Professor Max Mason,
University of Chicago,
Chicago, Illinois.

Dear Sir:

I thank you for the carbon copy of the letter announcing the gift of the General Education Board. It is a very great addition to the University and will forward the movement for better obstetrics and gynecology in Chicago. I have been searching for men to staff the department of obstetrics and gynecology and one of the first questions that I am asked is how many gynecologic beds will be at our disposal.

At the present time I am unable to answer with any definiteness whatever. Dr. Billings advises me not to have any concern about the matter but, even though I have great faith in the future, and probably you have yourself, it is not so easy to get strangers to look upon the matter as we do.

Mrs. Fairbank has, on several occasions, expressed herself in favor of raising enough money for 40 beds for gynecological patients in addition to the 140 beds for obstetrical patients, but beyond this vague expression of desire I have nothing that I can offer prospective candidates for recommendation to the University.

With best regards, I am

Yours truly,

J. B. De Lee

Dear Mr. Woodward:

Thank you very much for your note of February 25th with regard to Dr. Foster Kellogg. I do not know Dr. Kellogg but I shall be glad to keep this suggestion on file for use when we begin moving with respect to Obstetrics and Gynecology.

Sincerely yours,

Franklin C. McLean

My dear Dr. McLean:

Do you happen to know Dr. Foster Kellogg, an obstetrician and gynecologist of Boston who formerly taught in the Harvard Medical School? He has been mentioned to me as a man whom we ought to have in mind when we are organizing our staff in obstetrics and gynecology.

I ought to add that the person who spoke of him is entirely disinterested except that he is a friend of the University.

Yours sincerely,

Frederic C. Woodward

February 24, 1927

Mr. F. C. Woodward,
The University of Chicago,
Chicago, Illinois.

Dear Mr. Woodward:

Several years ago, I met Dr. Foster Kellogg, about 45 years old, an obstetrician and gynecologist of Boston. I was attracted to his personality and have been interested in asking mutual friends from time to time as to his progress. I am told that he taught at Harvard Medical School 12 or 15 years ago, which was rather early in his career, but that he has since been forced to give up his teaching and research for his regular practice. I am informed, however, that his chief interest is in teaching and research.

It occurs to me that you may want to suggest this name to our medical people for consideration when they are thinking of their staff in obstetrics and/or gynecology.

Yours cordially,

Harold H. Swift,

He married Rosalie Hanson
sister of Joseph Hanson

Mr. E. C. Woodward,
The University of Chicago,
Chicago, Illinois.

Dear Mr. Woodward:

Several years ago, I met Dr. Walter Hodge, about
65 years old, an obstetrician and gynecologist of Boston. I
was attracted to his personality and have been interested in
reading material relating to him from time to time as to his progress.
I am told that he taught at Harvard Medical School 15 or 16
years ago, which was rather early in his career, but that he
has since been forced to give up his teaching and research
for his regular practice. I am informed, however, that his
chief interest is in teaching and research.

It occurs to me that you may want to suggest this
case to our medical people for consideration when they are
thinking of their staff in obstetrics and/or gynecology.

Yours cordially,

Robert H. Smith
