

UNIVERSITY OF ILLINOIS
PRESIDENT'S OFFICE

Urbana-Champaign, Illinois

November 11, 1916

President Harry Pratt Judson
University of Chicago
Chicago

My dear President Judson:

I see from the paper this morning that the University of Chicago is again blessed with a great opportunity. I am sure that it will utilize this opportunity in such a way as to make it of unending blessing to future days and generations, as well as to our own. I am greatly pleased that this chance has come to you before you lay down your high office, for in my opinion in all the years to come this will be noted as one of the most important events of your administration, and will have a very far-reaching effect upon the policies of the universities in the Mississippi Valley in this important field.

Faithfully yours,

Edmund J. Snodgrass

Chicago

My Dear President Judson:

I see from the paper this morning that the University of Chicago is again blessed with a great opportunity. I am sure that it will utilize this opportunity to the best advantage. It is of unusual blessing to have such a distinguished man as you to the University and I am greatly pleased that this chance has been given to you. I am sure that you will be able to do much for the University and I am sure that you will be able to do much for the world.

I am sure that you will be able to do much for the University and I am sure that you will be able to do much for the world.

Respectfully yours,

Charles J. Lummis

Chicago, November 14, 1916

My dear President James:

Thank you very much for your kind note of the 11th inst. The work which we are undertaking I know will commend itself to your judgment and sympathy, and I am, I need not say, gratified with your kind words.

With all best wishes, I am,

Very truly yours,

Dear President Judson:

You are to be congratulated on the announcement this morning of the plans of the University of Chicago for the development of its Medical School. I have known something of your expectations for the South Side and also something of the negotiations with the institutions on the West Side. It is a very happy arrangement with which they come into the general plan. Please accept my sincerest congratulations.

Yours faithfully,

Thomas G. Holyoke

92

Chicago Ill.

Nov. 12th 1916

I
President B. P. Hudson,
of the University of Chicago.

My Dear Mr. Hudson:-

After reading about
the proposed Medical
School on the midway
in connection with
the University of
Chicago, last evening
in the different Papers

I had the impulse to write and ask if the poor Old Baptist Hospital could be remembered in any way.

The Hospital^s mentioned in the papers all have such a good standing any way and plenty of means.

There were twenty classes of nurses graduated from the Chicago Baptist Hospital and all our nurses feel the loss so keenly

of our Institution. If
the Baptist Church
people could help you
in some way.

I am the Secretary of
the Alumni Association
and am pleading for
our members.

I feel you are a
Baptist, as is Mrs.
Rockefeller.

I am a member
of the Second Presbyterian
Church; yet I pray for
the Baptist House. We
do a good work.

Yours Sincerely
Eleanor Foster R.H.
Sec.

Chicago, November 13, 1916

Miss Eleanor Jester
828 E. 48th St., Chicago

Dear Miss Jester:

Your favor of the
12th inst. is received. The University
is not planning to extend any aid to
hospitals. The Presbyterian Hospital
is in a position to give material aid
to the development of our plans. It
would not therefore be practicable to
consider the matter which you are
kind enough to present.

Thanking you for the suggestion,
I am,

Very truly yours,

H.P.J. - L.

P. O. STATION 20

NEW ORLEANS, December 14, 1916.

President Harry Pratt Judson,
The University of Chicago,
My dear President Judson:-

I want thus to join the many other alumni in telling you that I am rejoicing in the now assured ability of "Chicago" to take the lead in the actually scientific training of students of Medicine. My six years in residence at the University, as graduate student and teacher in Anatomy, developed my abiding keenest interest in her progress as well as my sincere and loyal attachment for her, and when I read in the press more than a month ago of the wonderful prospects evolving for her school of Medicine, I was very much elated. Added to this, I have just read in the last number of the U. of C. Magazine the statement from your office giving the plan and prospects and my gratification and joy are almost complete.

I know that the plan has developed through your interest in higher ideals in scientific training and that its accomplishment is the result of your efforts and leadership, and I want to tell you that I know this.

I had the privilege of teaching the first class of medical students at the University after the fusion Rush, and during the more than ten years since in which I have been dealing with medical students, in the University of California and here, I have preached my conviction, often against fearful odds, that students of Medicine should be taught throughout as though each is in training for a career of original research in Science, that by this idea in practice some would be stimulated into such a career (the only ones worth while) and the others would be either eliminated or all the better trained. Now that you

Prof. & Head of the Dept. of Anatomy.

Chicago, December 18, 1916

My dear Mr. Hardesty:

Thank you very much for your kind note of the 14th inst. I am sure that you do deeply appreciate what the prospects seem to warrant for our future in medicine. We have at last been able to undertake a campaign on the right basis. While we have yet a good deal of money to raise, I feel very sure that it will be raised, and that we shall have a foundation here worthy of the University of Chicago and worthy of the high ideals which our scientific men have from the first maintained. Frequently in the last ten years something might have been done in the way of medicine which would have been inadequate, but we declined always to undertake such things. Again thanking you, I am,

Very truly yours,

OFFICE OF THE PRESIDENT

December 18, 1916.

My dear President Judson:

Some time ago I saw an announcement in the newspapers of the plans of the University of Chicago to create a great medical school. More recently I have read the details in Science.

This note is to congratulate the University of Chicago and the country upon the certainty of the establishment of a great first class medical school in the second largest city of the United States.

It seems to me that the University of Chicago has been administered with singular wisdom. De-

partments and schools have only been added as
this can be done upon the highest standards and
with adequate support.

With best Christmas wishes to you and Mrs.
Judson, I remain

Very sincerely yours,

Charles R. Pratt

President Harry Pratt Judson.

Chicago, December 20, 1916

My dear President Van Hise:

Thank you very much for your kind note of the 18th inst. We have not yet completed the fund which we need in order to organize our medical schools, but of course we confidently expect success in the not-distant future. I appreciate very much your judgment in the matter.

With all best wishes for Mrs. Van Hise as well as yourself, I am,

December 19, 1916.

President H. P. Judson,

University of Chicago, Chicago, Ills.

Dear President Judson:

Mrs. Mathews and I very much regret that we cannot be present at the dinner in your honor tonight. I tried to have the date changed to one more convenient for us, but this date was the most feasible for others.

I have already expressed to you my great admiration of the way you have brought this matter to a successful end. It must be a source of the liveliest satisfaction to you after these trying years to have established a school of the highest ideals, so that its future greatness and usefulness is completely secured. I congratulate you again on a great achievement. We in the medical faculty know at least some of the difficulties you have had to meet and we honor you for the way in which you have met and overcome them. I do not believe that there has been any greater achievement in the history of the university, nor any one thing done of greater importance to the University and to the community than the establishment of this professional school with the ideals you have incorporated in it. The effect will be felt on the whole future development of the University. It is not the Medical school alone that you have founded and endowed with noble ideals, but every professional school to be established in the future.

Mrs. Mathews joins me in expressing these congratulations to you and Mrs. Judson, and we join in the happiness which it must be to you both.

Very sincerely and faithfully yours,

Albert P. Mathews

The University of Chicago

CHICAGO, ILL.

December 26th, 1916.

My dear Mr. Judson:-

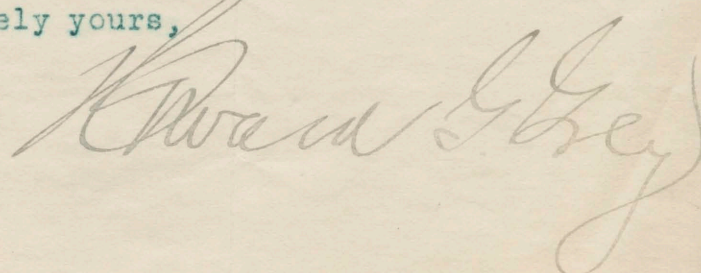

Accompanying this you will find an announcement of my father's subscription to our new Medical School. I believe he would have made a larger subscription had he not just pledged \$10,000 towards the proposed building of our Evanston Hospital, which is so greatly needed, and a smaller amount towards the projected Woman's Building of the Northwestern University.

✓ When you come down to the little fellows, I want to "have my finger in the pie", and greatly regret that my circumstances hardly allow me to make my pledge in the thousands of dollars.

