January 5, 1920.

My dear Mr. Judson,

Now that the exacting demands of the war are over, we are more than ever impressed with the needs for aid and care in civilian life. It is with this in mind that plans have been made for enlarging the scope of our Prevention of Blindness work. Since the return of your Secretary from a year's leave of absence in overseas service in France, Miss Whiting who has been conducting the work has now been appointed Field Secretary.

In addition to the care of Ophthalmia Neonatorum by which we are constantly saving needless blindness and the care of the eyes of school children with defective vision through obtaining careful examination, skilled treatment and glasses when necessary, we have now entered upon an active campaign against Trachoma. There appears to be an astonishing prevalence of this disease among the population of our State.

In the furtherance of these efforts we ask your sustained interest. As a member of this Society on January 31st 1919 you aided the work by contributing to its support \$ 2.00 as Annual Dues. The Society needs the hearty support and co-operation of its members to make possible this increased usefulness.

Kindly make check payable to Mr. Watson F. Blair, Treasurer, and mail to the office of the Society, Miss Dorothy L. Blatchford, Secretary - 122 So. Michigan Ave.

Sincerely yours,

*Dorothy L. Blatchford*  
Secretary.

January 5, 1932

My dear Mr. Watson:

Now that the exacting demands of the war are over, we are more than ever impressed with the needs for aid and care in civilian life. It is with this in mind that plans have been made for enlarging the scope of our Prevention of Blindness work. Since the return of your Secretary from a year's leave of absence in overseas service in France, Miss Welling who has been conducting the work has now been appointed Field Secretary.

In addition to the care of Ophthalmia Neonatorum by which we are constantly saving needless blindness and the care of the eyes of school children with defective vision through obtaining careful examination, skilled treatment and glasses when necessary, we have now entered upon an active campaign against Trachoma. There appears to be an astonishing prevalence of this disease among the population of our State.

In the furtherance of these efforts we ask your sustained interest. As a member of this Society on January 1st 1932 you aided the work by contributing to its support \$2.00 as Annual Dues. The Society needs the hearty support and co-operation of its members to make possible this increased usefulness.

Kindly make check payable to Mr. Watson F. Blair, Treasurer, and mail to the office of the Society, Miss Dorothy L. Blatchford, Secretary - 122 So. Michigan Ave.

Sincerely yours,

*Dorothy L. Blatchford*  
 Secretary.
