## THE UNIVERSITY OF CHICAGO WAR SERVICE

In the national crisis the University of Chicago ~~promptly and whole heartedly~~ placed its resources at the disposal of the government. The swiftly changing relationships which the emergency demanded cannot all be listed in this brief report. Indeed those in whose persons the University service was most effectively embodied were so eager to accomplish a patriotic task that they quite properly had little thought or time for recording their personal works. Even since the armistice it has been difficult to assemble information about the activities of members of the University, some of the most notable achievements remaining unknown to the University of Chicago War Service owing to the modesty of the principals. This report, of necessity incomplete, is merely one of progress in gathering material for the history of the participation of the University of Chicago in the Great War.

The members of the University of Chicago were from the beginning deeply affected by the war in Europe. In the Spring Quarter of 1916 the Faculty of the Colleges approved a plan for the organization of a Department of Military Science and Tactics. The act of Congress providing for the organization of the Reserve Officers' Training Corps and for the detail of officers of the army to colleges and universities was passed in June, 1916. The Circular of Instructions was issued by the War Department in September following, and application was immediately made by the University for the detail of an army officer. In January, 1917, the War Department detailed Major Ola W. Bell, United States Cavalry, for the University, and he was duly appointed by the Board of Trustees as Professor of Military Science and Tactics. The plan for military instruction was adopted by the College Faculty and put into immediate operation. About 550 students registered in the Corps and carried on active training in infantry drill, besides attending lectures by the Major on military subjects.

An ambulance company under the auspices of the American Red Cross was also formed. The officers were: captain, Elbert Clark; first lieutenants, Edwin F. Hirsch, A. G. Bower, C. W. Sweet; acting first lieutenants, A. B. Luckhardt, George O. Caldwell; first sergeant, Michael Leahy. The company contained eighty-five men. Many of them spent the entire spring recess of 1917 in pursuing the training. Whenever needed they will be turned over by the Red Cross to the United States Ambulance Service for use in the army.

The Board of Trustees at its April meeting voted to offer the scientific laboratories of the University to the national government for war uses. This action of the Board was taken on a request signed by some fifty members of the various laboratory departments, and practically all the members of the science departments offered their services in case the government needed the laboratories.

At a meeting of ninety members of the Faculties and Administrative Officers of the University of Chicago held in Harper Assembly Room, Thursday, March 15, the following committee was appointed with power to add to its number: Mr. F. J. Miller, Mr. Julius Stieglitz, and Major O. W. Bell. The following resolution was adopted:

In the presence of a great national crisis, we, the members of the Faculty of the University of Chicago, herewith declare our unswerving loyalty to our country and our readiness to offer her our services whenever they can be used to advantage.

*Resolved*, That the situation in which the country is placed demands the immediate inauguration of a system of military service in which every individual of suitable age shall be at the service of the government.

The next meeting of the members of the Faculties and Administrative Officers of the University of Chicago was held on Wednesday, March 21, in Harper Assembly Room. The following resolution was adopted:

At a meeting, held Wednesday, March 21, 1917, of members of the Faculties and of Officers of Administration of the University of Chicago, called by some of its members to consider practicable measures of military and scientific preparation in the present crisis of the country, the following memorial was passed and, signed by its supporters, ordered transmitted to the President of the United States, the Secretary of War, and the senators and representatives of the state of Illinois:

We express our conviction that, in the present state of the world, the security and defense of the country would be best assured by an adequate system of universal military training combined with universal preparation for citizenship and for military, industrial, or scientific service in case of war.

We also express our conviction that the United States of America can best further the cause of world-peace, international justice, and free development of peoples, if it speaks as a country in a state of complete preparedness for defense.

The committee appointed at the first meeting held a meeting on March 30. In accordance with authority vested in its appointment its membership was enlarged to include: J. R. Angell, O. W. Bell, A. J. Carlson, J. M. Coulter, J. M. Dodson, H. G. Gale, W. S. Gray, W. G. Hale, J. M. Manly, Fred Merrifield, A. A. Michelson, F. J. Miller, Newman Miller, E. H. Moore, D. B. Reed, D. A. Robertson, R. D. Salisbury, F. W. Shepardson, A. W. Small, J. Stieglitz, Adolf C. von Noé, Elizabeth Wallace.

Indeed in the weeks succeeding the declaration of war, many committees official and unofficial immediately began enthusiastic and efficient work in mobilization. Inevitably the work of some committees overlapped that of others, and very quickly it became apparent that a reorganization of all committees was desirable. At the same time it was felt by all concerned that it was highly important to retain the momentum already gained by some of the active committees. To make the most of the energies of those persons working in existing organizations and to make possible the contribution of service by all members of the University, a committee comprising members of active groups recommended to the President of the University the following scheme. This was adopted by the President, who at the same time appointed chairmen of committees.

On duty as office of surgeon general, Washington, D.C., April 10, 1919-July 20, 1919. Commissioned as major, Quartermaster's Section, Reserve Army, November 27, 1919.

Alumni and students of the University were no less eager than members of the faculty. In this group statistics are even more difficult to secure than in the first period. At present there is a record of 4,857 living and former students who were in service.

Of these 985 received commissions. Four American ones were members of the University of Chicago: John Seelye, Duerson Knight, Thomas G. Cassidy, and Harry H. Strachan. The Alumni Office has a record of more than two-hundred conspicuous honors, medals, citations, and other distinctions. A full account of the service of these members of the University will be a proud record for all time.

President's Report.

The two University years from July 1, 1917 to June 30, 1919 covered practically the period of active hostilities during the war in which the United States was engaged with the Central Empires of Europe. The University felt with other institutions of learning in the United States the effect of war upon its activities. At the outset the Board of Trustees offered the United States Government the use of all its laboratories with the laboratory staff. Members of the Board of Trustees and the Faculty were engaged in such forms of war-work as they were fitted to accomplish. Many of the students or the alumni entered the army or the navy. Many who would have normally begun their college or university work during that period also engaged in the national service. Obviously therefore the attendance was greatly diminished.

During the autumn of 1918 the Student Army Training Corps took the place very largely of the normal work of the young men.

On the details of the University war service and the effect of the war on the work of the quadrangles it is not necessary to dwell in this place. Full reports are made elsewhere. It need only be said that the University did all in its power to add

aid and felt grateful that had facilities which were in many ways useful to the national cause. It is proud of the students and alumni who gave their lives for their country and their names will be cherished through all the years to come.

It is believed that the colleges of the country at large were able to contribute very materially toward the victory of American arms. In peace and in war our educational institutions exist for the service of the nation.