Robert Scott and I were so sorry to have to leave the dinner at Ida Noyes Hall before the program was finished, thus missing the presentation and your response. As it was, neither of us reached home till half past twelve o'clock. It will not do to hand out bouquets before our task is finished, but anything that will breed interest and enthusiasm for the project is highly important and I am confident that you called attention to the distinction.

With regards to Mrs. Judson, I am

Sincerely yours,

Harry Pratt Judson, Esq.,

letter with regard to your father's subscription toward the

medical school is received, and is hereby acknowledged. I

am very much gratified at his generous gift, and am delighted

to have his name on the list of our donors toward this great

purpose.

I shall be glad indeed to have your name also included

when the time comes, for such amount as you feel able to give.

The dinner was managed in such a way the other night

as to be extremely slow, and I was sorry that you and Mr.

Scott could not stay through. Of course it was impossible,

as it turned out. If you had heard the speeches you would

have seen clearly that the distinction to which you call

attention was very plainly made. The purpose of the dinner

and the memorial was to express the cordial and enthusiastic

interest of the entire faculty in the undertaking. It was

not congratulation on having finished the task, but
congratulation on having made a beginning in the right way,
which they had in mind. I have been much gratified to find
that the entire University, without regard to department,
are very deeply interested in these new plans.

With sincere regards to Mrs. Grey as well as yourself,
I am,

Very truly yours,

H.P.J. - L.

Dear Dr. Judson:

Your note with
the article concerning the
medical plans was duly
received, and I am pleased
to learn thus more definitely
just what this far-reaching
movement expects to accomplish.

I showed the article to
our son - Mr. Albert W. Harris -

who read it with interest
and asked permission to
keep it.

As for myself. I have
other plans for my surplus.
but I shall watch with in-
terest the development of this
gigantic plan for Chicago's
betterment, and that means
the world's enrichment.

Let me congratulate you
on being so intimately connected
with that which is bound to
become - ere many years.

one of the greatest assets of our
great city.

Permit me to add my very
best wishes to you and Mr. Judson
for health, happiness and success
in the New Year.

Very sincerely
Emma Hale Passco.

(Wm. A. W. H.)

FREDERICK A. SMITH
CHIEF JUSTICE OF THE CIRCUIT COURT
OF COOK COUNTY, ILLINOIS
CHICAGO

Dec. 30, 1916

My dear President Judson

Judge Gary was more or less
at the old University of Chicago. He attended the
Union College of Law which was then the law
school of the old University, & graduated therefrom.

I think he has more money than he
knows what to do with & that he might be
willing to take an interest in our new medical
plan and help it on in a substantial way.

Yours very truly
F. A. Smith

President Harry Pratt Judson
The University of Chicago.

FREDERICK A. SMITH
CHIEF JUSTICE OF THE CIRCUIT COURT
OF COOK COUNTY, ILLINOIS
CHICAGO

Nov. 30. 1910

The undersigned person

feels very anxious to learn

of the history of Chicago. He attended the

Public Library of Chicago which was the first

school of the old University & was a student there

I think he has more money than the

known what to do with that he might be

wishing to take an interest in our own history

please send him a book if we are a suitable one

Yours very truly

F. A. Smith

President, Chicago Public Library

Chicago, Ill.

Chicago, January 2, 1917

Mr. J. Ogden Armour
Armour & Company, Chicago

Dear Mr. Armour:

Mr. Rosenwald tells me that you have consented to our publishing your name in connection with your very generous gift to the our medical endowment. I am gratified to know it. May I ask as to the form in which you would like the announcement made? Should it be announced as the gift of Mr. J. Ogden Armour, or do I understand from Dr. Billings that you had some other form in mind? I should be gratified to know. At the time the gift was made I was in the east, or I should have acknowledged it immediately. On behalf of the University I beg to extend sincere appreciation. The gift itself, coming from you, and its generous proportions, encourage us very greatly in what we have in hand. I believe that it is a very important undertaking for Chicago and for the welfare of medical science throughout the country.

With sincere regards, I am,

H.P.J. - L.

Very truly yours,

President Harry Pratt Judson,
The University of Chicago,
Chicago, Illinois.

Dear President Judson:

Referring to my contribution of one hundred thousand dollars to the University of Chicago Medical Fund: My idea in asking you to hold up on the announcement of this was in the hope that other alumni might make substantial contributions, which might all be announced at the same time.

Inasmuch as this seems not to be the case, I see no point in withholding the information longer; at the same time, I am particularly anxious there should be no undue publicity with it and, therefore, without any sort of an initial announcement, I would appreciate it if, when you are again asked as to who the donors are to the Fund, you would include my name following that of my mother and my brother, instead of letting it go in as anonymous as heretofore.

Yours faithfully,

Harold H. Swift.

Perhaps the next announcement would come when you have the fund completed and you will again give all the names.

Chicago, Ill.
Jan. 10, 1917.

Dear Mr. [Name]

Enclosed please find
the University of Chicago,
Chicago, Illinois.

Very truly yours,

Referring to my contribution of one hundred
thousand dollars to the University of Chicago Medical
Department in making you to hold in my name an
appointment of this year in the hope that this clinical
department will be established as a permanent one, and all
be announced at the same time.

Although as this seems not to be the case, I
am sure that the University of Chicago Medical
Department, I am particularly anxious that should
be no longer possible, it is not, therefore, without
any sort of regret, I would appreciate
it if you would also be asked as to the donors
of the fund, you would include my name referring
to the fund, instead of listing
it as an anonymous contribution.

Very respectfully,

Harold J. Swift

Perhaps the best arrangement would be
when you have the fund completed and
you will again give all the money.

Harold H. Swift
Union Stock Yards
Chicago

Not for Bel 199
January 29, 1917.

President Harry Pratt Judson,
The University of Chicago,
Chicago, Illinois.

Dear President Judson:

On February first I will mail you my check for \$12,500, together with my brother's, Charles H. Swift, check for the same amount, each representing the first of eight equal quarterly payments to apply on our respective subscriptions to the Medical Fund of the University of Chicago.

My mother's subscription is also made with the same condition of payment as ours, but if agreeable to you, we would prefer to change the payment dates and not begin upon her subscription to the Medical Fund until she has finished her subscription to the Theological Building, on which the last payment is due April first.

If you agree, therefore, I would like to substitute for the terms already arranged, the conditions that her subscription to the Medical Fund shall be made in two equal payments of fifty thousand dollars each, the first as of July 1, 1917 and the second as of October 1, 1917. Is this satisfactory?

Please reply.

Yours faithfully,

Harold H. Swift

January 22, 1917

President Harry Pratt Judson,
The University of Chicago,
Chicago, Illinois.

Dear President Judson:

On February 1st I will mail you my check for \$10,500, together with my brother's, Charles H. Bell, check for the same amount, each representing the first of equal annual payments to apply on our respective subscriptions to the National Fund of the University of Chicago. My brother's subscription is also made with the same condition of payment as ours, but it is agreeable to you, we would prefer to change the payment dates and not begin upon our subscription to the National Fund until she has finished her subscription to the Psychological Building, on which the last payment is due April 1st.

If you agree, therefore, I would like to substitute for the terms already arranged, the condition that her subscription to the National Fund shall be made in two equal payments of \$11,250 each, the first as of July 1, 1917 and the second as of October 1, 1917. Is this satisfactory?

Very truly,

Yours faithfully,

Frank R. Latta

Chicago, April 18, 1917

My dear Mr. Swift:

Your favor of the 17th inst. is received.
The next announcement doubtless will be the final one, which
will contain the full list of donors. I am very glad
indeed to be able to announce your name with the rest.

SPRINGFIELD, ILLINOIS

February 1, 1917.

Dr. Harry Pratt Judson,
Chicago, Ill.

