

Pres. Harper at
Williams Bay.
Sept. 1904. Is
much interested
in success of
"World Today" enterprise.

1904.

Sept. 12th, 1904.

Mr. Francis W. Parker,

1410 Marquette Building, Chicago.

My dear Mr. Parker:-

I regret very much that I cannot be present at the annual meeting of the stock holders because I am out of the city. I sincerely hope the reports concerning which I have already been informed will be a source of encouragement to those who are interested in the enterprise. I believe myself that the outlook is better than ever before, and this is saying a great deal because I have always had a strong belief in the success of the enterprise. If we could join hands now to push things forward, we will have a piece of property well worth possessing, and at the same time a piece of property that will be of value to all concerned.

Yours very truly,

W. R. Harper

In Re World Today

- - - -

Dr. Wm. R. Harper,

Williams Bay, Lake Geneva, Wis.

My dear Dr. Harper:-

We are expecting to make at the annual meeting of the World Today Company a very fine showing and a very encouraging one. The meeting will doubtless lead to another forward financial effort which we all believe will be easily successful and will result in settling forever the financial difficulties and putting the paper on its feet properly. Of course you know that in reputation, circulation and advertising the paper has improved by leaps and bounds.

I am sure that your absence will be a distinct set back and I do wish that it might be possible for you to be present if only for a few moments. If that is impossible perhaps you might write to me, as president of the company, something which could be read and which would tend to aid the general feeling of encouragement which I think will exist in any event. I sincerely hope that it may be possible for you to alter your plans so as to be present for at least a short time.

With great regard, I am,

Very truly yours,

Francis W. Parker,

Dict. F.W.P.
A.E.J.

Chicago. October 7, 1904.

FRANCIS W. PARKER.
DONALD M. CARTER.

Dr. Wm. R. Harper,
Pres. University of Chicago,
Chicago, Ill.

My dear Doctor:-

We are straining every nerve to sell the balance of the preferred stock in the World Today Company. We desire to have a considerable number of relatively small stockholders. We find that this gives us more strength or a wider constituency of friends. Such stockholders are useful to us.

I think Prof. Matthews has been promising to put Mr. Johnson in touch with you for the purpose of getting you to help him by way of introductions and the like to meet certain gentlemen who are thought likely to subscribe. I think he has particularly in mind some physicians who are friends of Dr. Ferguson, one of our shareholders.

I sincerely hope that you can help us at this time. We sometimes seem to have reached the end of our resources but at the same time the paper grows stronger and better and the situation more encouraging all the time.

Thanking you in advance and with great regard, I am,

Very truly yours,

Dict. F.W.P.
A.E.J.

October 28, 1904.

Mr. Harold F. McCormick,
Chicago.

My dear Sir:-

The bearer of this letter, Mr. Francis W. Parker, is known to you as a man who is interested in Chicago matters. I believe that you have never known me to interest myself in a so-called business matter, or to make an effort in connection with any enterprise of a purely business character. I am interested in the work which Mr. Parker will present to you, because I am looking at it from the educational point of view. The World Today has taken a splendid place among magazines. It is a matter of great importance in my opinion that we shall firmly establish in the city of Chicago a journal of this character. We cannot give expression to our thought, and to the work which we represent, without a medium of this character. As you are aware, magazine enterprises have so far in Chicago failed. This particular enterprise seems to have reached a point where it may fairly be said from a business point of view that it is on solid ground. This part of the matter Mr. Parker will present in detail.

Believing myself that it is a good business investment, believing further that it will be another ally in the literary

October 8, 1901.

Mr. William H. Woodruff,

Chicago.