PRESIDENT JUDSON'S WAR SERVICE

The events leading up to the declaration of war by the United States of America naturally caused the people of this country through newspapers, not only in Chicago and New York, but throughout the country, to seek the expert opinions of life-long students of International Law. So it was that the President of the University of Chicago who is also Professor of International Law <sup>+ Diplomacy</sup> and Head of the Department of Political Science was frequently requested to express himself on points at issue between this country and Germany. In contributing to clear thinking about the international relations of the United States of America, President Judson has rendered great service. Since the declaration of war this leadership has been extended not only through interviews in the public press but through formal addresses like that delivered in Leon Mandel Assembly Hall and elsewhere.

The attitude of the President of the University toward service, an attitude which might be expected of a person who as a boy endeavored to enlist as a drummer in the Union Army and who served as an officer of one of the famous private military organizations of the country: the Troy Citizens' Corps, greatly facilitated the organization of the University on a war basis. From the beginning he has been interested in the success of the Reserve Officers' Training Corps, himself appearing on Stagg Field for drill; subsequently after the recall of Major Bell and before the appointment of Major Tolman, he, himself prepared to take charge of the drilling

of the Corps. With Major Tolman he worked out the excellent plan for drilling drafted men for positions as non-commissioned officers, and in other ways he has supported the members of the faculties, alumni and students in their efforts to contribute to the Government their varied forms of service. The extent to which he has been able to do this will appear in part in the report on the University War Service to be printed in the October number of the University Record. President Judson is the chairman of the University of Chicago War Service.

That President Judson should be requested to serve on national state and municipal war committees seems perfectly natural in view of his special field, his administrative experience and his known views. As a matter of fact, requests for his membership on committees became so frequent that he put into operation a long established rule of refusing to serve upon committees unless he could actually contribute time, thought and energy thereto. Up to the present time he has been acting upon the following committees: Council of National Defense; Commission on Mediation and Conciliation of the Committee on Labor of the Advisory Commission of the Council of National Defense; Educational Section of the Committee on Science and Research of the Committee on Engineering and Education of the Advisory Commission of the Council of National Defense; Board of Directors, The Citizens' War Board of Chicago; National Committee of One Hundred of the National Civic Federation to cooperate with the Committee on Industrial Mobilization of the National Council of Defense; Navy League

of the United States; National Security League; National Research Council of the National Academy of Sciences; Committee on Education of the Commission on Training Camp Activities of the National War Work Council of the Young Men's Christian Association of the United States; Ways and Means Committee of the Young Men's Christian Association War Work Fund; Chairman of Federal Exemption Board for Division Number One of the Northern District of Illinois, etc. etc.

It is the last named appointment which has recently claimed most of President Judson's time. While he was on vacation in New England, a telegram from the Adjutant General recalled him to Chicago to organize the Exemption Board of District Number One. Since that time the President, except for one hour each morning, has given his entire time to the Government.

There are many ways in which President Judson has been a guiding hand in making our country efficiently ready for war service. Some of these ways cannot now be mentioned. Apart from these activities, however, his principal services have been as indicated: he has contributed largely to a right the formation of a right public opinion; as chairman of the University of Chicago War Service he has led his forces of the University of Chicago in a speedy and efficient movement for preparedness; he has contributed his judgment to a large number of important committees; he has served loyally as chairman of the Federal Exemption Board, District Number One Northern Illinois.

My dear Sir:

The Government requirements for platinum for war purposes are so urgent that it is necessary to have a statement as to what weight of platinum you have in the various laboratories under your control.

Please make the inventory under five heads: (1) Crucibles; (2) Dishes; (3) Foil; (4) Wire; (5) Miscellaneous (please be specific.)

Further, what part of this total is absolutely essential to carry on the regular work of instruction, research, etc.

It is not proposed in any way to restrict the scientific work which you are doing, but it is important to know what part of your platinum supply could be put to Government uses.

It is asked that in making the statement you will please be sure that the items are carefully checked by competent authorities.

Yours very truly,

From Relief

Chicago, November 20, 1916

Dear Mr. Dinsmore:-

The letter which has been sent to President Vincent for his approval is as follows:

While we are expending large sums to enjoy this game five and a half million prisoners of war in the belligerent European countries are seeking to communicate with their families, organize and equip classes, reading rooms, social centers. To conduct this and other work the several governments have permitted in the camps only the American Young Men's Christian Association. For funds appeal has been made especially to American Universities and their friends. At this great athletic festival and on the eve of our annual Day of Thanksgiving let us give liberally and impartially for these prisoners of war.

HARRY PRATT JUDSON  
GEORGE EDGAR VINCENT

I do not think that he will raise any objection to the use of his name and I do not believe you are taking any chances in having the letter set up at once.

Re: War Tax.

Ans. yours of

To Mr. David A. Robertson:

The war revenue act of October 3, 1917, provides as follows with regard to the war tax on dues.

Section 701.

"That from and after the first day of November, 1917, there shall be levied, assessed, collected and paid, a tax equivalent to 10 per centum of any amount paid as dues or membership fees (Including initiation fees) to any social athletic or sporting club or organization where such dues or fees are in excess of \$12 a year, such taxes to be paid by the person paying such dues or fees. Provided, that there shall be exempted from the provisions of this section all amounts paid as dues or fees to a fraternal beneficiary society, order, or association, operating under the lodge system or for the exclusive benefit of the members of a fraternity itself operating under the lodge system and providing for the payment of life, sick, accident, or other benefits to the members of such society, order or association or their dependents."

The act makes it the duty of the association or organization receiving the dues to collect the tax from the person making the payment, and to make returns and payments of the amount so collected monthly under oath, in duplicate, upon forms which the Commissioner of Internal Revenue may by regulation prescribe. These forms will be available within a few weeks at the office of the Bureau of Internal Revenue, Federal Bldg. Chicago.

I would like to suggest for your consideration that this matter be brought to the attention of the interfraternity council, or of the Board of Student Organizations, to the end that the various fraternities and clubs which come within the purview of the act, may be advised of their liabilities under the act, and to prepare to pay the tax as required. Of course, the duty is on the individual association, and not upon the University, but the above suggested service will undoubtedly help both the organizations affected and the government.

My dear President Judson:

Sometime ago you were invited from this office not only to become a member of this League, but to accept membership upon its National Advisory Board. This Board consists of a selected company of prominent citizens of each state of the Union, whose chief service to the League will take the shape of moral support, for membership upon the Board involves no expectation of financial assistance. Dr. Albert Shaw of the American Review of Reviews has already consented to serve as the President of that Board. It is possible that the invitation, which was sent to you, has been overlooked and I, therefore, venture to write again, hoping that you will approve of our platform and purpose and will lend us the support of your name and influence.

We are not trying to end the war. Our attention is centred upon the question of world organization after the war is over. Our aim is not so much international peace as international justice. We want to secure the creation of the institutional machinery for international justice and the support of active public opinion to demand the use of such machinery. We believe that peace without justice is not worth having.