My dear Doctor Judson:

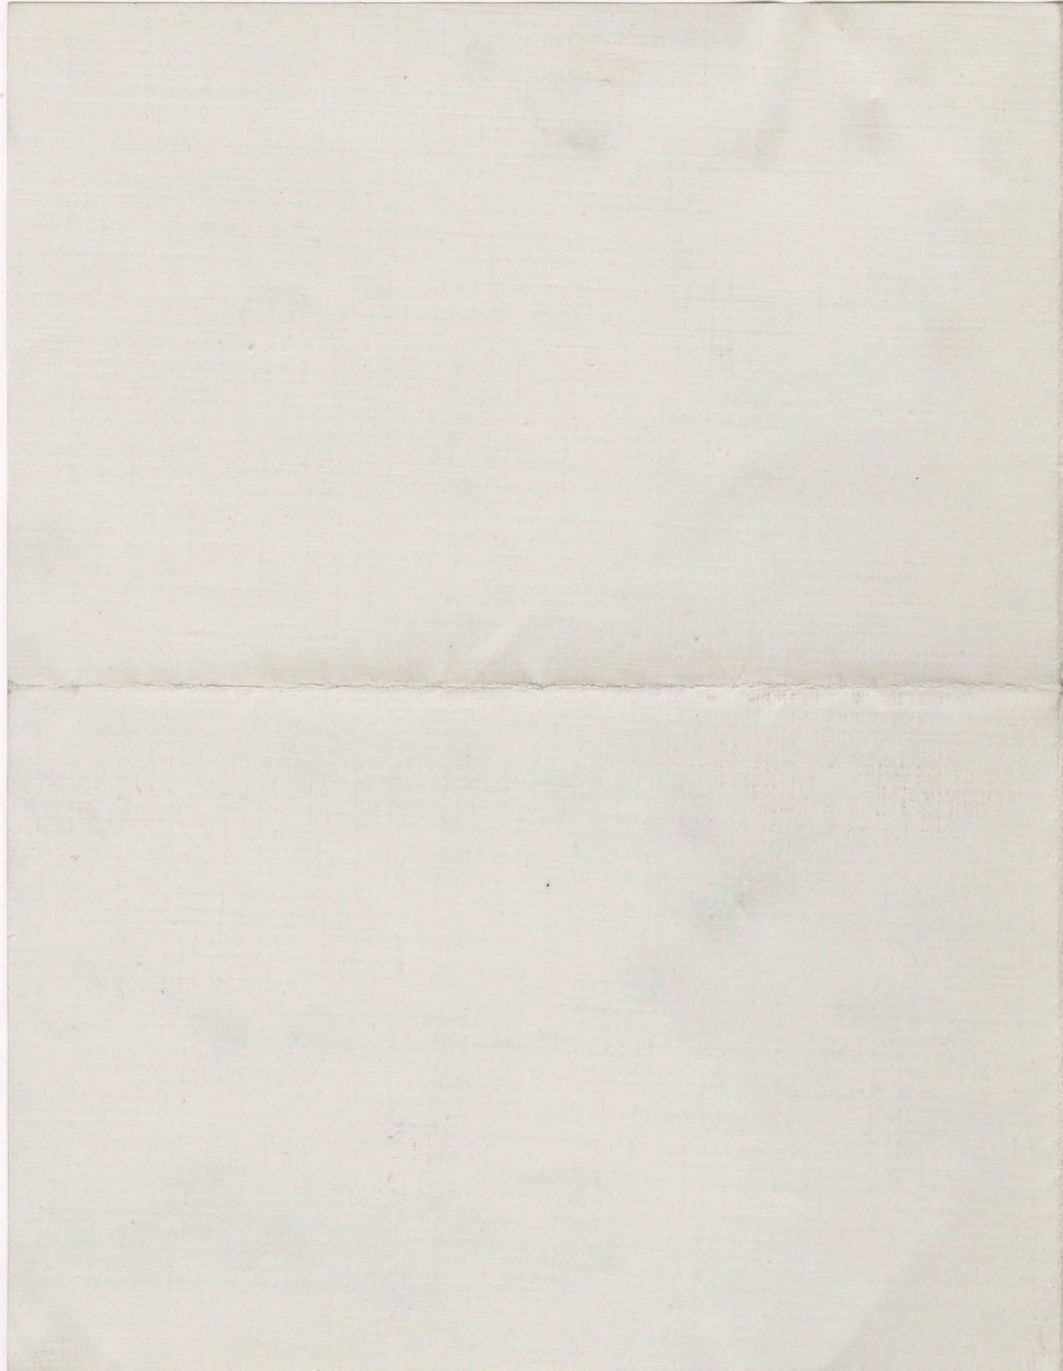

The day my mother left for California, I gave her your recent note to me to read, but, in the confusion incident to her departure and also because of the fact that she seemed more or less exhausted after the strenuous week at the Bazaar, I do not think she was in a mood to consider seriously the subject discussed.

She has been giving rather extensively recently to various objects, and it may be she will not feel like adding this new object to her list. However, your suggestion that the payment of any subscription might be divided over several years may appeal to her, and at least I will send both of your more recent notes to her.

With sincere regards,

Yours faithfully,

Theresa Rebecca Judson

164
Springfield, Illinois.
January 18, 1917.

My dear Doctor Judson:

I shall be very glad to take up the matter you suggest with my mother, when I go into Chicago next week. While, of course, I have no idea as to her decision in the matter, and while I realize also how many are her obligations, it may very well be that she will feel that she can at least make a small contribution to the fund.

I wish I might be in the city long enough to hope for the pleasure of seeing you and Mrs. Judson, but I am afraid this time I shall not have that opportunity.

We have spent a very busy ten days in getting settled, but are now

Dear President Judson:-

I spoke to you a few days ago in reference to some people who might make small donations to the Medical Fund of the University.

All of the following people have been students at the University and in my opinion have been rather successful financially so that I believe if they were so inclined, they could ^{each} make a donation. I am a little doubtful, however, as to whether it will appeal to them especially to make a small donation to so large a fund; I am not sure but what they would prefer to wait until a small donation could have a more conspicuous place. Perhaps you can get some side lights from some other sources as to how it would appeal to the different individuals.

The names I have in mind are -

Felix Hughes, '06; 37 Wall Street, New York
Joy R. Clark, Ex '11(?); Chester Place, Los Angeles, Cal.
James M. Sheldon, '03; 241 South Avenue, Glencoe, Ill.
Nelson Buck, '04; 9901 Longwood Drive, Chicago, Ill.
Hayden Harris, Ex '07; 30 Pine Street, New York, N.Y.

I already have called to your attention the name of James P. Gardner, 4803 Greenwood Avenue.

Yours faithfully,

Harold H. Swift

President Harry Pratt Judson,
The University of Chicago,
Chicago, Illinois.

February

Dr. H. H. Hays
Chicago

Dear President Hays:-

I spoke to you a few days ago in reference to some
people who might make small donations to the Medical Fund of
the University.
All of the following people have been students at
the University and in my opinion have been rather successful
financially so that I believe if they were so inclined, they
could make a donation. I am a little doubtful, however,
as to whether it will appeal to them especially to make a
small donation as to so large a fund. I am not sure but that they
would prefer to wait until a small donation could have a more
conspicuous place. Perhaps you can get some idea from
from some other sources as to how it would appeal to the dif-
ferent individuals.

The names I have in mind are -

- John P. Galt, 108; 22 Wall Street, New York
- John E. Clark, Ex 1111; Chester Place, Los Angeles, Cal.
- James M. Graham, 101; 241 South Avenue, Chicago, Ill.
- William H. Hays, 101; 2201 Longwood Drive, Chicago, Ill.
- William Hays, Ex 107; 20 Pine Street, New York, N.Y.

I already have called to your attention the name of
James P. Galt, 4803 Greenwood Avenue.

Yours faithfully,

Charles R. Swift

President Harry Pratt Judson,
The University of Chicago,

Chicago, February 17, 1917

Dear Mr. Swift:

Thank you very much for your note of the 16th inst. with regard to some of our alumni. My impression is at this stage that probably these and some other of our alumni would be more interested a little later in contributing toward some smaller but still interesting purpose, in which they would feel that they were larger factors. However I shall gladly make inquiries, and see if any of these probably would be interested in this. The matter has been taken up with Mr. Gardner.

Very truly yours,

H.P.J. - L.

Mr. Harold H. Swift
Union Stock Yards, Chicago

Chicago, February 17, 1917

Dear Mr. Swift:

Thank you very much for your note of the 16th inst. with regard to some of our alumni. My impression is at this stage that probably these and some other of our alumni would be more interested a little later in contributing toward some smaller but still interesting purpose, in which they would feel that they were larger factors. However I shall gladly make inquiries, and see if any of these probably would be interested in this. The matter has been taken up with Mr. Gardner.

Very truly yours,

H.P.T. - L.

