NOTE.—The above Courses of Study are followed with as few deviations from them as possible; but circumstances may arise which may require slight temporary changes.

IV.—COURSE IN PRACTICAL CHEMISTRY.

In this course provision is made for the thorough and comprehensive study of Chemistry as an art, in the belief that, aside from the practical relations of the science, the educational effect of Laboratory practice is of great value. By such practice the senses are trained to observe with accuracy, and the judgment to rely with confidence, on the proof of actual experiment.

In the Laboratory of this Department, under the direction of Professor Wheeler, aided by competent assistants, the student of applied chemistry will have ample opportunity of becoming practically familiar with the materials, apparatus, and processes of the most important chemical arts and manufactures.

A systematic course in Qualitative and Quantitative Analysis will be followed by practical studies with regard to the application of Chemistry to agriculture, mining, metallurgy, assaying, medicine, pharmacy, toxicology, preservation of timber, meats, etc., warming, illumination, ventilation, photography and other useful purposes. On those who shall complete a full course, requiring from two to three years' time, and who shall have passed a satisfactory examination, the degree of Bachelor of Science will be conferred. Certificates will be granted to students who do not graduate, stating the time they have been present, the studies pursued, and the progress made.

The Laboratory is well equipped with modern apparatus. The student will have ample opportunity of visiting the numerous manufacturing establishments of Chicago and vicinity, and witnessing important industrial applications of the science, the study of which he is pursuing.

The Laboratory Fee for special students in Chemistry is \$35 per term; for the regular course, \$1.00.

TEXT BOOKS FOR READING AND REFERENCE.

Craft's Qualitative Analysis.
 Eliot and Storer's Manual.
 Bowman's Practical Chemistry.
 Fresenius' Qualitative and Quantitative Analysis.
 Miller's Chemistry, Vols. II. and III.
 Richardson and Watt's Chemical Technology.
 Wheeler's Determinative Mineralogy.

V.—PREPARATORY COURSES.

The Trustees of the University have deemed it advisable to include among its fundamental and permanent arrangements a Preparatory Department. It will be their aim to make this department a first-class school of preparation for College.

The Professors of the University have charge of the instruction in the studies belonging to their several departments.

The requirements for admission are Reading, Writing, Spelling, Intellectual Arithmetic, Practical Arithmetic, English Grammar, and Geography.

The requisite studies have been arranged in a course of three years for classical and two years for philosophical students, as appears by the following schedules:

Physical Geography.—Geikie's.
Latin.—Select Orations of Cicero. Latin Composition.
Freeman's Outlines of History.

STUDENTS NOT IN COURSE.

Students not wishing to prepare for College, will be admitted into the Preparatory Department, to pursue such studies of the course as they may choose, under the regulations of the Faculty; and special classes will be formed for them when the Faculty shall find it expedient.

GENERAL INFORMATION.

YOUNG WOMEN

Are admitted to the classes, Collegiate and Preparatory, on the same terms and conditions as young men.

A committee of ladies interested in the extension of the privileges of our Colleges to young women is appointed by the Trustees, whose duty it is to hold monthly meetings at the parlors of the University, for the consideration of questions connected with this subject, and by their advice and co-operation to aid in securing the highest efficiency of this department; also to provide for such special courses of lectures or other instruction as may from year to year be deemed advisable. The rooms assigned to the young women have been pleasantly furnished by this committee.

The College buildings at present contain no dormitories for young women, but suitable accommodations can be obtained when desired in private families, in the neighborhood.

COMMITTEE:

MRS. MARGARET LAWRENCE.	MRS. H. O. STONE.
MRS. FERNANDO JONES.	MRS. O. B. WILSON.
MRS. H. W. FULLER.	MRS. C. B. WAITE.
MRS. M. A. SHOREY.	MRS. A. N. CHETLAIN.
MRS. R. E. GOODELL.	MRS. G. F. HARDING.
MRS. C. S. MIXER.	MRS. SAMUEL WILLARD.
MRS. H. A. RUST.	MRS. E. C. MITCHELL.
	MRS. N. T. GASSETTE.

TERMS AND VACATIONS.

The year is divided into three terms and three vacations. The first term consists of fifteen weeks; the second and third of twelve weeks each. The Christmas vacation is two weeks, the Spring vacation one week, and the Summer vacation ten weeks. Calendar on page 2.

ELECTIVE STUDIES.