Unlike the League to Enforce Peace, the World's Court League does not go so far as to ask our government to give any pledge beforehand, concerning the employment of its armies and fleets in contingencies, the circumstances of which cannot now be foreseen. The latter League wants our government to take its place at the council table of nations and to accept responsibility for the maintenance of order in the world so far as it rightly belongs to us, but under conditions that will always reserve to us complete liberty of decision and action.

Hoping that I may hear from you, I remain,

Yours sincerely,

# DAY LETTER

## ALL DAY LETTERS TAKEN BY THIS COMPANY SHALL BE SUBJECT TO THE FOLLOWING TERMS WHICH ARE HEREBY AGREED TO

The Western Union Telegraph Company will receive **DAY LETTERS**, to be transmitted at rates lower than its standard day message rates, as follows: one and one-half times the standard night letter rate shall be charged for the transmission of fifty (50) words or less, and one-fifth of the initial rate for such fifty words shall be charged for each additional ten (10) words or less.

To guard against mistakes or delays, the sender of a message should order it **REPEATED**, that is, telegraphed back to the originating office for comparison. For this, one-half the unrepeat message rate is charged in addition. Unless otherwise indicated on its face, **THIS IS AN UNREPEATED MESSAGE AND PAID FOR AS SUCH**, in consideration whereof it is agreed between the sender of the message and this Company as follows:

1. The Company shall not be liable for mistakes or delays in the transmission or delivery, or for non-delivery, of any **UNREPEATED** message, beyond the amount received for sending the same; nor for mistakes or delays in the transmission or delivery, or for non-delivery of any **REPEATED** message, beyond fifty times the sum received for sending the same, unless specially valued; nor in any case for delays arising from unavoidable interruption in the working of its lines; nor for errors in obscure messages.

2. In any event the Company shall not be liable for damages for any mistakes or delay in the transmission or delivery, or for the non-delivery of this message, whether caused by the negligence of its servants or otherwise, beyond the sum of **FIFTY DOLLARS**, at which amount this message is hereby valued, unless a greater value is stated in writing hereon at the time the message is offered to the Company for transmission, and an additional sum paid or agreed to be paid based on such value equal to one-tenth of one per cent. thereof.

3. The Company is hereby made the agent of the sender, without liability, to forward this message over the lines of any other Company when necessary to reach its destination.

4. Messages will be delivered free within one-half mile of the Company's office in towns of 5,000 population or less, and within one mile of such office in other cities or towns. Beyond these limits the Company does not undertake to make delivery, but will, without liability, at the sender's request, as his agent and at his expense, endeavor to contract for him for such delivery at a reasonable price.

5. No responsibility attaches to this Company concerning messages until the same are accepted at one of its transmitting offices, and if a message is sent to such office by one of the Company's messengers, he acts for that purpose as the agent of the sender.

6. The Company will not be liable for damages or statutory penalties in any case where the claim is not presented in writing within sixty days after the message is filed with the Company for transmission.

In further consideration of the reduced rate for this special "**DAY LETTER**" service, the following special terms are hereby agreed to:

A. **DAY LETTERS** may be forwarded by the Telegraph Company as a deferred service and the transmission and delivery of such **DAY LETTERS** is, in all respects, subordinate to the priority of transmission and delivery of regular day messages.

B. **DAY LETTERS** shall be written in plain English. Code language is not permitted.

C. This **DAY LETTER** may be delivered by the Telegraph Company by telephoning the same to the addressee, and such delivery shall be a complete discharge of the obligation of the Telegraph Company to deliver.

D. This **DAY LETTER** is received subject to the express understanding and agreement that the Company does not undertake that a **DAY LETTER** shall be delivered on the day of its date absolutely and at all events; but that the Company's obligation in this respect is subject to the condition that there shall remain sufficient time for the transmission and delivery of such a message on the day of its date during regular office hours, subject to the priority of the transmission of regular day messages under the conditions named above.

## URG FOR DEFENSE

President Urges American

The project of a true international court of justice has been sufficiently examined. It was adopted in principle by the forty-four States composing the Second Hague Conference (1907), was endorsed by the Institute of International Law (1912), and since 1907 has received the hearty support of all the leading powers, including Germany. It has been exhaustively studied at four annual conferences of the American Society for Judicial Settlement of International Disputes and by foreign governments and publicists. For many years the American Peace Society and the Mohonk Conference have strongly advocated it. It is approved by thoughtful men everywhere.

Practical men dislike to go on talking about projects when their desirability and practicability have been demonstrated. They want to see them realized. The project of the Court is a mature project. The time has come to put it into practice. That it will be a powerful additional factor for peace is not doubted. That it will build up international law, so essential to peaceful relations among men, is equally accepted.

The present unspeakable conflict abroad has brought with it a vivid conception of how unintelligent our present methods are, of how pitifully we lack the simplest machinery for the avoidance of conflict to which the internal organization of states points.

With a view to rousing the American public to a consciousness of the possibilities that lie in the creation of a true court of justice for the nations and so strengthening the hands of the Administration in their appeal for its early establishment, a congress has been planned for May 12, 13, and 14 at Cleveland, O. The congress is not under the auspices of any one society. Its governing committee hopes that all organizations opposed to war as a method of settling international disputes will lend their support.

## FOR DEFENSE

President Urges American  
Second Only To England's.

### NATION'S DUTY TO BE STRONG

Disarmament By One Or A Few  
Would Place Those Disarming In  
Position Of China, He Declares.

Theodore Marburg, former United States Minister to Belgium and president of the National Society for the Judicial Settlement of International Disputes, as well as of the Maryland Peace Society, has no illusions about disarmament. He believes that disarmament is a long way off, that for one nation or group of nations to disarm would be to put themselves in the position of China, and that the best guarantee of peace for the United States is to have a powerful navy and a much larger and far better trained militia than this country now has.

Mr. Marburg made his position plain to the executive board of the Maryland Peace Society, the members of which were his dinner guests on Thursday night at his home, 14 West Mount Vernon Place. This was the first gathering of the board since Mr. Marburg was elected president, on February 23. Those present included former Judge Henry D. Harlan, Dean Edward H. Griffin, of the Johns Hopkins University; Edward C. Wilson, Eugene Levering, Frank N. Hoen and Jonathan K. Taylor, all of whom are members of the board, and William A. Marburg, brother of the former Minister to Belgium. Mr. Marburg's position was warmly indorsed by practically all those present.

#### Navy Second Only To England's.

Mr. Marburg's attitude with reference to a large navy and a great increase in the citizen soldiery of the nation has caused surprise in certain quarters in view of his widely known position as an advocate of peace and of international disarmament, but this is the view he has consistently held. He believes that there should be a large increase in the output of officers from West Point and Annapolis in order that this country may have sufficient number of trained officers should the need for them ever come, as well as to serve as instructors for the militia, and he believes that the United States Navy should be second only to that of Great Britain. Whether the two-battleship-program was sufficient he said he was not expert enough to know, but he was firm in his belief that the navy of no country, with the possible exception of Great Britain, should be permitted to outclass that of the United States.