Dear President Judson:-

I wonder if Mr. Morton D. Hull has been approached in reference to the Medical Fund. I believe he is interested in the University and am under the impression that his investments have recently turned out very well. I personally know him only very slightly, - not well enough to be of any benefit in the matter.

Yours faithfully,

Harold H. Swift

President Harry Pratt Judson,
The University of Chicago,
Chicago, Illinois.

Chicago, February 19, 1917

My dear Mr. Swift:

Thanks for your note of the 19th inst.

Yes, Mr. Donnelley took the matter up with Morton Hull
some ten days ago, and is to see him again about it this
week.

Very truly yours,

H.P.J. - L.

My dear Dr. Judson:-

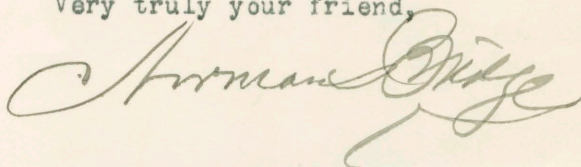

I am just in receipt of your favor of the
16th inst. with enclosures.

The forms are entirely satisfactory, and
I have signed them and herewith return them to you.

It is very gratifying to know that you are
so near the completion of the necessary subscrip-
tions for the great work to go forward.

I hope you are very well, and congratulate
you heartily on your success.

Very truly your friend,

Chicago, March 1, 1917

Dear Mr. Lehmann:

The little leaflet which I left you this morning indicates the general plan of our work. Mr. Abraham Flexner, Secretary of the General Education Board of New York, believes that it is the greatest thing undertaken in medicine in this country, and that it bids fair to make Chicago one of the most important centers of medical work in the world. I thought you might be interested in a list of the principal donors to the fund thus far. Since the January statement which I am enclosing we have had a gift of \$100,000 by Mr. Max Epstein of Chicago, and there have been also several small gifts. Of course a gift to endowment stands always in the name of the donor or donors, and that name would apply to professorships on the foundation in question. I may say that the one million dollar gift of the Billings family provides for the Hospital on the Midway; that the gift of Mr. Rawson provides for a laboratory in

CHICAGO

March Twentieth
Nineteen Seventeen

Dear Dr. Judson:-

At luncheon today, I met a friend from La Salle, Illinois, and made it a point to ask him about Mr. F. W. Matthiessen.

Mr. Matthiessen is a man eighty-two years of age and, as you know, is considered extremely wealthy. I believe he is on your list to be seen.

Mr. Francis Kilduff, the man with whom I talked, says that Mr. Matthiessen is interested in medical work, and that he understands he is now considering helping to build an isolation hospital in conjunction with the hospital at La Salle. He is a man who would not care to meet the whole expense of building the isolation hospital, but he would be willing to contribute liberally if the other residents of La Salle showed the proper spirit by their gifts.

As I understand it, Mr. Matthiessen had three daughters. The first one is Mrs. Henry Matthiessen (married a cousin) who makes her home at Irvington, New York. The second one married Captain G. P. Blow, who makes his home at La Salle and helps Mr. Matthiessen look after his affairs, to a considerable degree. Another daughter married Dr. P. S. Chancellor. Mrs. Chancellor, I am told, died some time ago, but left one son. Dr. Chancellor, I believe, is now in Santa Barbara. He was a close friend of Dr. Murphy, and I am told that he went to Europe with the medical unit which Dr. Murphy organized.

Mr. Kilduff is a close friend of Mr. Matthiessen, and he says that the way to reach him is through Dr. Chancellor - that anything Dr. Chancellor recommends will undoubtedly be given great consideration. It occurred to me that, inasmuch as Dr. Billings was in California, he might be at Santa Barbara, in which case he could get in touch with Dr. Chancellor. Mr. Kilduff did not know Dr. Chancellor's initials, but it may be that Dr. Billings is acquainted with him. At any rate, we could, without question, get the full name from Dr. Herrick, or some other friend.

- - - - -

Mr. E. C. Hegler, now deceased, who was Mr. Matthiessen's partner, had several children. Mr. C. B. Lihme, of Chicago, married one of the daughters, and Mr. Paul Carus married another. Mr. Julius W. Hegler, a son, lives at Danville, Illinois. Mr. Lihme and Mr. Hegler, I believe, are both members of the Union League Club.

Mr. Kilduff said he understood that Mrs. Carus was doing a great deal for relatives in the old country at this time, and he doubted if we could get anything from her. He thought Mr. Hegler might do

ROBERT L. SCOTT

CHICAGO

March Twentieth
Nineteen Hundred

Dear Dr. Williams:

At luncheon today, I met a friend from La Salle, Illinois, and made it a point to ask him about Mr. F. W. Mathison.

Mr. Mathison is a man eighty-two years of age and, as you know, is considered extremely wealthy. I believe he is on your list of donors.

Mr. Francis Elliott, the man with whom I talked, says that Mr. Mathison is interested in medical work, and that he understands he is now considering helping to build an isolation hospital in connection with the hospital at La Salle. He is a man who would not care to meet the whole expense of building the isolation hospital, but he would be willing to contribute liberally if the other residents of La Salle showed the proper spirit by their gifts.

As I understand it, Mr. Mathison has three daughters. The first one is Mrs. Henry Mathison (married a cousin) who makes her home at Lexington, New York. The second one married Captain G. P. Elton, and after his time at La Salle and before Mr. Mathison took after his father, he was a considerable doctor. Another daughter married Dr. J. J. Chamberlain, I am told, died some time ago, but left one son, Dr. Chamberlain, I believe, is now in Santa Barbara. He was a close friend of Dr. Harvey and I am told that he went to Europe with the medical unit which Dr. Harvey organized.

Mr. Elliott is a close friend of Mr. Mathison, and he says that the way to reach him is through Dr. Chamberlain - that anything Dr.

is connected to me that, inasmuch as Dr. Williams was in California, he might be at Santa Barbara, in which case he could get in touch with Dr. Chamberlain. Mr. Elliott did not know Dr. Chamberlain's initials, but he was sure Dr. Williams is acquainted with him. At any rate, we could, without question, get the full name from Dr. Harvey, or some other friend.

Mr. F. W. Mathison, now deceased, who was Mr. Mathison's partner, had several children. Mr. G. W. Mathison, of Chicago, married one of the daughters, and Dr. J. J. Mathison married another. Mr. J. J. Mathison, a son, lives at Lexington, Illinois. Mr. J. J. Mathison, I believe, are both members of the Union League Club.

Mr. Elliott said he understood that Mrs. Carter was doing a great deal for relatives in the old country at this time, and he doubted if we could get anything from her. He thought Mr. Mathison might be

My dear Dr. Billings:---

Mr. Matthiessen has just brought your letter of April 20th into this office and requested me to reply to same.

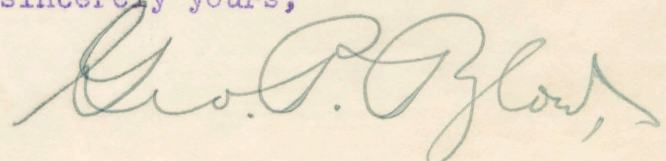

Mr. Matthiessen is well informed of the splendid work you are doing for the medical profession in Chicago, and of the great works already achieved; and desires me to offer his sincere congratulations and best wishes for the completion of this plan.

He desires me to state, however, that he is now carrying out a plan of a somewhat similar nature which has been matured during the last few years, and by which he hopes to accompany the same benefits for this community that you are working for in your Chicago project. As you probably know, Mr. Matthiessen not only plans and executes, but he also provides for the future of any project in which he is interested. You probably know also that in any work of this sort he asks no assistance, and depends upon himself and his own financial resources, together with carefully laid plans, to secure the success aimed at. He has always been deeply interested in the community in which he has lived for so many years, and in his fellow workmen who helped to build up the City and surrounding communities; and as he is not able to comply with all the requests that are made, he naturally prefers to confine his efforts, - his time and his money - in benefiting those with whom he has worked and known, and whose needs he is intimately acquainted with. Under these circumstances, Mr. Matthiessen asks to be excused from contributing to the work which you have so well started, and the importance of which he fully appreciates.

Wishing you every success in your effort, I remain, with kindest regards,

Very sincerely yours,

GPB'HB

CIRCUIT COURT OF COOK COUNTY
CHAMBERS OF
JUDGE JESSE A. BALDWIN

Chicago, May 9, 1917.