Students may reside at the University and pursue studies, for a longer or shorter time, in any of the classes, at their own election; subject, however, to the regulations of the Faculty.

EXAMINATIONS.

Examinations of all the classes are held at the close of each term, and the public are cordially invited to attend them and to judge for themselves of the character of the work done. At any time, also, in the course of the term, all persons who are interested in the studies here taught are invited to visit any of the classes.

DEGREES.

The degree of Bachelor of Arts is conferred upon all students who have completed the prescribed Classical Course of study, and passed a satisfactory examination therein; the degree of Bachelor of Philosophy on such as have completed the Philosophical Course; and the degree of Bachelor of Science upon all who have completed the Scientific or Chemical Course.

Bachelors of Arts of three years' standing may receive the degree of Master of Arts, provided that since graduation they have sustained a good moral character and pursued some literary or scientific calling. Candidates for this degree will be expected to make application for it through the President, and to furnish evidence of their qualifications.

SOCIETIES.

There are three societies in the University, conducted by the students—two literary and one religious.

RELIGIOUS EXERCISES.

The duties of each day are opened with religious services in the Chapel of the University, at which all the students are required to be present.

On the Sabbath they are required to attend public worship in the forenoon, with some congregation in the city, selected by themselves, or by their parents. The students also sustain a weekly prayer meeting.

LIBRARIES.

THE UNIVERSITY LIBRARY has been increased recently by valuable acquisitions. The London publishing house of Sampson, Low & Co., Trübner & Co., and Longman & Co., have generously furnished copies of their recent publications. Messrs. Sheldon & Co., of New York, have donated a complete set of their publications.

THE THOMPSON LIBRARY, the gift of Hon. H. M. Thompson, contains a very valuable collection of books on horticulture, a complete set of the Bohn Libraries and many finely illustrated works.

THE TUCKER LIBRARY, presented by the family of the late Rev. Elisha Tucker, D. D., contains upward of five hundred volumes, mostly theological.

THE PUBLIC LIBRARY OF THE CITY OF CHICAGO, which, under the judicious and efficient management of the librarian, Mr. Poole, is rapidly becoming one of the best city libraries of the country, is accessible to students of the University free of charge, and is much used by them.

DEARBORN OBSERVATORY.

The Dearborn Observatory forms the Astronomical Department of the University. Its objects are to make original researches in Astronomical Science, to assist in the application of Astronomy to Geography, in communicating exact time, and other useful objects, and to furnish instruction in Astronomy to the students of the University, both those in the regular course and those who wish to give especial attention to the study.

The principal instruments of the Observatory are:

1. The great Equatorial refracting telescope, made by Alvan Clark & Sons, of Cambridge, Mass., in 1861, and mounted in the Dearborn Tower, which was built by the munificence of the Hon. J. Young Scammon, LL.D. This instrument was the largest refractor in the world till a few years ago; and now has only one superior in the United States. It has recently been refitted and much improved, and the upper portion of the Tower has been reconstructed, by the Chicago Astronomical Society. The telescope is fitted with driving clock, micrometer, spectroscope, and other appliances necessary for first-class work. The dimensions of the Equatorial are:—

Diameter of Declination Circle, 30 inches; reading by vernier to 5 minutes, and by two microscopes to 10 seconds, of arc.

Diameter of Hour Circle, 22 inches; reading by vernier to single minutes, and by microscopes to single seconds, of time.

Focal length of Object Glass, 23 feet.

Aperture " " 18¾ inches.

2. A MERIDIAN CIRCLE, of the first class, constructed in 1867, by Messrs. A. Repsold & Sons, of Hamburg. This instrument has a telescope of six French inches aperture, and a divided circle of forty inches diameter, reading by four microscopes. In plan of construction it is like Bessel's celebrated Königsburg circle, by the same makers; but has some recent improvements in the mode of illuminating the field of view and the wires and apparatus for registering declinations. Within the past two years a chronograph has been added for making an electrical record of the times of star transits.

The Observatory has a chronometer (Wm. Bond & Son, No. 279), two mercurial pendulum clocks, and an astronomical library containing nearly one thousand three hundred volumes and pamphlets.

Instruction in Astronomy to the Undergraduates is at present given by the Superintendent. (See Classical Course).

The Observatory is now supplying time signals each day in the year, by telegraph, to several different points in the City of Chicago, and its time is the standard for many other points in the West.