#### Country's Duty To Be Strong.

"Under present conditions," he said in an interview last night, "it is the duty of this country to remain strong. What we are trying to do is to build up international institutions so as to change the conditions which make war possible. Until that happens there can be no general disarmament of all the powers, and disarmament on the part of one power, or small group of powers, would place them in the position of China.

"There is just as much difference between international disarmament and local disarmament as there was between international bimetalism and our free-silver craze. This is not a change of view, but has always been the position of the men whose main efforts are directed to setting up a world court and

This property, while it has been used for hotel  
purposes, is easily converted into an apartment or  
rooming house or any other business where a large  
floor space will be required. It contains twenty-  
eight (28) sleeping rooms, with additional toilets  
and bathrooms attached, has large kitchen and  
dining room. It has gas and electric fixtures,  
and on the ground floor there are three large store  
fronts, and a large billiard or pool room in the  
rear. There is also a cement stable or garage in the  
rear. One of the store rooms is furnished with  
mahogany bar outfit, and the kitchen is equipped  
with a hotel gas range. There is a steam heating  
plant on the premises; fire escape, roofing and  
spouting have all been recently installed, and all  
of the rooms have been newly papered. The store  
fronts, Nos. 607 and 609 Ensor street, are both  
rented to desirable tenants.

If you are looking for a hotel proposition with  
a large future on account of its location, or  
want a large building located within the radius of  
great business activities, look this property over and  
come to the sale.

This property is in fee with the exception of  
the building No. 607, which carries a ground rent  
of \$113.75 per annum. The improvements consist  
of one **FOUR-STORY BRICK DWELLING** and

Dear Mr. Marburg:-

Your favor of the 3d inst. with enclosures is at hand. I am in entire accord with the project which you have in hand for the Congress in Cleveland, and am especially gratified by the ground you take as to American defense. It seems to me extremely important that as a means to the final end of, first lessening, and perhaps ultimately eliminating, international wars, the United States must be in a position to speak with power. If we are so weak that we are liable at any time to be attacked by any piratically-minded nation our weight in the counsels of the world will be negligible. Of course any organization of the United States on the German basis is unthinkable, but I am sure that we need to train our young men in the fundamentals of military science, and need to organize our army on a rational basis, so as to be enabled to defend ourselves if we should be attacked, and to defend ourselves with success. Practical men dislike to go on talking about  
projects when their desirability and practicability have  
been demonstrated. They want to see them realized.  
The project of the Court is a mature project. The time  
has come to put it into practice. That it will be a powerful  
additional factor for peace is not doubted. That it will  
build up international law, so essential to peaceful relations  
among men, is equally accepted.

The present unspeakable conflict abroad has  
brought with it a vivid conception of how unintelligent  
our present methods are, of how pitifully we lack the  
simplest machinery for the avoidance of conflict to which  
the internal organization of states points.

With a view to rousing the American public to  
a consciousness of the possibilities that lie in the  
creation of a true court of justice for the nations  
and so strengthening the hands of the Administration in  
their appeal for its early establishment, a congress has  
been planned for May 12, 13, and 14 at Cleveland, O.  
The congress is not under the auspices of any one society.  
Its governing committee hopes that all organizations  
opposed to war as a method of settling international dis-  
putes will lend their support.

PRESS NOTICE ON G. LOWES DICKINSON.

G. Lowes Dickinson, Esq., who will lecture under the auspices of the World Peace Foundation on "International Reconstruction After the War", is a lecturer and fellow of King's College, Cambridge University, England, and a lecturer at the London School of Economics and Political Science. Mr. Dickinson is recognized as an authority on the subject of international relations, and has been associated with a group of international thinkers in England. He is a member of the Advisory Council of the Council for the study of International Relations, which organization was formed in the spring of 1915 in England and of which the Rt. Hon. Viscount James Bryce is president. The aim of the Council is to promote the impartial study of international relations from all points of view. Others associated with the Council are Sir Oliver Lodge, Sir Horace Plunkett, Mrs. Philip Snowden, Graham Wallas, A Shirley Benn, M.P. Prof. Gilbert Murray, the Bishop of Oxford, and Ramsay Muir.

Mr. Dickinson has been in the United States on two previous occasions, in 1899-1900 and in 1909. He lectured in many of the leading universities and created a very favorable impression. He also toured the world in 1912-13 as the holder of an Albert Kahn Travelling Fellowship. The report of his experiences is embodied in a volume entitled, "An Essay on the Civilizations of India, China and Japan".

Mr. Dickinson has written a number of books, the best known of which are "Letters of John Chinaman" and "A Modern Symposium". The first named publication appeared anonymously in 1902 and everyone who read it thought that the author was a Chinese. William Jennings Bryan declared that the author never saw the inside of a Western Home.

Other books written by Mr. Dickinson are "From King to King", "Revolution and Reaction in Modern France", "The Development of Parliament in the Nineteenth Century", "The Greek View of Life", "The Meaning of Good", "Religion: a criticism and a forecast", "Justice and Liberty", "Religion and Immortality", and "Appearances". He has been a frequent contributor to the magazines of both England and the United States. His articles in the Atlantic Monthly of December, 1914, January, April and May, 1915, on "After the War" and "The War and the Way Out" attracted widespread interest.

To the Members of the Faculty  
of University of Chicago.

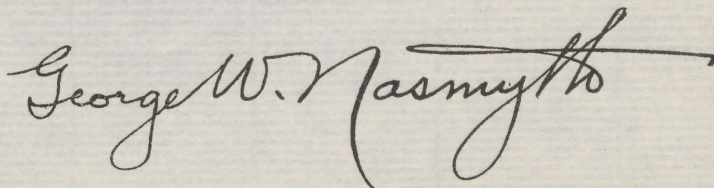

Dear Sir:

You will be glad to learn that Mr. G. Lowes Dickinson, lecturer and fellow in Political Science at Cambridge University, England, is to lecture at University of Chicago on April 5th.

Professor Dickinson is widely recognized as one of the leading international thinkers of Europe, and his articles on "The War and the Way Out," in the Atlantic Monthly last year, have attracted wide attention and favorable comment. I am enclosing herewith a reprint of these articles in the form of a pamphlet entitled, "The Foundations of a League of Peace."

Professor Dickinson prefers to treat his subject, "International Reconstruction After the War," in an informal, conversational manner, and welcomes especially the opportunity to answer questions at the close of his address. If you are interested in the subject and are able to attend this meeting, I am sure Professor Dickinson will appreciate the opportunity of meeting you, and of answering any questions which you may have to suggest.