To the President and Board of Trustees
of Rush Medical College.

Gentlemen:

As you are aware, the effort to raise a large fund to advance the cause of medical education in Chicago is now so near a successful culmination that, in the very near future, the permanent relationship between the University of Chicago and the Rush Medical College will have to be settled.

For more than twenty years I have been a Trustee of the University of Chicago, and, for more than half that period, I have been a Trustee of Rush Medical College. I have endeavored at all times faithfully to meet the obligations which such relationship as Trustee to these institutions, respectively, imposed upon me. It is probable that the Board of Trustees of the Rush Medical College may have to pass upon the question of closer relations between itself and the University of Chicago; and this may involve a turning over of its educational plant, including its tangible property, to the University.

While I should have no hesitancy in acting upon the proposition, so far as the educational question is concerned, yet, it has seemed to me inadvisable for me to remain upon the Board of Rush Medical College and vote upon the question of the disposition of its property to the University of Chicago, should that contingency arise.

I, therefore, herewith tender this, my resignation as a member of the Board of Trustees of Rush Medical College, to take effect immediately.

In taking this step, I am actuated solely by the reasons above indicated. My friendship and admiration for the individual members of the faculty and of the Board of Trustees of Rush Medical College, which has meant so much to me in the past, will abide. Nothing less than a conviction of duty would cause me to sever the relationship which has, in all these years, been so pleasant and inspiring.

Yours very truly,

(Signed) Jesse A. Baldwin.

Mr. Robert L. Scott
300 W. Adams St., Chicago

Chicago, May 14, 1917

To the Board of Trustees, The University of Chicago.
Gentlemen:

I beg to make the following report on the
status of medical affairs:

At the meeting of the Board May 8th the Committee
reported total contributions to the medical fund of
\$5,274,000, not including Dr. Bridge's \$30,000 or Mr.
Logan's \$47,500, both of which are for specific purposes
not directly included in the terms of the plan. I beg
to report that since the last meeting of the Board the
following subscriptions have been received: from Mrs. George
M. Pullman, \$10,000, and from Mr. Thomas D. Jones, \$50,000.
This makes a total of \$5,334,000. This completes the fund
we set out to obtain of \$3,330,000 in order to secure the
\$2,000,000 offered by the New York Boards. There are other
sums which we are still hoping to get in addition to this,
but inasmuch as the New York Boards meet on May 25th and 26th

HARRY PRATT JUDSON

Chairman

December 8, 1916.

Right Reverend Charles D. Williams,
Detroit, Michigan.

My dear Bishop Williams:

The principal task before The University of Chicago is the organization of its Medical Schools. We are planning something which I think is unique and which, I believe, will be of very large moment to the medical profession and especially to the cause of preventative medicine, not merely for Chicago, but for the whole Northwest. The enclosed brief sketch will give you an idea of what we are driving at. We are trying to raise a fund of \$5,300,000 for this purpose. If we succeed in this, we shall have in the entire combination upwards of \$13,000,000. The General Education Board has given us \$1,000,000 and the Rockefeller Foundation \$1,000,000. Other friends have already pledged \$1,750,000 more. About \$500,000 of these pledges are gifts of friends of medical education, whose homes are in Massachusetts, New York and California.

The scope of the work we are planning, in short, we regard as national and not local in character. It is for this reason that I am wondering if Mr. Henry Ford would care to consider the question at all. One of the central features of the plan is the great teaching and research hospital to be erected on the Midway, across from the Harper Library. It will require \$1,000,000 to build this. The University provides the site, which is worth about a half a million and it will provide an endowment to the amount of one and a half millions so that its support is assured. No more conspicuous or effectual memorial could be found in Chicago than this building. I **should** be glad to have it the Henry Ford Hospital.

The endowment for one of the great chairs of medicine will require one-quarter million. Mr. Martin A. Ryerson, President of our Board of Trustees, has given that amount to endow one of the chairs. I should be glad

December 8, 1918.

Right Reverend Charles D. Williams,
Detroit, Michigan.

My dear Bishop Williams:

The principal task before the University of Chicago is the organization of the Medical School. We are planning something which I think is unique and which, I believe, will be of very large moment to the medical profession and especially to the cause of preventive medicine, not merely for Chicago, but for the whole Northwest. The enclosed brief sketch will give you an idea of what we are driving at. We are trying to raise a fund of \$2,500,000 for this purpose. If we succeed in this, we shall have in the entire combination upwards of \$1,000,000. The General Education Board has given us \$1,000,000 and the Rockefeller Foundation \$1,000,000. Other friends have already pledged \$1,750,000 more. About \$500,000 of these pledges are gifts of friends of medical education, whose homes are in Massachusetts, New York and California.

The scope of the work we are planning, in short, we regard as national and not local in character. It is for this reason that I am wondering if Mr. Henry Ford would care to consider the question at all. One of the central features of the plan is the great teaching and research hospital to be erected on the Midway, across from the Harper Library. It will require \$1,000,000 to build this. The University provides the site, which is worth about a half a million and it will provide an endowment to the amount of one and a half millions so that its support is assured. No more conspicuous or effective memorial could be found in Chicago than this building. I should be glad to have it the Henry Ford Hospital.

The endowment for one of the great chairs of medicine will require one-quarter million. Mr. Martin A. Ryerson, President of our Board of Trustees, has given that amount to endow one of the chairs. I should be glad

Gentlemen:

At a special meeting of the Board of Trustees of the University of Chicago, held May 15, 1917, it was reported that pledges to the medical fund of the University had been received aggregating \$3,334,000, thus completing the fund the University set out to obtain in order to secure the pledges of \$1,000,000 each by the Rockefeller Foundation and the General Education Board. The following resolution was presented and adopted by the Board:

Resolved that a statement of cash contributions and certified copies of pledges to the fund for the establishment of Medical Schools at the University of Chicago be transmitted by the Secretary to the Rockefeller Foundation and the General Education Board to show compliance with the conditions stipulated in their offer to contribute one million dollars each for such purpose.

In accordance with the terms of this resolution, I beg to inclose herewith certified copies of the pledges accompanied by a list of the subscriptions showing an aggregate total of \$3,334,000. The following exceptions are to be noted: On the third page, the second item, in lieu of the original pledge I am submitting a copy of the letter of the Business Manager of the University, reporting to the Board of Trustees the receipt of \$25,000 of Western Electric Company 5% first mortgage bonds, constituting payment in full of a subscription of the same amount. The remaining exceptions are the last three subscriptions on page 4, aggregating \$7,000, which have not yet been reduced to written form.

Yours very truly

J. S. D.

Chicago, November 20, 1916

My dear Mr. Buttrick:

The telegram from yourself and Mr. Gates came this afternoon. We are pleased with the progress already made and with progress that is still making. Our committee is very busy laying plans, and has already attempted several large things. Our plan, as I think I have already written, is to attempt to secure the large things first. Some of these we have now on foot. We are so enormously busy in pushing matters along that we can well defer the conference as to the exact details of the contract. The fact is, to be honest, I am not much interested in the contract. Any terms which you may suggest you will find will not only be satisfactory to us but that the plans which we adopt will even go beyond them. The interest and enthusiasm here on the plan as a whole are very great indeed, and the highest ideals of the Board you will find thoroughly realized by the people in Chicago. It will be a few days

Dear Dr. Judson: *Thank you for your letter.*

I am sure that when the time comes, we shall be able to collaborate in these matters in such way as to provide the very best terms of contract. I am delighted to hear from Flexner that you have another \$400,000. It would be splendid if you were able to get a lot more money than is now contemplated. We shall be very glad to see you in December.

Yesterday I was in Boston conferring with Coolidge about his tentative plans for buildings in Peking. It promises to cost a lot of money before we get through with that *program*.

Yours always truly,

Wallace Buttrick

Dear President Judson:-

Mr. Gates was in to see me this morning and we talked over your correspondence with him regarding the situation in Chicago and your tentative plans dealing with it. Gates and I are of the opinion that before we consider this matter in detail it might be well to have Mr. Flexner go out to Chicago and get for us more detailed knowledge of hospital relationships and facilities than we now possess.

If it is agreeable to you therefore I shall ask Mr. Flexner to go to Chicago some time in the near future, when you and perhaps Dr. Billings are to be there, in order that we may get the data in question. After that we can have a conference for the purpose of threshing the subject out.