Several of the graduates have already taken high rank as astronomical observers and surveyors. One is director of the Cincinnati Observatory; another, professor of astronomy at the U. S. Observatory at Washington, and others have done good work in surveying boundary lines in the Territories.

MUSEUM.

The Museum Collection is contained in a large and well lighted front room on the second floor of the University building.

THE DEPARTMENT OF HUMAN ANATOMY AND PHYSIOLOGY is well supplied with specimens and apparatus, such as charts, skeletons, a full set of Bock Steiger anatomical models, etc., suitable for the illustration of these subjects.

THE DEPARTMENT OF ZOOLOGY AND COMPARATIVE ANATOMY can be well illustrated from specimens, charts, and mounted skeletons. The vertebrates especially are well represented. There are about four hundred specimens illustrative of the Molluscs, and upwards of three thousand illustrative of Insects, and of Crustaceans, Echinoderms, Star Fishes, and Corals, there are enough for the purposes of instruction.

THE GEOLOGICAL DEPARTMENT contains several thousand specimens well adapted to illustrate the different kinds of rocks and the successive stages of Geological History. The Paleontology of the Silurian and Carboniferous ages is especially well represented, and a well arranged series of Minerals, many of them rare specimens from the Rocky Mountains and Andes, serve to illustrate the Department of Mineralogy.

The interest of Geological study is also enhanced by frequent class excursions under the direction of the Professor, for the purpose of collecting fossils and examining rock strata.

A NUMISMATIC COLLECTION, made by the late Charles D. Sanford, and containing 3,500 coins, has been presented to the University by the late Rev. Miles Sanford, D.D.

The Museum is under the charge of Prof. Ransom Dexter, who has already done much toward systematizing the work of collecting and arranging, and it is hoped that considerable additions will be made to the collections during the coming year.

HERBARIUM.

THE HERBARIUM COLLECTION, which was begun only two years ago, already contains about fifteen hundred well arranged specimens, representing nearly twelve hundred species of flowering plants. It consists largely of plants which have been gathered from localities in the northern portion of this State, the aim being to make the collection represent as completely as possible, first, the indigenous flora of our own locality, and then that of the whole State and of adjacent States. To this end, and for the purpose of giving the classes in Botany that experience in field work so important to the thorough understanding and enjoyment of the science, frequent class excursions will be organized during the Summer term, under the direction of the Professor of Botany, to visit localities of especial botanical interest.

CHEMICAL AND PHILOSOPHICAL APPARATUS.

The lectures on Chemistry and Natural Philosophy are illustrated by modern apparatus. Important additions have recently been made, chiefly donations from George Hazeltine, LL D., of London, and Messrs. B. O. & H. W. Chamberlain, of Boston, Massachusetts; among them a Rumkorff Induction Coil, one of the largest ever imported; a full set of the famous Geissler Tubes, of Hoffman's Apparatus, and a powerful Grove Battery, together with apparatus useful in the assay of ores.

LOCATION, BUILDINGS, ETC.

The Location of the University is in the south part of Chicago, directly on the Cottage Grove line of the Chicago City Railway. The site was the gift of the late Senator Douglas, and is universally admired for its beauty and healthfulness. The building is unsurpassed for the completeness of its arrangements, especially the student's rooms, which are in suits of a study and two bed-rooms, of good size and height, and well ventilated.

THEOLOGY.

No theological department is connected directly with the University, so as to be under the same Board of Control; yet the facilities for theological education in the city are scarcely second to those of any other place in the country. There are within easy access from the University three theological seminaries, representing as many of the leading denominations.

The Baptist Union Theological Seminary is located at Morgan Park:

REV. G. W. NORTHRUP, D.D., President.

The Chicago Theological Seminary (Congregational) is at Union Park, in the West Division:

REV. GEORGE N. BOARDMAN, D.D., President.

The Presbyterian Theological Seminary of the Northwest is located in the North Division, at the corner of Halsted street and Fullerton avenue:

REV. FRANCIS L. PATTON, D.D., President.

BOARD AND ROOMS.

Board may be obtained in the Club Room of the University, where many of the students board, at cost, which has been during the past year \$3.00 per week.

Students who may prefer it, can obtain board in families on reasonable terms, or they may form clubs and provide for themselves.

EXPENSES PER ANNUM.