Very truly yours,

You will be glad to learn that Prof. G. Lowes Dickinson of King's College, Cambridge, England, and lecturer at the London School of Economics and Political Science, is to visit the United States in February and March and the early part of April for a tour of the American colleges and universities. This opportunity to hear Professor Dickinson is offered without expectation of any compensation from the institutions which he will visit, as the expenses of the tour will be borne by the Foundation. According to the tentative itinerary which is now being arranged, Professor Dickinson will be in Chicago about April 5th, and I am writing to ask if you would desire to have him address the students of the University of Chicago at this time.

I am enclosing a biographical note concerning Professor Dickinson, and a reprint, in the form of a pamphlet on "The Foundations of a League of Peace", of his articles from the Atlantic Monthly, which will give you an indication of the nature of his lectures.

Very truly yours,

*George W. Nasmyth*

REPORT OF A CONFERENCE HELD AT WASHINGTON,  
MAY 3, 1917, UNDER THE AUSPICES OF THE COM-  
MITTEE ON SCIENCE, ENGINEERING, AND EDUCA-  
TION OF THE ADVISORY COMMISSION OF THE  
COUNCIL OF NATIONAL DEFENSE.

---

THE PURPOSE OF THE MEETING AND THE CALL.

In the conviction that it is highly important to formulate at once a comprehensive policy for cooperation between the higher institutions and the Government which will make the most effective use of these institutions throughout the duration of the war, the committee on science, engineering, and education of the advisory commission of the Council of National Defense decided to bring together for conference representatives of the principal associations of colleges and universities. The call for a meeting was accordingly issued to the presidents of the National Association of State Universities, the Association of American Agricultural Colleges and Experiment Stations, the Association of American Universities, the Association of American Colleges, and the Institutional Committee of the Society for the Promotion of Engineering Education, by Hollis Godfrey, Sc. D., president of Drexel Institute and chairman of the committee. Notice of the meeting was also sent to the officers of several institutions not affiliated with any one of these associations.

The committee proposed first to take steps, with the advice and approval of the conference, to establish a medium of communication between the higher institutions and the departments of the Government charged with the conduct of the war. It proposed, second, to secure the opinion of the conference as to the general policy to be pursued by the colleges and universities with regard to (a) immediate utilization of their resources for the Government service, (b)

possible modifications of curricula to fulfill the need for men trained in the technical branches and in military science, (c) maintaining and improving institutions of higher education for the training of the youth of the nation to meet the more difficult conditions of living which will follow the war. To this end a tentative draft embodying a series of resolutions and a statement of principles was prepared to be laid before the conference and to serve as a point of departure for its action.

The conference was held in Continental Hall, Washington, D. C., May 5, 1917. It was attended by officers of 187 institutions. The names of those who registered are appended. The following program contains the order of business. In addition to the speeches scheduled the conference listened at the morning session to an illuminating and eloquent address by the Secretary of War and to brief remarks by Dr. Franklin H. Martin, of the advisory commission of the Council of National Defense; President W. O. Thompson, of Ohio State University; Prof. H. E. Crampton, of Columbia University, vice chairman of the committee on science and research, including engineering and education of the advisory commission of the Council of National Defense; and Dean Virginia C. Gildersleeve, of Barnard College.

#### PROGRAM.

Conference of the National Association of State Universities, the Association of American Agricultural Colleges and Experiment Stations, the Association of American Universities, and the Association of American Colleges, held under the auspices of the committee on science and research, including engineering and education, of the advisory commission of the Council of National Defense.

3.30 p. m.—Second session of the conference; Continental Hall.

Presiding officer, President Hollis Godfrey, Sc. D., Drexel Institute.

Reports of committees.

At the afternoon session the conference adopted the following principles and resolutions unanimously:

## PREAMBLE.

In the supreme crisis that confronts the Nation the colleges and universities of America have the single-minded thought and desire to summon to the country's service every resource at their command, to offer to the Nation their full strength without reservation, and to consecrate their every power to the high task of securing for all mankind those ideas and ideals that gave them birth and out of which have grown their most precious traditions.

In order that such service may be most intelligently developed and applied, the following declaration of principles is respectfully suggested.

## STATEMENT OF PRINCIPLES.

It is our judgment that our colleges and universities should so organize their work that in all directions they may be of the greatest possible usefulness to the country in its present crisis.

We therefore believe, first, that all young men below the age of liability to the selective draft and those not recommended for special service, who can avail themselves of the opportunities offered by our colleges, should be urged so to do in order that they may be able to render the most effective service, both during the full period of the war and in the trying times which will follow its close.

We believe, second, that all colleges and universities should so modify their calendars and curricula as will most fully subserve the present needs of the Nation and utilize most profitably the time of the students and the institutional plant, force, and equipment. With this end in view, we suggest that, as an emergency measure, the colleges consider the advisability of dividing the college year into four quarters of approximately 12 weeks each, and that, where necessary, courses be repeated at least once a year so that the college course may be best adapted to the needs of food production.

We believe, third, that in view of the supreme importance of applied science in the present war, students pursuing technical courses, such as medicine, agriculture, and engineering, are rendering, or are to render, through the continuance of their training, services more valuable and efficient than if they were to enroll in military or naval service at once.

We believe, fourth, that the Government should provide or encourage military training for all young men in college by retired officers of the Army and National Guard or by other persons competent to give military instruction, and that the colleges should include as a part of their course of study, teaching in military science, in accordance with the provisions of the national defense act of June, 1916.

We believe, fifth, that the Bureau of Education of the Department of the Interior and the States Relations Service of the Department of Agriculture, with the cooperation of the committee on science, engineering, and education of the advisory commission of the Council of National Defense, should be the medium of communication between the Federal departments and the higher educational institutions of the country.

Finally, we believe that an educational responsibility rests on the institutions of higher learning to disseminate correct information concerning the issues involved in the war and to interpret its meaning.

#### RESOLUTIONS RECOMMENDED FOR ADOPTION.

I. *Resolved*, That we request the advisory commission to recommend to the Council of National Defense that it approve the plan of developing and issuing at once through the Bureau of Education of the Department of the Interior and the States Relations Service of the Department of Agriculture, with the advice of the education section of the committee on science, engineering, and education of the advisory commission of the Council of National Defense, a statement of a comprehensive policy of cooperation between the Government and the universities, colleges, and other schools which will make for the most effective use of these institutions throughout the duration of the war. The statement should be accompanied by suggestions to be as explicit as possible in regard to—

1. The plans of the Government in all its departments for the prosecution of the war, so far as they concern the colleges and universities.

2. The best methods developed by the educational institutions of the allied countries to meet war conditions.

3. The ways in which the educational institutions of the country can best organize to fulfill the needs of the Government.