With warm regards, I am

Cordially yours,

\$11,000,000 ENDOWS MEDICAL SCHOOL IN CHICAGO UNIVERSITY

Rockefeller Boards Give \$2,000,-
000 to \$9,000,000 Fund
Already Provided.

WILL TRAIN SPECIALISTS

New Department Will Equal the
Advanced Schools of Ber-
lin and Vienna.

TO ABOLISH RUSH COLLEGE

Eminent Men on New School's Fac-
ulty Will Devote Their En-
tire Time to the Work.

Dr. Abraham Flexner, Assistant Sec-
retary of the General Education Board,
announced last night that the board and
the Rockefeller Foundation had jointly
appropriated \$2,000,000, which would be
added to money and property worth
\$9,000,000, for the founding of a med-
ical department in connection with the
University of Chicago, which is expected
to make it the greatest school for the
education of specialists in the United
States.

Starting with an endowment of \$11,-
000,000, the largest possessed by any
medical school in the country, the Med-
ical Department of the University of
Chicago will be conducted by a staff of
professors and assistants who have no
private practice and who give all their
time to the school. The most eminent
men in the various fields of medicine
will be invited to take places on the
staff.

The purpose of the endowment is to
create in America a school which will
make it unnecessary for advanced stu-
dents, or for physicians seeking to be-
come specialists, to study abroad. It is
expected eventually to build up at Chi-
cago an institution such as exists at
present nowhere in America and is to
be found at present only in Berlin and
Vienna.

Cover All Fields of Medicine.

All fields of medicine will be taught.
Only students who have previously spe-
cialized in physics, chemistry, and bi-
ology will be admitted. Before the war
about 1,500 American physicians and
students went abroad annually to study
medicine in Berlin and Vienna. The
Department of Medicine at the Uni-
versity of Chicago will be able to teach
about 300 students at the beginning
when it opens its doors about two years,
hence.

Dr. Flexner was asked last night why
such a school was not founded in New
York instead of in Chicago.

"That is an interesting question," he
said. "The reason that Chicago was
chosen is that the University of Chicago
has no Department of Medicine now.
Medicine is taught there by arrangement
with the Rush Medical College. So we will
begin at the beginning in Chicago, with-
out reorganizing an existing institution.
The schools in New York, Philadelphia,
and Boston, for instance, already have
staffs consisting of eminent physicians
and surgeons, who spend part of their
time in practice. It would be very dif-
ficult to reorganize them so that the
staff of teachers would devote all their
time to the work of the institutions. The
General Education Board is in favor of
the full-time plan.

"The University of Chicago made a
proposal to us which we considered fa-
vorably. We are open to propositions
of the kind from other cities, of course,
but our best opportunity seemed to be in
Chicago."

\$9,000,000 Already Set Aside.

The various items included in the en-
dowment of the new school are the \$2,-
000,000 from the two Rockefeller organi-
zations, \$2,000,000 already set aside for
the purpose by Chicago University, a
further some of \$3,300,000 which is to be
raised by the university, and the plant
and property of the Presbyterian Hospi-
tal in Chicago, valued at more than
\$3,000,000, which is to be placed under
the control of the medical department
of the University of Chicago.

The German and Austrian schools,
after which the new institution will be
patterned in part, are served by med-
ical men and scientists who are in the
pay of the State and give all their time
to their positions. The only medical
schools in the country which now have
the full-time teaching plan are the Johns
Hopkins Medical School at Baltimore
and the medical department of the
Washington University at St. Louis.
These schools have had to pay better
salaries than those paid by other
schools, but they have induced eminent
men in the medical world to sacrifice
large incomes in order to accept posi-
tions at the schools. Dr. Flexner said
it had been pretty clearly demonstrated
that men freed from outside calls and
devoted solely to teaching and research
could give better service than those con-
tinuing in practice.

Rush College to Cease.

The Rush Medical College, founded
seventy-five years ago and named after
Benjamin Rush, will go out of exist-
ence when the new department of the
University of Chicago opens its doors.
The proposed medical school will be
erected on the midway plaisance and
be part of the University of Chicago
plant. The laboratory building will be
erected near the Presbyterian Hospital.
A university hospital with laboratories
and out-patient department will be
built on the midway.

The staff of the Rush College and the
physicians and surgeons now connected
with the Presbyterian Hospital will all
resign. The selection of the new staff
will rest solely with the Medical De-
partment of University of Chicago. Dr.

Continued from Page 1.

Flexner said last night that no one has
yet been asked to serve on the staff,
and that time had not yet been given
to considering the question of the per-
sonnel of the new staff. It will consist,
he said, of a staff of about ten profes-
sors, with between thirty and forty as-
sistants. In a statement announcing
the gift, Dr. Flexner said:

"The full-time scheme is an appeal
to the scientific interest and devotion
of the clinician and the results so far
realized through the plan at Johns
Hopkins have been most satisfactory.
It should become of increasing conse-
quence to the public that the training
of those studying to become doctors
should be in charge of the most com-
petent men obtainable, devoting their
whole time to this line of work. Greatly
increased efficiency and thoroughness
should result, to the alleviation of suf-
fering and the cure of disease.

Undergraduate Course Also.

"The new institution thus to be es-
tablished in Chicago will be equipped
with every modern facility for medical
instruction and with ample funds for
co-operation. It will be organized upon
the most advanced principles, including
the full-time scheme, and it will for the
first time in this country provide not
only a full undergraduate medical
course, but a post-graduate school
wherein facilities for study will be pro-
vided for students seeking more ad-
vanced instruction."

Dr. Flexner said that there should be
no need for medical students in this
country to have to go abroad to com-
plete their education as specialists. He
said the great teachers of medicine in
Europe were developed by completely
equipped schools running on the full-
time system and that great teachers
would be produced here in the same
way. He added that the students at the
new school would be carefully examined
as to their qualifications and would
compose a "small and select body."

The General Education Board had
given away nearly \$18,000,000 before the
latest gift was made, bringing the total
nearly to \$20,000,000, including the \$1,-
000,000 which the Rockefeller Founda-
tion transferred. The General Educa-
tion Board, following its policy of
endowing preferably those schools which
are organized on a full-time basis, had
previously given \$1,500,000 to Johns Hop-
kins Medical School and \$1,000,000 to
the medical department of the Washing-
ton University at St. Louis.

\$37,000,000 to Chicago.

Before this latest gift, John D. Rocke-
feller had given in one way or another
\$35,000,000 to the University of Chicago.

so that the total is now \$37,000,000.
A report of the General Education Board
made in 1915 showed that the board had
at that time given away a total of \$73,-
350,000, this latest gift making the total
well over \$75,000,000.
This total does not include gifts for
educational purposes which were made
by Mr. Rockefeller before the formation
of the General Education Board four-
teen years ago. His total benefactions,
outside of his gifts for war relief, are
not exactly known, but total consid-
erably more than \$200,000,000, including
the \$75,000,000 for education.
Mr. Rockefeller's fortune passed the
\$1,000,000,000 mark in July of this year
on the rise of Standard Oil stock.

This copy contains the complete text of the original document, which has been discarded because of its poor physical condition.

\$11,000,000 ENDOWS MEDICAL SCHOOL

Continued from Page 1.

Flexner said last night that no one had yet been asked to serve on the staff and that time had not yet been given to considering the question of the personnel of the new staff. It will consist, he said, of a staff of about ten professors, with between thirty and forty assistants. In a statement announcing the gift, Dr. Flexner said:

"The full-time scheme is an appeal to the scientific interest and devotion of the clinician and the results so far realized through the plan at Johns Hopkins have been most satisfactory. It should become of increasing consequence to the public that the training of those studying to become doctors should be in charge of the most competent men obtainable, devoting their whole time to this line of work. Greatly increased efficiency and thoroughness should result, to the alleviation of suffering and the cure of disease.

Undergraduate Course Also.

"The new institution thus to be established in Chicago will be equipped with every modern facility for medical instruction and with ample funds for co-operation. It will be organized upon the most advanced principles, including the full-time scheme, and it will for the first time in this country provide not only a full undergraduate medical course, but a post-graduate school wherein facilities for study will be provided for students seeking more advanced instruction."