My dear Sir:-

The power of this letter, Mr. Woodruff, is that it is written to you as a man who is interested in Chicago matters. I believe that you have never known me to interest myself in any of the business matters, or to make an effort in connection with any enterprise of a purely business character. I am interested in the work which Mr. Parker will present to you, because I am looking at it from the educational point of view. The world has never seen a splendid place among nations. It is a matter of great importance in my opinion that we shall finally establish in the city of Chicago a journal of this character. We cannot give expression to our thoughts, and to the work which we represent, without a medium of this character. As you are aware, magazine enterprises have been in Chicago for years. This method of enterprise seems to have reached a point where it may fairly be said to be a business point of view. That is an old ground. This part of the matter, Mr. Parker, is important in itself.

Respectfully,
W. H. Woodruff

My dear Mr. Kraft:

University of Chicago,
Chicago, Illinois.

I am in receipt of your letter of the ninth instant and will give its contents full consideration at an early date.

Enclosed I send you a statement of the January number of the World To-Day, statement of the assets and liabilities, an estimate of the prospective earnings of the February number, and a statement of your personal account. An examination of these statements I think

will show that substantial progress is being made in the development of the business. The notes given in settlement of the printing and paper bills on last year's business are, however, maturing, and must be paid as they become due. The funds for the payment of these notes must be provided from the sale of the remaining capital stock, and the collection of the present outstanding subscriptions.

I have tried on several occasions to see you to explain what was being done regarding the sale of the stock, and the general condition of the business, but have been unable to get to see you. About \$10,000. has been subscribed toward the balance of this stock, most of it conditioned upon the securing of pledges for the remainder, and the payment of existing pledges. This leaves about \$5,000. more to be sold. It would very greatly help us at this time if we could receive the balance of your subscription or to have it put in such shape, by means of a note or otherwise, that it could be treated as paid up, and so shown on the books of the company. Will you not

		\$ 1795.78

The above statement shows a good profit notwithstanding the fact that advertising is considerably less than for previous months. (January is one of the dull months for advertising on account of magazines being issued during holiday week. All magazines show a large decrease for January).

The advertising carried in "The World To-Day" for November was \$4723.85; for December \$4817.30. For February we have already in over \$4500. in advertising. (Jan'y. 10th).

in cleaning up matters. The case is in my own opinion
and in that of the physicians rather hopeless. I have
enabled my brother who is in Constantinople and my son

My dear Mr. Wallace:-

It was very good of you to
send me under date of January 17th the letter as well as
the article for The World To-Day. I appreciate this
very much indeed. The material has been placed in the
hands of Mr. Mathews, the editor, and will, I am sure,
come out in good shape. I do not know what compensation
they will send you, but I hope it will be at least a
reasonable one. We appreciate your letting us have an
article for which we know that you could have received
hundreds of dollars from somebody else.

I had a talk Friday with Dr. Senn and he told of
his meeting you and Mrs. Wallace. I was surprised to
learn that Mrs. Wallace had lost so many pounds of flesh.
He says that you are in excellent condition. I hope
that you will remain so

I have an unpleasant task to perform in telling you
that I am to undergo another operation within two weeks.
The doctors, after a careful microscopic examination of
the appendix which was removed a year ago suspect very
strongly cancer. I am occupying the two weeks that remain

in cleaning up matters. The case is in my own opinion
and in that of the physicians rather hebeless. I have

cabled my brother who is in Constantinople and my son

My dear Doctor:

who is in Moscow to return and they will be here in ten

days. If you do not hear from me again, please know that

I recall with great pleasure and satisfaction the friend-

ship which I have enjoyed with Mrs. Wallace and yourself,

and it is one of the pleasantest things to which I look

back in my life. Goodbye,

Your friend

I attach five photographs illustrative of this work. W. R. Harper is a modern

American steam shovel, weighing seventy tons, with a dipper holding 2 1/2
cubic yards of material, which was the first American steam shovel installed
on this work, and was erected in December, 1904. "B" shows a ninety-five
ton shovel, which commenced work on December 22, 1904, the dipper holding
5 cubic yards of material. This shovel is now at work excavating blasted
rock, as shown in the photograph. "C" shows two of the French excavators,
and "D" steam drills at work on one of the rock ledges. This picture shows
to the left the character of the hard, basaltic rock, of which a part of the
work consists. "E" gives a general view of the Culabra excavation as it
was on December 20, 1904, the lowest part of this excavation being 150 feet
above sea level and the original surface of the hill being 300 feet above
sea level, a difference in elevation between the top of the original ground
to the left of the picture and the surface water and bottom of the excavation
of 150 feet.

