Zoology  
C-28

Mr. D. H. Stevens  
Faculty Exchange

Dear Mr. Stevens:

I have run over the list of apparatus suggested in Mr. Allee's letter of February 20. Mr. Allee assures me that all of the apparatus is needed for immediate use in research problems now in progress. I recommend that the expenditures be authorized. If the funds are not available for the entire amount at the present time, I suggest that part of it be allowed now and the rest in July. I think it would be a legitimate charge against the Rosenwald Fund if the amount available from that fund has not been exhausted for the present year.

Very truly yours,

Henry G. Gale

HGG:M

Henry G. Gale  
Dean.

CHICAGO, ILLINOIS

February 20, 1929

Mr. D. H. Stevens,  
Assistant to the President  
Faculty Exchange.

Dear Mr. Stevens:

Enclosed please find a list of apparatus needed by the Department of Zoology in order to carry on the present research program of the staff and graduate students. There are no funds available for the purchase of this material in the present budget, accordingly we request a special appropriation from the Rosenwald Fund or some similar source to cover the purchase of these items.

The list price of the apparatus needed is \$2430.50. Your attention is called to the situation in the department due to the recent marked increase in graduate student enrollment (77% since last year), which has taken funds for running expenses and minor equipment that formerly could have been available to cover a part of the present list.

Very sincerely yours,

*W. C. Allee*

Board meeting  
G-28  
8-16\*28

Memorandum regarding humidity and temperature control in  
Whitman Laboratory.

---

Donor's funds furnished the means of constructing two re-  
frigerator rooms in Whitman Laboratory designed for humidity  
and temperature control and for equipping one of the rooms  
with apparatus designed to control both factors. From the  
appropriation of February 9, from the Rosenwald Fund, it has  
been possible to use \$1575.10 to renovate the six ton ammonia  
compressor used as a cooling unit for all the refrigeration  
work in Whitman in order that it will be able to carry the  
load imposed by placing in operation the second room devoted  
to humidity and temperature control. This added expense had  
not been anticipated since the compressor had been partially  
overhauled by the local department of Building and Grounds  
at the time of its installation in Whitman Laboratory, but  
was undertaken on advice of Superintendent Lester Ries.

+ | Estimates from the Benz Engineering Corporation, checked by  
Mr. Morris of the Buildings and Grounds Department, indicate  
that \$1400 more will be needed to supply apparatus to control  
temperature and humidity within this second room. The second  
unit is needed in order to carry on adequately controlled  
experiments where either temperature or humidity is held con-  
stant in both rooms and the other factor is varied. Among  
other projects, work is contemplated concerning the effect  
of these factors upon coat color in mammals. Doctor Wright's  
excellent stock of guinea pigs of known heredity offers promis-  
ing material for such work.

This request is submitted with the approval of Professor  
F. R. Lillie.

(W. E. Allee

Prudential Office.

I recommend that \$1400 be  
appropriated from Rosenwald Fund for  
purposes stated above.

January 17, 1928

Mr. F. C. Woodward  
Faculty Exchange

Dear Mr. Woodward:

Professor Lillie left word that the Department of Zoology is very much in need of the following equipment for the research work in Whitman Laboratory.

1. For the research work of Dr. Willier:

1 Lillie Paraffine oven	\$209.00
1 Spencer microtome	175.00

2. For a joint research by Doctors Allee and Wright:

\$1200.00

The \$1200 item is to equip one of the rooms in Whitman with constant temperature and constant humidity devices for a study of the relative values of heredity and environment on coat color in mammals.

On account of our peculiar relations with Dr. Lillie, I hope an appropriation of \$1584.00 for this equipment will be made from the Rosenwald Fund or from some other sources.

Very truly yours,

*Henry G. Gale*

Henry G. Gale

May 15, 1928

Mr. Frederick C. Woodward,  
Office of the President  
University of Chicago.

Faculty Exchange.

My dear Mr. Woodward:

I have checked with Mr. Dinsmore concerning the relative cost of purchasing and renting a motor truck for field work in zoology. Mr. Dinsmore informs me that he has recently investigated this carefully and has come to the conclusion that renting is an extravagance. Owners usually will not rent a truck without sending a driver along and the fee for the driver is high. If an owner is found willing to rent without furnishing his own driver, he makes a high charge for self-protection. Mr. Dinsmore advises buying one of the new Model-A Ford trucks. This can be secured with suitable equipment for our purposes for a total cost of \$1300.00, a saving of \$500.00 as compared with the Reo Speed Wagon.

My own experience is in complete agreement with that of Mr. Dinsmore concerning the relative cost of purchase and renting; and I am entirely willing to follow his suggestion concerning the substitution of one of the new type Fords for the Reo Speed Wagon, originally requested. The Ford representative can promise delivery for June 15, in time for the summer work, if the order is placed immediately. Can funds be made available for this order?

Very sincerely yours,

W.C. Allee

My dear Doctor Gale:

I am presenting herewith a memorandum from Doctor Allee concerning the need of a motor truck for field work in Zoölogy. We are hoping that it may be possible to secure funds for this purchase from the Rosenwald Fund. I heartily endorse all that Doctor Allee states on the subject and I would add that when Doctor Salt begins his work in the department, the need for the truck will be considerably increased.