Dr. Flexner said that there should be no need for medical students in this country to have to go abroad to complete their education as specialists. He said the great teachers of medicine in Europe were developed by completely equipped schools running on the full-time system and that great teachers would be produced here in the same way. He added that the students at the new school would be carefully examined as to their qualifications and would compose a "small and select body."

The General Education Board had given away nearly \$18,000,000 before the latest gift was made, bringing the total to nearly \$20,000,000, including the \$1,000,000 which the Rockefeller Foundation transferred. The General Education Board, following its policy of endowing preferably those schools which are organized on a full-time basis, had previously given \$1,500,000 to Johns Hopkins Medical School and \$1,000,000 to the medical department of the Washington University at St. Louis.

\$37,000,000 to Chicago.

Before this latest gift, John D. Rockefeller had given in one way or another \$25,000,000 to the University of Chicago,

so that the total is now \$37,000,000. A report of the General Education Board made in 1915 showed that the board had at that time given away a total of \$73,350,032, this latest gift making the total well over \$75,000,000.

This total does not include gifts for educational purposes which were made by Mr. Rockefeller before the formation of the General Education Board fourteen years ago. His total benefactions, outside of his gifts for war relief, are not exactly known, but total considerably more than \$200,000,000, including the \$75,000,000 for education.

Mr. Rockefeller's fortune passed the \$1,000,000,000 mark in July of this year on the rise of Standard Oil stock.

"The University of Chicago made a proposal to us which we considered favorably. We are open to propositions of the kind from other cities, of course, but our best opportunity seemed to be in Chicago."

\$9,000,000 Already Set Aside.

The various items included in the endowment of the new school are the \$2,000,000 from the two Rockefeller organizations, \$2,000,000 already set aside for the purpose by Chicago University, a further some of \$3,300,000 which is to be raised by the university, and the plant and property of the Presbyterian Hospital in Chicago, valued at more than \$3,000,000, which is to be placed under the control of the medical department of the University of Chicago.

The German and Austrian schools, after which the new institution will be patterned in part, are served by medical men and scientists who are in the pay of the State and give all their time to their positions. These schools have had to pay better salaries than those paid by other schools, but they have induced eminent men in the medical world to sacrifice large incomes in order to accept positions at the schools. Dr. Flexner said it had been pretty clearly demonstrated that men freed from outside calls and devoted solely to teaching and research could give better service than those continuing in practice.

Rush College to Cease.

The Rush Medical College, founded seventy-five years ago and named after Benjamin Rush, will go out of existence when the new department of the University of Chicago opens its doors. The proposed medical school will be erected on the midway plaza and be part of the University of Chicago plant. The laboratory building will be erected near the Presbyterian Hospital. A university hospital with laboratories and out-patient department will be built on the midway.

The staff of the Rush College and the physicians and surgeons now connected with the Presbyterian Hospital will all resign. The selection of the new staff will rest solely with the Medical Department of University of Chicago. Dr.

\$11,000,000 ENDOWS MEDICAL SCHOOL IN CHICAGO UNIVERSITY

Rockefeller Boards Give \$2,000,000 to \$9,000,000 Fund
Already Provided.

WILL TRAIN SPECIALISTS

New Department Will Equal the
Advanced Schools of Berlin
and Vienna.

TO ABOLISH RUSH COLLEGE

Eminent Men on New School's Faculty
Will Devote Their Entire
Time to the Work.

Dr. Abraham Flexner, Assistant Secretary of the General Education Board, announced last night that the board and the Rockefeller Foundation had jointly appropriated \$2,000,000, which would be added to money and property worth \$9,000,000, for the founding of a medical department in connection with the University of Chicago, which is expected to make it the greatest school for the education of specialists in the United States.

Starting with an endowment of \$11,000,000, the largest possessed by any medical school in the country, the Medical Department of the University of Chicago will be conducted by a staff of professors and assistants who have no private practice and who give all their time to the school. The most eminent men in the various fields of medicine will be invited to take places on the staff.

The purpose of the endowment is to create in America a school which will make it unnecessary for advanced students, or for physicians seeking to become specialists, to study abroad. It is expected eventually to build up at Chicago an institution such as exists at present nowhere in America and is to be found at present only in Berlin and Vienna.

Cover All Fields of Medicine.

All fields of medicine will be taught. Only students who have previously specialized in physics, chemistry, and biology will be admitted. Before the war about 1,500 American physicians and students went abroad annually to study medicine in Berlin and Vienna. The Department of Medicine at the University of Chicago will be able to teach about 300 students at the beginning when it opens its doors about two years hence.

Dr. Flexner was asked last night why such a school was not founded in New York instead of in Chicago.

"That is an interesting question," he said. "The reason that Chicago was chosen is that the University of Chicago has no Department of Medicine now. Medicine is taught there by arrangement with the Rush Medical College. So we will begin at the beginning in Chicago, without reorganizing an existing institution. The schools in New York, Philadelphia, and Boston, for instance, already have staffs consisting of eminent physicians and surgeons, who spend part of their time in practice. It would be very difficult to reorganize them so that the staff of teachers would devote all their time to the work of the institutions. The General Education Board is in favor of the full-time plan."

THE NEW MEDICAL SCHOOL.

Announcement that the University of Chicago is to have a great medical school, second to none on the continent, has aroused wide interest throughout the country. We are glad to note in eastern newspapers a generous appreciation of what this means.

"It is," says the New York Tribune, "a splendid and timely enterprise which will do much to raise the standard of medical education in this country."

A half a dozen or more years ago Chicagoans were disturbed, and some indignant, because of the report made by Mr. Abraham Flexner in which he pointed out the defects of local medical schools. He referred to this city as the "plague spot of the country." It was an unpleasant but a salutary verdict on a condition that has developed more thru neglect of law enforcement than thru lack of statutory provision for better things.

Chicago has not been idle since. Much has been done to improve the situation, and the step that is now promised will give the city the place it deserves. The clinical opportunities in Chicago are unsurpassed; the opportunities for educational and research work need only that development which will come thru ample means and concentrated effort.

Under the policy adopted by Mr. Rockefeller and his associates the full-time principle will govern the entire staff. This policy has been criticized, but the experience of Johns Hopkins justifies it, and there is no reason to suppose that it will not prove as satisfactory here. Its chief objection is that it withdraws the staff from general practice and tends to theoretical ruts. The objection is obviated, however, by the abundant clinical facilities and counterbalanced by the great advantage of securing the undivided thought and effort of clinicians and laboratory workers.

The Rush Medical College, one of the three local institutions to which Mr. Flexner accorded a high rating in his report, constitutes a splendid nucleus for the new school, and the opportunity to build on so good a foundation without conflicting with any existing school under the university auspices is one of the inducements that weighed in the decision of the Rockefeller board.

It may be some years before the great medical schools can take their former place in the world of science, and we are fortunate in the prospect that advantages, temporarily denied by the war, will be in measure provided nearer home.

A Long Step Forward in Medicine.

That this is a propitious time for the starting of a new medical college, magnificently endowed, must be obvious to anybody who knows how many American doctors, before the European war, were in the habit of going to Berlin or Vienna to complete their training as specialists under the deservedly famous teachers who lectured and demonstrated in those cities. For some years, however, though there has been no disposition in medical circles to deny the value of study abroad, it has been contended here, with not a little authority, that the American doctor went to Germany or Austria for his post-graduate courses, instead of taking them in the United States, less from necessity than because it was a fashion or custom, and because the foreign training brought an increment of reputation not to be acquired from training at home that was practically as good.

This claim was true, of course, only of a small number, the very best, of our medical schools, and we have had many too many—for which no such claims could be made. For the present, and presumably for some time to come, access to the great European medical schools will be difficult and their attractions for the foreign student will be diminished in several respects, some of them professional and others political. This fact provides the opportunity which has been seized by the shrewd controllers of the Rockefeller funds for the starting of a new school, to be conducted like the best in Europe and to have abundant funds of its own as a preferable substitute for Government subsidies—which also involve some measure of Government management.

Why a wholly new school should be founded, instead of taking one already established and strengthening it by relieving its Faculties of all financial worries and limitations, is not made quite clear by the preliminary announcements, but it can be assumed that there are reasons for following this course.

The incidental abolition of the Rush Medical College, an institution with a fine record and many distinguished graduates, will be the cause of not a little grief, and the minor, ill-equipped medical schools all over the country will suffer from the creation of a new rival so immensely superior as to make competition hopeless. There is likely, therefore, to be a certain amount of criticism of the new enterprise, but it will soon die away under a chorus of commendation.