II. *Resolved*, That we request the advisory commission to recommend to the Council of National Defense that it approve a plan whereby the Bureau of Education of the Department of the Interior shall, after consultation with Federal departments and educational officers throughout the country, keep the educational institutions informed of the needs for technical, military, and general training which the schools and colleges may wisely undertake to fulfill and that the States Relations Service of the Department of Agriculture take similar action as regards agricultural needs. Both these actions to be taken in consultation with the education section of the committee on science, engineering, and education.

III. *Resolved*, That we request the advisory commission to recommend to the Council of National Defense that it request the Bureau of Education of the Department of the Interior and the States Relations Service of the Department of Agriculture to bring together from time to time, as may seem expedient, groups of educational officers with the committee on education of the advisory commission

for the consideration of the best methods of maintaining, adjusting, and strengthening the educational system of the country in order to meet the emergencies of the war and to plan for the period following the war.

IV. *Resolved*, That nothing in these resolutions shall be construed as advising any change in the legal or administrative relations existing between the Department of Agriculture and the agricultural colleges.

At the close of the meeting the chairman appointed the following persons to serve as a special section on education of the committee on science, engineering and education of the advisory commission of the Council of National Defense:

EDUCATION SECTION OF THE COMMITTEE ON SCIENCE, ENGINEERING AND EDUCATION OF THE ADVISORY COMMISSION OF THE COUNCIL OF NATIONAL DEFENSE.

Hollis Godfrey, Sc. D., member of the advisory commission of the Council of National Defense, president, Drexel Institute, chairman.

Henry E. Crampton, Ph. D., professor, Columbia University, vice chairman.

Frederick C. Ferry, Ph. D., dean, Williams College, secretary.

There were present sitting with the committee:

President Livingston Farrand, LL. D., University of Colorado, Boulder, Colo.

President John C. Futrall, A. M., University of Arkansas, Fayetteville, Ark.

Below is a brief summary of the action taken at this meeting:

#### RESOLUTIONS ADOPTED AT THE MEETING OF MAY 6.

That this committee advise all colleges and universities that all communications upon all questions relating to the present war emergency in which they are interested may be sent here to this committee, and that the committee will answer these communications or will request that they be answered by such other agencies as the officers of the committee, in cooperation with the Bureau of Education of the Department of the Interior and the States Relations Service of the Department of Agriculture, may select.

That the chairman of this committee be requested, in presenting to the advisory commission the resolutions adopted at the conference of May 5, 1917, to emphasize particularly the first item in the statement of principles.

That the Council of National Defense be requested to recommend to the Department of War the recruiting of men competent to give military instruction, but ineligible for active service, and the detailing of such men for the giving of military instruction in the colleges and universities, and that, so far as possible, equipment be provided, in accordance with the provisions of the national-defense act of June, 1916; and, further, that, wherever it is impossible for a college to muster a unit of 100 men for military training, it be approved that, for the purposes of military instruction, two or three colleges may be served by a single instructor.

That the officers of the associations here represented communicate the above resolution at once to all the members of their respective associations.

A meeting of the committee was held on May 6, at 10 o'clock, at 1020 Munsey Building, Washington, D. C.

The meeting of the committee will be held at 1020 Munsey Building, Washington, D. C., fortnightly.

The subject of the next committee meeting will be the consideration of changes in curricula for adaptation to needs of war.

All communications should be addressed to the chairman at 1020 Munsey Building, Washington, D. C.

Aug. 6, 1917.

Dear President Jackson.

I have delayed acknowledging your letter hoping to receive the statement from Mr. Robertson to which you referred. I cannot adequately express my satisfaction that you have decided to have the war activities of the women students organized. I am sure that Miss Wallace will take great interest in the matter. As an officer of the University War Aid she will have special resources at her command.

As soon as war was declared, I made, as you know, a plan to rouse the interest of the women in the issues involved and carried it as far as I felt was proper without faculty or administrative authorization. In fact part of the plan, to my disappointment, failed because it was at variance with the announcements made by the University when the country was at peace. I had thought that many of the departments would reorganize their courses so as to give special training to non-combatants, both men and women, but I failed

to claim of any considerable effort in that direction and the matter was never discussed at any official Faculty meeting which I attended. Miss Beechmidge and I have decided, however, on our own responsibility to re-organize our courses for the autumn with special reference to work which must be done by trained leaders. I trust this will meet with your approval.

I was sorry not to see the University of Chicago mentioned among the institutions which has recently organized the American University Union in Europe. It is a matter of grave concern to our young women that every possible measure shall be taken to minimize the harm which active warfare frequently causes to young men.

I am getting out a new edition of one of my books and "conserving food". My rocks and trees and bit of lake <sup>do</sup> not "produce food" but they give fresh vigor of mind and body.

Trusting that you are giving yourself some refreshment.

I am very sincerely

Marion Talbot.

Dear President Judson:-

Your letter of July 10th has been received. I shall be very glad to cooperate with any committee of which Miss Wallace is chairman. It is gratifying to have any work in connection with the organization of the students undertaken by Miss Wallace, as she is at the present time out of residence and therefore is free to devote as much time as she desires to such organizations. As you probably know, I am involved not only by my duties as Acting-Dean and instructor, but I have undertaken committee work in connection with the local Women's Division of the Council of Defense as well as the National Women's Committee. It is gratifying to be able to continue the work that I have already taken over without feeling that I am sacrificing obligations here. This correspondence gives me the opportunity to say that I was disappointed not to be able somewhat to modify the work I announced for the summer so that I might give courses which would be peculiarly appropriate at this time. As you may know, I gave <sup>Exha</sup> a minor this spring on Problems of Civilian Relief in War Time. I felt, however, unable to give more than two full courses during the summer, and we therefore have no such opportunity offered to the summer students as was provided for the spring students in that special direction. I was able to secure through Mr. Burgess's cooperation an admirable series, in the Philanthropic Service Division, of open lectures dealing with these problems.

Mr. Robertson will have spoken to you of the letter from Mrs. Fairbank with reference to a possible address to the women students

Miss Sophonisba P. Breckenridge,  
University of Chicago,  
Chicago, Ill.

Dear Miss Breckenridge:

Yours of the 12th inst. is forwarded to me from my office. I am sure that you will co-operate with Miss Wallace, and that it will be a distinct advantage to divide the work. In fact, you are undertaking too much.

I have written to Mr. Robertson in regard to Mrs. Fairbanks' proposed address.

With sincere regards, I am

Very truly yours,

May 1911

The Honorable J. B. Stearns, Sec.  
U. S. Dept. of Interior  
Washington, D. C.

Dear Mr. Stearns:

I have the honor to acknowledge the receipt of your letter of the 14th inst. in relation to the application of the National Park Service for the purchase of the land owned by the National Park Service in the State of California. I am sorry to hear that the National Park Service is having difficulty in obtaining the land. I am sure that the National Park Service will be able to obtain the land in the future.