The field trips are a very important part of the training of our students, rather more than in the case of most institutions for the reason that access to collecting grounds in this urban area is so difficult. The field work must be developed and I hope that we may have your support in this request to the Rosenwald Fund.

Yours truly,

Memorandum concerning need of motor truck for field work in  
Zoology --by W. C. Allee.

May 4, 1928

The field work in Zoology is handicapped by lack of adequate motor equipment. At the present time classes in Field Zoology, Animal Ecology, Animal Behavior and Entomology make expeditions into the country around Chicago. These classes use heavy collecting equipment; too much to be carried by hand on street car or train.

With the rapid development of the Chicago area, the collecting work in Zoology is limited more and more to relatively inaccessible places such as are found in many of the Forest Preserves, which cannot be reached readily without automobiles. At present such trips are made in private cars belonging to staff members or to students. When sufficient cars are not donated for these trips, others must be rented at a high rental.

It is difficult to conduct field trips when the class members are scattered through several cars. Aside from the possibilities of motor trouble, it is frequently impossible to stop at strategic points for brief observations.

Four departments conduct extensive field trips. Of these, Geology and Anthropology are each equipped with motor trucks more or less closely adapted to their needs. Botany has a special problem since plants are more easily collected than animals. The field work in Zoology was formerly aided by the occasional use of the Reo truck now taken over for the exclusive use of the Department of Geology.

For the field work now being carried on, the Department of Zoology needs a Reo speed wagon which can be secured properly equipped for \$1800, according to the estimate of Mr. G.B. Lavery of the Reo agency at 6127 Cottage Grove Ave. Field work consumes much time and energy at the best. The field work in Zoology can be conducted much more efficiently if this motor equipment is made available.

Dean Henry G. Gale  
Ogden Graduate School of Science

Dear Mr. Gale:

In accordance with our informal conversation Wednesday night, I am writing you with reference to the need of some additional funds for carrying on a piece of research now in progress. I am in communication with several pairs of identical twins separated in infancy and reared apart. Such cases are so rare that only one such has been studied. This one case has attracted wide attention in biological and psychological circles. The one case that I have completed gives results so different from the published case that I am very eager to see what other cases will show. In order to do this work I have to employ a highly trained field worker, Mrs. Blythe Mitchell. Her years of experience in intelligence testing and statistical methods make her invaluable to me. The need of funds is specifically for salary of Mrs. Mitchell as technical assistant.

I think about \$300.00 would carry me through the next quarter, and our departmental budget will hardly bear this at the present time. Could this amount be furnished from a special research fund?

Sincerely yours,

H. H. Newman

My dear Mr. Cocke:

Your letter of December 3 was badly delayed because addressed to President Burton. I am glad to say that the facts have been referred to the proper department, but we regret that there is no chance to do any work for the summer of 1928.

Very truly yours,

D. H. Stevens.

Assistant to the President.

Mr. E. C. Cocke,  
Charlottesville, Virginia.

Dear Mr. Newman:

I have talked with Dr. C. Judson Herrick on the matter taken up in your letter to me of December 1. Dr. Herrick is out of residence in the winter quarter and it would be impossible, or at best very disturbing, for him to give the lectures at that time. He would, I think, however, have an increased interest in the whole matter.

Quite on my own initiative and without involving you in any way I made the suggestion of the possibility of having him write a concluding chapter for a subsequent edition of the book. He seemed very much interested in it, and if you think wisely of the suggestion will you not have a copy of the book sent to him and take the matter up directly? I feel, personally, that it would be very good to have him write a chapter and believe he could submit a chapter without any embarrassment to the committee in charge. He himself used the phrase that he "might be glad to make a try at it and allow those in charge of the book to determine whether the result was desirable."

Sincerely yours,

Max Mason

President Max Mason,  
University of Chicago.

Dear Mr. Mason:

Some weeks ago you suggested to me that it would be an excellent move to interest Dr. C. Judson Herrick in the Science Survey course. We have secured no one to give the lectures on the evolution of the vertebrate nervous system.

