular or exclusive
system".

This I think places
the matter in the
clearest light that
I have seen, and it
is what the educated

and honorable members
of the regular profession
throughout the world
demand. There constitute
 $\frac{1}{8}$ of the ~~the~~ whole body
of doctors in civilized
countries.

Yours Truly

E. Fletcher Ingals.

P.S. I tried to see Dr. Goodspeed
about water taxes. The city
authorities had decided that
the Chicago University must
pay, but I hope we have
given them a quietus.

that our great prestige
may be utilized for the
benefit of a great university
and we might be correspondingly
aided in elevating medical
education to a higher plane.

If you can see your
way to giving me an hour
or two some Wednesday between
3 and five let me know,

Yours sincerely
E. Fletcher Ingalls

Venetian Building.
36 Washington Street.
Suite 1209-18

Chicago.

Ingalls

19

Sep 30/93

My dear Doctor Harper
I received an invitation
to your Fall convocation which
I greatly regret I am unable
to accept because my college
work has begun and I cannot
spend the evening out, before
a lecture.

I wish you could find
some time to look over our
new laboratory. I would
be greatly pleased to show it
to you some Wednesday
afternoon & I am confident
it would interest you.

From your general interest in education you will be glad to know that notwithstanding more stringent preliminary requirements and a demand for three full years of night (instead of six) months each in the college besides a fourth year of study we have the largest class in our history. We have added many younger men

to our teaching force and divided up the class into comparatively small sections when they are getting very thorough training.

I want to talk to you of a plan for the medical department. I know there is no money now & probably will not be for some years; yet there is a way which I believe feasible to get things in shape so

P.S. I enjoyed the ball game
very much and hope often to
see similar contests, which
must do much to develop
the esprit de corps of the
institution. I did not remain
quite to the finish because
of another engagement, but
it appeared that the Michigan
boys weighed too much for us.

In considering the matter of
my letter do not overlook its far
reaching influence, not alone
on medical science, ^{but} for the
welfare of the 20,000,000 people
in the North West, all of whom
need the best physicians they
can obtain, but the great
majority of whom are unable
to secure the highest grade

that would be produced.

My letter explains to you
a part of what I meant by
saying that something must
be done within a few months.
E. J. J.

Confidential { We dedicate our new laboratory
building Monday and I think
all of the Presbyterian ministers
in the city have been invited.

We have been at work in
the building for several weeks but
delayed the dedication to the anniversary
of the first lecture in the college.

Venetian Building

~~My Dear Doctor Harper~~

I have today received
a promise of \$50000. for the
college providing I obtain
its permanent union with
one of the Universities.

If the plan I recently
suggested could be carried
out I believe this would
be but the beginning of
great things.

Yours sincerely
E. Fletcher Ingals.

all experience. You will go on until suddenly, without warning, the cable of your life breaks or you will be left with a brain unfit for your work. Your individuality is of too great importance in this great undertaking to excuse such a sacrifice. I am not given to predicting calamity but I know of what I now speak & in the realization of my own danger which was happily averted, only by circumstances, I feel keenly your need to heed this warning.

Each of us believes that such warnings properly apply to others but that we individually can stand it. If you go on thus the world will lament your early loss, the institution you are so ambitious for will not be able to adequately fill the place, and in place of the honor due you even your weeping friends will be forced to say, what a f—! Yours Sincerely
E. H. Jurgals,

Jurgals

Venetian Building,
36 Washington Street.

Chicago Nov 17-93

My Dear Doctor Harper
On reviewing my hurried conversation with you last night, it is suggested to me that I must have appeared to you rather in the light of an advocate than as one simply stating facts; but I wish to assure you that all I said had been thoroughly thought over many times, excepting the hasty computation regarding the cost of a hospital. Even in this I do not think I was wrong. The Presbyterian hospital here is one of the best ^{managed} institutions of the kind I know of but notwithstanding that about

⁵/₆ of its beds are constantly filled with pay patients, brought there ^{mainly} by the reputation of its staff, ^{who pay from \$8 to \$30 per week.} The Superintendent told me recently that there was a large annual deficit that had to be made up by donations. If my memory serves me, this was about \$60,000 per year which would be 5% on a large sum. Of this I am sure - when the hospital was organized it was estimated that \$5,000 would properly endow a bed but the Supt. told me a few weeks ago that the interest on that sum at 6% was not sufficient to pay the expenses of one bed for a year.

You can easily estimate what 300 beds would cost, what a building would cost, and you find not more than \$200,000 left from the \$2,000,000. The interest on this sum would

certainly be used every year for incidentals even if a deficit did not occur on each bed.

But laying aside what I said about schools - as a friend and physician I beg of you not to take on new burdens, but to lay off some you now carry. I do not see how you can get eight or nine hours rest daily with your present duties and I know you cannot endure without this much. I have seen Professors Knox and Parkes go down in this way. Earle is now on what may be his death bed and I have known many others who have suicided in like manner. Your vigorous frame will bend, but worse than all, your keen intellect will cloud under this strain. You may stand it 2 or 3 or 4 yrs, and you think you will stop in time; but this is contrary to

Ingalis

Venetian Building,
36 Washington Street.

Chicago

Nov 5/93

My dear Dr Harper

Can you not arrange so
that I can see you some time
soon, as suggested, ^{by you at luncheon, or} while in ^{Northwestern} ~~Northwestern~~.
would appear that nothing can
be done now, I believe something
could be ~~at~~ practically no
cost to the University and
yet add between 600 + 700 students
to their annual lists. Of course
I, in saying this, look forward
to endowments within five
years that would pay the
teachers. I would not
trouble you about it now

if I did not have your
nervous for fearing that
a delay of a year or more
will render it impossible to
accomplish what I wish.

I firmly believe that
\$2,000,000.00 and thirty years
would not place you in ^{for medical testing}
as good a position, as you
could assume next year if
your trustees would assume certain
namable responsibilities and make
certain equally namable pledges,
that would cost them nothing.

I am yours very truly
W. H. Miller, Jr.