I am, Sir, very respectfully,  
Yours very truly,  
J. B. Stearns

Copy for President Jadson

June 11, 1917.

My dear Dean Talbot:

A comment brought back to me from the meeting of the Alumnae of the University yesterday leads me to question whether there may be any misapprehension in your own mind regarding my request to you under date of May 14th, on whether you have have been misquoted.

You will no doubt recall that at that time I commented upon the seeming vagueness in the minds of many of our students regarding the work being provided by the University for women, especially as it related to the possibilities for work in the summer quarter. I suggested that you take charge of "an informal committee" to make suggestions with reference to the matter in hand. You were quoted as having spoken of this committee as an official committee appointed by me. The matter is of somewhat trifling consequence of itself, but it is, of course, highly desirable that there be no unnecessary misapprehension at just this juncture.

With kind regards,

Yours very truly,

JRA/C

Dean.

Chicago, August 16, 1917

Dear Miss Talbot:

Yours of the 6th inst. is received.

I am sending enclosed a copy of the little document on the University of Chicago war service. The courses to be offered to which you refer of course can be reorganized with particular reference to the war needs. I am sure that Miss Wallace as Chairman of her committee will be successful, as I know that she is actively interested in the war itself and in patriotic service in every form.

I was invited to the conference at which the American University Union was organized but was not able to go. The Board of Trustees at its August meeting however voted to accept membership, and I have written accordingly to the authorities at Yale and Harvard. I am glad to know that you are getting some vacation. I had started on a proposed rest of a few weeks at Lake George, but after only

a few days was called back here to serve on one of the District Appeal Boards in connection with the selective draft. This is likely to occupy me, I fear, for some weeks yet.

With best wishes, I am,

Very truly yours,

H.P.J. - L.

*PROPOSALS presented on April 16,  
1917, by Dean Marion Talbot to the  
Women Students of the University of Chicago  
by means of which they may share in the defense  
and preservation of the Nation.*

*These proposals are based on the following  
principles:*

1. The United States is at war and the losses and burdens inevitably entailed will fall most heavily upon women, upon whom also will rest in consequence a large responsibility for the conservation of the physical and human resources of the nation.
  2. As the service "at the front" is now recognized to involve routine drudgery and irksome duties with little of the glory or excitement formerly associated with military life, so it must be remembered that the duties of the women may be in large measure humble and laborious, but must be performed in a spirit of loyal and patient service and in that spirit only will they bring their reward.
  3. These tasks will not necessitate the neglect of more important duties and obligations.
  4. The type of tasks has in view the fitness of women whose training has been primarily that of students preparing in general for teaching or domestic life.
-

- 
5. The tasks offered are of different grades of severity and of capacity for expansion.
  6. The tasks are varied in character to correspond with the different aptitudes of students.
  7. The tasks are in general such as may be performed without interference with duties already assumed.
  8. The tasks are such that the students may continue them on leaving the University and on taking up work in other communities.
  9. The services which may be rendered are of value in times of peace as well as in times of war.

---

Registration for the courses for credit may be made with the Student's Dean and will be closed on Thursday, April 19.

The pledge, when signed, is to be returned to Dean Talbot, Box Q, Faculty Exchange, Cobb Hall, or sent by mail to Green Hall.

Details concerning these and other proposals will be posted on a special bulletin board in the entrance hall of Ida Noyes Hall. Special conferences and lectures will be arranged.

Additional copies of this statement may be procured at the Information Office, Cobb Hall.

## Pledge

*Realizing that my country needs the loyal service of all its women, both now and in times of peace, I pledge myself to the tasks I have indicated on this sheet and I will undertake to perform these duties as conscientiously as if I were formally enlisted for military service.*

1. I agree to make an effort to increase my physical strength and vigor.
  2. I agree to help some young person to increase his physical strength and vigor.
  3. I agree to wear a costume adapted to my occupation, avoiding waste and display.
  4. I agree to promote economy in food supplies by (a) the observance of rational economy in my personal use of food; (b) organizing groups of women for the study of food economy.
  5. I agree to foster the proper use of foods by learning how to prepare them.
  6. I agree to aid in increasing the food supply by (a) personally cultivating a plot of land; (b) helping to organize groups of children to plant gardens in unoccupied lots.
  7. I agree to take an active part in some organized movement for the prevention of infant mortality.
  8. I agree to take an active part in a child-welfare agency.
  9. I agree to inform myself as to approved methods of school nursing and to do all in my power to introduce this means of conserving the health of children into the schools of my community.
  10. I agree to help provide for the children and dependent members of the family of a man or woman "at the front" in war or industry.
-

- 
11. I agree, realizing that vice and alcoholism in increasing measure accompany war, and believing that future generations should be given by birth the best in health and mind that ethical living among men can bestow, to urge that marriage should take place only among those who can show that they are free from any disease which may be transmitted to future generations.
  12. I agree to establish friendly relations with persons whose families came to this country more recently than mine, and in this and every possible way to help promote a feeling of international sympathy.
  13. I agree to study the various proposals which have been brought forward for the establishment of a Society of Nations and organized common peace and to do all in my power to build a new social order based, not on mutual distrust and selfish competition, but on confidence and good-will, upon the spirit of service and co-operation.
  14. I agree, provided my scholarship and health are adequate, to register for one of the following courses, each to count as a half-major, and taken without fee:

**I. Household Administration 30: Social Service in War Time.—**

ASSISTANT PROFESSOR BRECKINRIDGE, MISS BIRD, AND ASSISTANTS.  $\frac{1}{2}$  Mj. Monday, 4:00–5:50. Field work to be arranged.

**II. Home Economics 50: Food: Conservation and Production.—**

ASSISTANT PROFESSOR VAN HOESSEN AND ASSISTANTS.  $\frac{1}{2}$  Mj. Monday and Wednesday, 4:35. Laboratory to be arranged.

**III. Physiology 5: First Aid.—**PROFESSOR CARLSON, DR.

YOUNG, AND ASSISTANTS.  $\frac{1}{2}$  Mj. Monday and Wednesday, 4:30 to 6:00.

To be signed and sent to Dean Talbot if possible before April 21, 1917.

# WORK *and* FIGHT TOGETHER WE WIN

---

To all patriotic women of the University of Chicago:

In accordance with the "Work or Fight" provision of our government, many women are eager to take up their share of the work of the world.

To prepare themselves for some essential service, a group of University of Chicago women are organizing the **Woman Students' Training Corps** in order to secure for its members definite training for some particular work needed by the nation; and through organization, discipline, and devotion to aid the University of Chicago in every way possible to do its part to win the war.