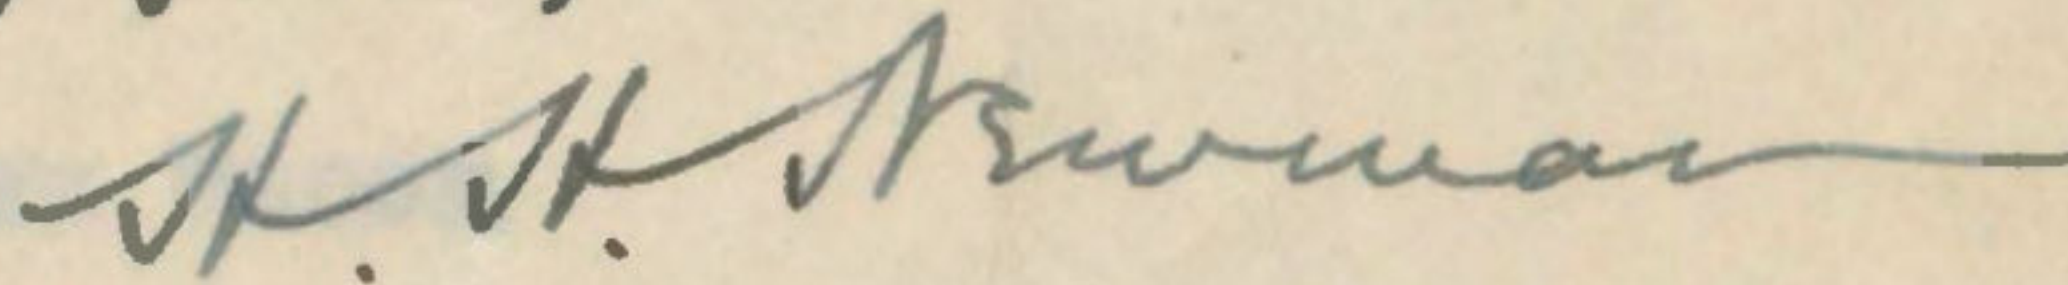

Two, or possibly three, lectures could be spared for this important subject, and there is no one so well equipped to give them as Dr. Herrick.

At the time when we spoke about this matter it was my understanding that you would approach Dr. Herrick and would let me know the result.

It will soon be necessary for me to get out the schedule of dates for the winter quarter and I would like to know about Dr. Herrick's decision as soon as convenient.

Dr. Judd is to be out of residence during the winter quarter and I must find a substitute for him. This will not be an easy task.

Sincerely yours,

H. H. Newman

Therapeutics  
Lillie

CHICAGO, ILLINOIS

August 25, 1927

My dear Dr. Mason:

In Dr. Lillie's absence your letter of August 22 regarding the Victor Company's possible willingness to support research of fundamental character in physical therapy has come to me. I shall forward the correspondence to Dr. Lillie at Woods Hole immediately.

Dr. Child, who is at the Scripps Institution for Biological Research in California for the summer, has been interested in ultra-violet radiation for some time. Last winter the Victor people loaned me a mercury vapor arc lamp which we are using with profit in ecological studies.

Dr. Lillie will not return until near the end of September. I am going to Woods Hole at the end of next week and if there is anything that needs to be talked over more fully, I should be glad to be of service.

Very sincerely yours,

W. C. Allee

Dear Dr. Lillie:

I understand that it is possible that the Victor Company may be willing to support research of fundamental character having reference to physical therapy; that is, I believe would be interested in the sort of work you have already started, and would not restrict their interest to direct application therapeutics. If you have any work bearing on this question which would be aided by financial support from the company it is possible that they would grant this. I should be glad to discuss the matter with you at your convenience.

Yours sincerely,  
Max Mason

To Messrs. W. C. Allee, and  
Paul MacClintock:

The outline of our survey courses for the coming year shows a need of assistance in your field. Consequently I am writing to see if you will take service on the Survey Course Staff.

If you will talk the matter over with Professor Newman, he will let me know the outcome of the discussion.

I hope that this participation will not alter seriously your own plans for the next year.

Sincerely yours,

Hax Mason

President Max Mason,  
University of Chicago,  
Chicago, Ill.

Dear Dr. Mason:

I have been authorized by the Survey course committee to nominate two additional conference leaders for the "Mature of the World and of Man." After careful consideration of those possibly available, I have decided to nominate Dr. W. C. Allee and Dr. Paul McClintock. It was the sentiment of the survey course committee that invitations to join the survey staff would be more likely to bring results if reinforced by executive request. Will you therefore communicate with these gentlemen indicating to them the value and importance of the services that would be rendered by them in cooperating with this enterprise.

Thanking you very much for any assistance you may be able to give in this matter, I am

Cordially yours,

*H. H. Newman*

Dear Dr. Mason:

I have been authorized by the Survey course committee to nominate two additional conference leaders for the "Nature of the world and of Man." After careful consideration of those possibly available, I have decided to nominate Dr. W. C. Cline and Dr. Paul McClintock. It was the sentiment of the survey course committee that invitations to join the survey staff would be more likely to bring to the conference a group of men with whom it would be the value and importance of the surveys that would be rendered by them in cooperating with this enterprise.

Thanking you very much for any assistance you may be able to give in this matter, I am

Cordially yours,

*W. H. Murray*

My dear Dr. Mason:

Dr. Clifford W. Wells, in charge of the Medical Fellowships of the Rockefeller Foundation, has sent to me one of their fellows, Dr. Gregor T. Popa of the University of Bucharest, for research in embryology during the coming year.

I wish to suggest that the University extend to Dr. Popa the courtesies of the Department of Zoology usually extended to the National Research Council Fellowships for the reason that the Medical Fellowships of the Rockefeller Foundation are on the same basis.

While I am sure that Dr. Wells, as well as myself, would appreciate the extending of this courtesy to Dr. Popa, I have added below information concerning his record, sent to me by Dr. Wells.

Thanking you, I am,

Sincerely yours,

*Frank R. Lillie*