Board (in the club) \$3.00 per week.....	\$117.00
Tuition.....	70.00
Room rent (not including vacations).....	20.00
Incidentals.....	8.00
Library fee, fifty cents per term.....	1.50
Total.....	\$216.50

Students provide their own furniture, except bedsteads, a single bedstead being placed by the University in each dormitory. The students, also, provide their own fuel and lights. The use of soft coal is prohibited in the University building. Gas costs about fifty cents per week for each room, and fuel from \$10 to \$20 per annum for each student. Washing has been, during the past year, seventy-five cents per dozen.

The rule of the Trustees requires all bills to be paid at the beginning of each term, before the students enter their several classes; and by failure to comply with these terms, the student forfeits the privileges of the University.

Parents will take notice that the whole necessary expense for one year, including wood, lights and washing, varies but little from \$300. This has been proved by the actual experience of students who practice economy. Any material variation from this amount may be regarded as unnecessary.

HISTORY.

This School was organized as a College of Law under the joint auspices of the University of Chicago and Northwestern University, in 1872, and though still nearly the youngest Law School in the United States, is conceded to be one of the first in success. Out of forty-three Law Schools reported to the Department of Education last year, only four claimed a larger roll of Students than the UNION COLLEGE OF LAW, and among these four none shows larger advantages to the student, or a more attractive, instructive and thorough course. During its first year the College had an attendance of sixty students, and graduated fourteen. During its second year one hundred and three attended, and twenty-six graduated. During its third year one hundred and thirty-six attended, and fifty graduated. During the present year, which has been very severe on educational institutions, owing to the depressing financial condition of the country, and to other causes, one hundred and twenty-four students have attended. The instructors now engaged have become perfected, by experience, in the art of teaching law, which is, in a degree, a distinct art from its practice in the courts, and requires time and continued and permanent organization for its highest success.

IMPORTANCE.

The advantages afforded by a College of Law for instruction in the science and practice of Law are appreciated by both the Bar and the public. A systematic course of study, under eminent living teachers, is quite as valuable to the legal student as to the medical or theological. For laying the foundation of a thorough knowledge of the law, the advantages of the Law College far exceed those of an office. In an office it is seldom that the student receives the attention his best interests demand. In the College the professors are specially charged with this work. The value of this instruction is indicated by the fact that about one hundred students had, prior to the establishment of this College, gone yearly from the State of Illinois to the schools of other States, although these schools do not teach our system of practice, nor the statutes and decisions of our State. Now the current is reversed, and students from other States, as well as our own, are seeking legal education in Illinois.

CONDITIONS OF ADMISSION.

Students entering the Junior Class are expected to have at least a good common school education. A knowledge of Latin, though not required, is, however, of much service in handling law terms.

ADVANCED STANDING.

Students who have attended another Law College one year, or spent one year in the study of law in the office of an attorney, may apply for standing in the Senior Class at the opening of the School Year, or during the first half of the first term, and may enter it if found competent, on examination by the Faculty.

METHOD OF INSTRUCTION.

The method of instruction consists, (1) of Oral Expositions (with illustrations), and Examinations from approved text-books read in course; (2) Lectures by members of the Faculty and eminent members of the Bar, upon legal topics; (3) the drawing of the various legal papers requisite in the ordinary practice of the law; and (4) Moot Courts.

LECTURES.

In addition to the regular course of instruction, lectures are given by members of the faculty, members of the bar, and others. The following have been given during the past year:

Three by the Hon. Leonard Sweet: "Cicero," "The Nationalities out of which the Englishman was Made," and "Rome under the Kings;" one by F. C. Whitehouse, Esq.: "Registration of Titles;" one by Emory A. Storrs, Esq.: "Preparation and Conduct of Law Suits;" two by Prof. H. M. Dickson: "Elocution Illustrated by Readings;" one by Robert Hervey, Esq.; one by Abraham M. Pence, Esq.: "Jurisdiction;" one by Hon. H. Forrester: "Statute of Uses;" four by Wm. S. Brackett, Esq.: "Law of Wills;" one by W. G. Ewing, "Public Prosecutor;" one by Consider H. Willett, Esq.: "Eminent Domain;" one by

UNIVERSITY OF CHICAGO.

Henry Strong, Esq.: "Some Epochs in Legal History;" one by Hon. E. B. Sherman; one by Thomas Dent, Esq.: "Drifts in the Law;" one by Col. Augustus Jacobson: "Cash;" two by Dr. H. Gradle: "Physiology of the Eye;" by Prof. High: a series of Lectures on "Injunctions and Receivers;" twenty-five by Prof. Howell: "Criminal Law;" "Law Books—Hints as to Formation of a Library; Fixtures;" by Prof. Hurd, a series of lectures on the Statute Law of Illinois; twenty-three, by Dr. Davis, "Medical Jurisprudence."