The pledge of the organization is as follows:

*As a member of the Woman Students' Training Corps I promise:*

- 1. That while in college I will prepare myself definitely for some essential occupation whereby I may serve my country efficiently in my own home or elsewhere.*
- 2. That after leaving college, and during the major portion of long vacations, I will practice an essential occupation systematically for the duration of the war.*
- 3. Furthermore, I pledge myself to support the President of the United States, to honor the flag, and to uphold by my acts and influence, in all business and social relations, the best ideals of American womanhood.*

*As a loyal member of the University of Chicago I hereby pledge my faith.*

Between September 27 and October 10 designated members of the initial group will be prepared to explain to all women interested the organization of the **Woman Students' Training Corps**, and to enroll applicants at the recruiting office in Ida Noyes Hall.

A uniform is optional.

A serious adherence to the pledge is required.

Come prepared to do your part.

**Work and Fight: Together We Win**

STUDENTS' WAR ACTIVITIES COMMITTEE

ELIZABETH WALLACE, *Chairman*

The war activities of women students are to be directed through two committees — a faculty committee and a central student committee. The former consists of:

Mrs. George Goodspeed

Miss Gertrude Van Hatten

Mr. E. W. Burgess

Miss Anne Elizabeth Taylor

Mrs. Edith Foster Hunt

The latter will consist of one representative from each of the following organized groups: Women's Administrative Council, Young Women's Christian League, Women's Athletic Association, Graduate Women's Club, Home Economics Association, Kindergarten Association, Neighborhood Clubs, International Club, Medical Women's Club, ~~the~~ Inter-Club Council, and Women's Halls.

The new committee of women students are  
 to be elected through the committee  
 committee and a central student  
 committee. The former consists of:  
 Mrs. Mary W. Taylor  
 Mrs. E. W. Taylor  
 Mrs. E. W. Taylor  
 Mrs. E. W. Taylor  
 Mrs. E. W. Taylor

The latter will consist of one representative  
 from each of the following organized groups:  
 Women's Administrative Council, Young Women's  
 Christian League, Women's Athletic Association,  
 Graduate Women's Club, Home Economics Club,  
 - Association, the department of education, rights,  
 - Law Club, International Club, Medical  
 Women's Club, the Anti-Slavery Club, and  
 Women's Hall.

p. 22  
The plan is that, once the field of operations is marked off and divided, the Faculty committee shall become chiefly advisory and the work be in the hands of the Central Student committee and such subordinate committees as it shall create.

The field of operations has been so far only roughly surveyed. But it will ~~comprise~~ consist of at least three parts, having to do respectively with public exercises, practical activities within ~~and~~ the University, and connection with activities outside. Under the first head will come <sup>among other things</sup> lectures, chapel exercises, patriotic songs — perhaps added "war courses" in the curriculum. — these among other practical campus activities  
to be determined upon later. The third  
group of operations has yet to be outlined  
even tentatively. The hope is that, even  
with the main part of a student's day  
preempted by classes and preparation  
therefor, regular periods may be arranged  
~~for~~ wherein she may aid in the social  
work at settlements, infant-welfare stations,  
and the like, now in special need of help  
because of the war.

The chairman has been in communication  
with other colleges undertaking <sup>to plan for</sup> similar  
work for women students and hopes that  
in spirit, if not in actual scheme, coöperation  
may develop.

and forwarding, for the purpose of  
these among other possible causes  
to be determined upon later. The third  
group of operations is yet to be outlined  
over the third. The hope is that, even  
with the main part of a thousand day  
preparation, the Commission will be able to

these for, regular periods, as suggested  
and in the second  
work at Little Rock, without sufficient attention,  
and the Commission will be able to help  
the work.

The Commission has been in communication  
with other groups, understanding, business

and unity.

For the purpose of the Commission, it is hoped that the work will be done in a spirit of cooperation and unity.

## MEMORANDUM FOR MR. ANGELL:

### 1) Women.

The Student War Activities Committee was organized in May, 1917 by the President of the University who appointed Miss Wallace as Chairman with instructions to develop the work as circumstances might seem to demand. Miss Wallace remained at the University during the summer in order to devote her full time to the work of this Committee. Not very much of a concrete nature was accomplished, but efforts were definitely made to arouse and crystallize patriotic feeling by the organization of chorus singing; by the celebration of the 14th of July etc. A small sum was appropriated by the University for this purpose.

During the Academic year 1917-18 Mrs. Flint was appointed to the chairmanship of the Committee during the absence of Miss Wallace in France. Under her a Students' Executive Committee was chosen, which, under the advisement of the Faculty Committee, organized the war work of women students in three fields: Red Cross work, Social Service, and Publicity. Through the Secretary to the President a sum was placed at the disposal of the Committee for printing, stenography, and other essentials.

Upon Miss Wallace's return to the University in June, 1918, she resumed the chairmanship of the Committee now to be known as the Students' War Activities Committee.

During the summer the attention of the Committee was particularly directed to a study of vocational opportunities for women created by the War. With a view of correlating the facilities offered by the University for preparing women to take advantage of such opportunities a pamphlet was prepared to be sent to all women students (See exhibit A)

The preparation of this pamphlet brought up the problem of how University women could best be directed in their work of preparation, and it was while discussing this problem with bodies of University undergraduate women that the plan of the Woman Student Training Corps was evolved. (See exhibit B & C.)

The expenses involved in the preparation of this pamphlet were met by an appropriation from the University.

It will be seen that the Woman Student Training Corps is not an organization but simply a method. The organization for which we ask an appropriation is the Students' War Activities Committee. This Committee proposes to carry on its work of investigation along vocational lines to keep up the morale of the student body and to foster to its utmost maintenance and improvement of the physical fitness of the student body.

*Elizabeth Wallace*

Consult Mr. E. O. Jordan, Ricketts Laboratory. Hours of registration: See page 8.

#### C. GEOLOGISTS

1. **Teaching:**  
Moderate constant demand in normal schools and colleges.

Initial salaries \$1,000.

2. **Geological Surveying:**  
High-class clerical and executive ability required. Also ability to edit manuscript.

Initial salaries \$850.

3. **Office Work in Geology:**  
Commercial companies need experts in office work such as correlation of the "logs" of oil wells.

4. **Drafting:**

Courses recommended: Geology 1, 2, 3, 5, 8 or 9, 14, 15, 16, 17.

Courses recommended: Geology 1, 2, 3, 5, 8 or 9, 13, 14, 15, 16; Geography 17.

Courses recommended: Same as above.

Courses recommended: Geology 1, 3, 5, 14, and Mechanical Drawing.

5. **Laboratorians:**  
In paleontological laboratories for de-  
termination of fossils.

Courses recommended: Same as for teach-  
ing and in addition Geology 26, 27,  
28, 29 or 34, 35, 36.

Consult Mr. R. J. Salisbury, Julius Rosenwald Hall. Hours of registration: See  
page 8.

#### D. GEOGRAPHERS

1. **Teaching:**  
Constant growing demand in high  
schools and colleges.