\$500,000 GIVEN BY ROSENWALD

Chicago University to Get Sum for Rockefeller Hospital

Julius Rosenwald, president of Sears, Roebuck & Co., of Chicago, and a trustee of Chicago University, yesterday announced that he would present \$500,000 to the university. This is to be part of the \$2,500,000 which must be raised to secure the recent \$2,000,000 appropriation of the General Education Board and Rockefeller Foundation for the establishment of a great medical school and hospital in connection with the university.

Mr. Rosenwald first expressed his intention to Dr. Abraham Flexner, who, with Dr. Simon Flexner and Dr. Frederick T. Gates, escorted the Chicago philanthropist and his wife through Rockefeller Institute yesterday morning. A letter to the board of trustees of the university will be sent before Mr. Rosenwald returns to Chicago Saturday. In the first announcement of the proposed medical department it was stated that \$3,300,000 would be raised by the university. Toward this amount a fund of about \$750,000, subscribed for another purpose, will be transferred, bringing the total to be subscribed by the university down to approximately \$2,500,000. Mr. Rosenwald's contribution will be the first one for this purpose, and he has been made a member of a committee of seven trustees of the university to assist in raising the whole amount.

"Although there is no definite plan for raising the money, and as far as I know no other members of the committee have yet been appointed, I have no doubt that the amount can be raised in a comparatively short time in Chicago," Mr. Rosenwald said at the Biltmore yesterday.

"I have been greatly impressed with the advantages of having such a school. I make my gift on condition that the remaining \$2,000,000 be raised because, otherwise, the plan cannot be carried through. In other words, I am endeavoring to secure the Rockefeller gift of last week."

Julius Rosenwald is well known as a philanthropist. On his fiftieth birthday, August 12, 1912, he made gifts to various institutions aggregating \$687,000, among which was one of \$250,000 to Chicago University for a woman's gymnasium and buildings for the geographic, geological and classical departments.

On January 1, 1913, he announced that he would give \$25,000 toward the cost of building a Y. M. C. A. building for negroes in any city in the United States which raised \$75,000 for the purpose, and as a result about \$1,200,000 has been subscribed in eleven cities to date. His other charities include \$250,000 to the Associated Jewish Charities of Chicago, and large contributions to settlement houses, negro schools and other institutions. His net income from the great mail order house of which he is president and from other business organizations with which he is connected is estimated to be about \$1,500,000 a year.

Harvard and Johns Hopkins have at present the greatest medical schools in the country; Columbia has announced its firm intention to own for itself the greatest medical school in the country; the University of Chicago, by the latest news published, seems to have fairly in sight the possession of the greatest medical school in the country. Indeed it is certain that Chicago would accomplish its purpose, if it could be won by sheer weight of money and of the brains and work that money can buy. To the development of Chicago's medical school, the Rockefeller Foundation has now given \$2,000,000, the University will contribute \$2,000,000 in cash and \$500,000 in a building site, and the friends of the University will be asked to subscribe \$3,500,000 more. The various items produce the great total of \$8,000,000 for the endowment and equipment of a single medical school, which is also to have control of the plant and equipment of the Presbyterian Hospital in Chicago, valued at another \$3,000,000. The fact is, of course, that much will depend upon the intelligent direction, and upon the spirit of the direction, of such vast funds as these in determining the conclusion whether the University of Chicago is really to create the greatest medical school of the country in a sense other than that of mere size and of material efficiency. But there is reason to hope that such direction will prevail in Chicago, and, accordingly as it is, the medical school of the University will find itself not striving for mere preeminence among its fellows—for the championship pennant as it were—half so much as it will find itself striving to do its own work well, in a way and in a spirit that can prove worthy the support by which public and private benefactors throughout the country are showing themselves, through their gifts to hospitals and medical schools, eager to give in the twentieth century for the great cause of public health and the relief of suffering.

SUNDAY ED 54

JULY 1, 1912. FEATURE—SUNDAY ED.

By HARRY PRATT JUDSON.

[President of the University of Chicago.]

THE great medical school, or rather the two schools, which now seem near a reality after years of working and planning mean much to the University of Chicago and more to this great western metropolis. The schools will be a great addition to the resources and power of the university, but they will render a greater service to Chicago and to the cause of medical teaching and investigation throughout the entire country.

According to our plans, if our hope is realized, we are to have two medical schools, one for undergraduates and the other for practicing physicians. In the undergraduate school the standards of admission and of graduation will be as high as those of any medical school in this country. It will not be our purpose to turn out several thousand physicians yearly; we shall limit the number to about three hundred and fifty. This limit will be placed to get the best possible training with the facilities available. Our standards shall be the highest. To this end four years will be required in the undergraduate school and a one-year internship.

The graduate medical school will be on the West Side, in connection with the work now done by Rush Medical School and the Presbyterian Hospital. It will provide for graduates and for practicing physicians who wish to continue their studies or to do special research work.

There will also be a teaching hospital fully equipped with necessary laboratories and lecture rooms that will provide for clinical instruction. The sociological influence of these hospitals will be as potent as the scientific. We are coming to take the point of view of the Chinese that preventive medicine is of the greatest importance, because it means the lessening of crime and poverty. To enlighten the community on the causes and the prevention of different diseases will be an important part of our work.

To make these two medical schools possible there will have to be an endowment of \$5,300,000, of which the University of Chicago will have to raise \$3,300,000 to obtain the endowment of \$2,000,000 appropriated last week by the general education board and the Rockefeller Foundation. Julius Rosenwald has helped to make a part of the fund of \$3,300,000 a splendid reality by contributing \$500,000, and a number of other Chicago philanthropists have contributed \$700,000 more.

I feel confident that the \$2,100,000 more needed will be obtained rapidly, as the friends of the University of Chicago, as well as of the welfare of our city, appreciate what these medical schools will mean to our city. Dr. Flexner and many another physician well versed in scientific training and medical research say that there is no more fertile field for useful effort than medical training and research work, aided by well equipped laboratories and clinics. The research laboratories will enable the medical and scientific men of this city and country to fight plagues and deadly diseases by finding serums. The laboratories will equal those of the Pasteur Institute and others of Paris and of the splendidly equipped laboratories of Freiburg and of Strassburg.

Research work will be carried on in both undergraduate and graduate schools. As the schools develop, especially the graduate school, special departments for the study of diseases of the nose, ear and eye treatment will be established so that physicians who have had a general medical training can continue their studies along a special line. They may go one step further and experiment along certain lines, such as the Rontgen treatment for cancer and the value of twilight sleep.

By getting the endowments expected the teaching hospital will be equipped with laboratories and lecture rooms, needed for clinical instruction. These endowments will free the hospital from the necessity of depending on paying patients and the faculty from the necessity of practicing for a livelihood. The importance of research work has been appreciated for some time in Germany, France and England, where well equipped hospitals and clinics have been founded. Physicians and scientists, while at work, have been supported by their governments or by private gifts, so they could give their genius and their lives to some special field of scientific research without worrying about remuneration. The first step in this direction was taken by the Rockefeller Foundation, and we hope to do this as well or better.

In these research laboratories we can test serums that have been found in European laboratories and see that they are all they are supposed to be before they are put broadcast upon our market. Again there are diseases, such as infant paralysis, that are more common in this country than in Europe, and specialists in this disease and other typical American diseases can best combat them by studying bacteria in clinics and laboratories.

Many diseases, such as cancer, can be cured only by treating patients and keeping them under careful surveillance of attending physicians. This, too, we have planned for. These institutions will breathe a democratic influence. The poorest patient will have the same chance to the best medical treatment and will benefit by the results of our successful experiments along with the richest.

We hope that most of our physicians who are trained or work in either of our hospitals will so imbibe the idea of helping weak, suffering humanity that they will be more interested in their cures than in their remuneration. Once trained in these high standards of efficiency, they will carry them into their private practice, endeavoring to give the best, and only the best. By having the greatest scientists and physicians at work in our laboratories and hospital we shall socialize medicine in a way the profession has never been used in this country, and in time to come let us hope Chicago—Chicago, known as one of the world's greatest commercial centers—also will be recognized as one of the great medical cities of this country, if not of the world.