MOOT COURTS.

That the students may be versed in the practice of the law, two Moot Courts are held every Saturday—one by the Senior, and the other by the Junior Class. During some years a Union Moot Court has also been sustained by the Students of both classes; in these they are taught to apply legal remedies, according to the common law and chancery systems of practice; to bring suits, draw papers, pleadings, briefs, etc., and take the various steps incident to bringing the cause to trial; then to try it according to the rules of evidence, including the arguments, charge, verdict, motion in arrest of judgment, writ of error, etc. Actual cases are selected, and the forms and dignity of a trial in Court preserved. The trial takes place in the presence of the classes, whose members act respectively as counsel, jurors, witnesses and officers of the Court, and before a Professor, who sits as Judge, with the double aim of illustrating the legal principles involved, and explaining the rules of practice.

Grammatical accuracy, rhetoric, and elocution, receive such attention as will correct faults of style, without suppressing individuality. No pains are spared to inculcate a high tone of professional ethics and conduct.

SOCIETIES.

The students also organize societies, holding their sessions weekly, for the discussion of questions of law, political policy, and economy, and for becoming acquainted with parliamentary rules. During the past year this Lyceum has proceeded according to the forms of the U. S. Senate, with standing committees, bills, &c., and all the usual machinery of a legislative body.

BOOKS.

Students will find their own books. Arrangements have been made with the publishing house of Callaghan & Co., by which they will be supplied at the lowest trade prices. Many students obtain the use of books, from the numerous law offices in the city on favorable terms.

EXAMINATIONS.

In addition to the daily examinations, the students will be examined during the year in graded competitive examinations, whereby they may test their relative progress in time to prepare for the examination for degrees, at the close of the year, in the presence of the Faculties and Trustees of both Universities.

Juniors who show a satisfactory acquaintance with the subjects required, will, after one year's study, be advanced to the Senior Class. Seniors found qualified after a like period, will be recommended for graduation.

UNIVERSITY OF CHICAGO.

DEGREES.

The degree of Bachelor of Laws is conferred on those who complete the course of studies herein prescribed.

ADVANTAGES.

The location of the Law College, in Parker Block, 95-97 Washington street, in the heart of the great metropolis of the Northwest, and in the vicinity of all the law offices and of the Courts, State and Federal, which are almost constantly in session, affords unsurpassed advantages to students who wish to obtain employment during office hours, and to become acquainted with every phase and variety of business. The hours of class exercises are so arranged that students can employ the business hours of the day as clerks in attorneys' offices without interfering with their studies.

LIBRARY.

The students are admitted free to the Law Library of the Chicago Law Institute, located in the Court House,—a Library of over ten thousand volumes,—a privilege for initiation to which lawyers in practice pay \$100, besides annual assessments of \$15.00.

DIPLOMA.

Our Diploma admits to the Bar of Illinois, if the student has taken the full course of two years in this school. Attendance for a shorter period is credited to the applicant for admission to the Bar on examination before the Supreme Court. There is no other mode of admission in the State than on such Diploma, or an examination in open Court, or on a foreign license.

PRIZES.

The Horton Annual Prize of Fifty Dollars will be awarded to such student of the graduating class as shall be adjudged by an impartial committee to have prepared the best thesis or brief on some legal topic or question. The Callaghan Annual Prize of One Hundred Dollars will be awarded for the best examination in the Senior Class.

ATTENDANCE.

1. Students at the Union College of Law shall hereafter be classified as "regular" attendants, or "casual."
2. No casual attendant shall graduate or receive the Diploma of this School.
3. Students absent from more than one recitation of their class per week, and not furnishing a satisfactory excuse in writing, at the next recitation of the same class, shall be deemed casual for that week, and checked on the roll as such.
4. Students neglecting to comply with any exercise required of them in the Moot Courts for more than two weeks, will be deemed casual for the said two weeks.
5. Students marked as "casual" for half of the weeks of the term, will be deemed casual for the term; and students casual for two terms will be deemed casual for the year.

The roll of the respective classes will be called by the several lecturers at the hours of 8, 9, 4, and 5.