Very sincerely yours,

John F. Mullock

I recall with great pleasure and satisfaction the friend-
ship which I have enjoyed with Mrs. Wallace and yourself,
and it is one of the pleasantest things to which I look
back in my life. Goodbye, and with love to all.
Your friend
W. R. Harper
We appreciate your letter and have received
articles for which we know that you could have received
much more of value from somebody else.
I had a talk Friday with Dr. Gann and he told me
his meeting you and Mrs. Wallace. I was surprised to
learn that Mrs. Wallace had lost so many years of life.
We hope that you are in excellent condition. I hope
that you will remain so.
I have an unpleasant task to perform in telling you
that I am to undergo another operation within two weeks.
The doctor, after a careful microscopic examination of
the organ which was removed a year ago, expects very
badly cancer. I am assuming the two weeks that remain

Chief Engineer.

Panama, January 17, 1905.

Dr. William Harper,
President, Chicago University,
Chicago, Illinois.

My dear Doctor:

I submit to you, herewith, a short sketch on the Panama problem, which I would like to have you look over personally, and if you think it is suitable matter for publication in THE WORLD TODAY, you may let the editor have it. I would suggest that, if it is published, it come out as soon as possible, as the information contained therein may be particularly interesting to the public at this time.

I attach five photographs illustrative of this work. "A" is a modern American steam shovel, weighing seventy tons, with a dipper holding 2 1/2 cubic yards of material, which was the first American steam shovel installed on this work, and was erected in December, 1904. "B" shows a ninety-five ton shovel, which commenced work on December 22, 1904, the dipper holding 5 cubic yards of material. This shovel is now at work excavating blasted rock, as shown in the photograph. "C" shows two of the French excavators, and "D" steam drills at work on one of the rock ledges. This picture shows to the left the character of the hard, basaltic rock, of which a part of the work consists. "E" gives a general view of the Culebra excavation as it was on December 20, 1904, the lowest part of this excavation being 150 feet above sea level and the original surface of the hill being 300 feet above sea level, a difference in elevation between the top of the original ground to the left of the picture and the surface water and bottom of the excavation of 150 feet.

Very sincerely yours,

John F. Mullock

Mr. William Harper,

President, Chicago University,

Chicago, Illinois.

My dear Doctor:

I submit to you, herewith, a short sketch on the Panama problem, which I would like to have you look over personally, and if you think it is suitable matter for publication in THE WORLD TODAY, you may let the editor have it. I would suggest that, if it is published, it come out as soon as possible, as the information contained therein may be particularly interesting to the public at this time.

I attach five photographs illustrative of this work. "A" is a modern American steam shovel, working heavy work, with a dipper holding 2 1/2 cubic yards of material, which was the first American steam shovel installed on this work, and was erected in December, 1904. "B" shows a thirty-five ton shovel, which commenced work on December 22, 1904, the 15-ton dipper holding 2 cubic yards of material. This shovel is now at work excavating blasted rock, as shown in the photograph. "C" shows two of the French excavators and "D" shows drills at work on one of the rock ledges. This picture shows to the left the character of the hard, banded rock, of which a part of the work consists. "E" gives a general view of the Colón excavation as it was on December 20, 1904. The lowest part of this excavation being 150 feet above sea level and the original surface of the hill being 300 feet above sea level. A difference in elevation between the top of the original ground to the left of the picture and the surface water and bottom of the excavation

Very sincerely yours,

John F. Miller
